

# Energy Workshop Series for Central Vermont Residents

The Barre City Energy Committee, in partnership with Efficiency Vermont, is hosting a workshop series designed to help Central Vermont residents lower their energy bills and improve comfort in their homes. A light dinner will be provided at each workshop.

Milne Room, Aldrich Library

5:30pm Light dinner; 6:00 – 7:30 pm Workshop Presentation

## **NOVEMBER 16, 2016 – Slash Your Energy Bills**

What are the range of options to help you reduce your energy bills? This workshop will cover actions you can take to cut energy costs, including no-cost/low-cost energy efficiency improvements, comprehensive weatherization, heat pumps, and renewables, and how to pay for and finance these improvements.

## **JANUARY 18, 2017 – Are Heat Pumps Right for You?**

Cold climate heat pumps have rapidly emerged as a promising technology for Vermont. Come learn about heat pump options for both hot water and space heating to see if they make sense for your home. This workshop will cover the latest in heat pump technologies, the relative economics of using heat pumps versus other fuel sources, successful case studies, and resources to help you.

## **FEBRUARY 22, 2017 – Beyond Heating with Cord Wood**

The Latest in Modern Wood Heating: Wood pellet boilers have emerged as a promising technology for Vermont – with all the convenience of other home heating systems. This workshop will cover how modern wood heating works, the relative cost and savings compared to other fuel sources and systems, and financial incentives available.
