Executive Summary

Stone Environmental, Inc. (Stone) was commissioned by the City of Barre to perform this Phase I Environmental Site Assessment (ESA) of the property located at 18 South Main Street in Barre, Vermont (the Subject Property). This Phase I ESA was performed on behalf of the Turning Point Center of Central Vermont, the User of this Phase I ESA. Turning Point Center of Central Vermont is performing environmental due diligence prior to purchasing the Subject Property and as a requirement for a USDA Rural Development and Housing Preservation Grant.

The Subject Property is zoned in the commercial district in the City of Barre, Vermont. The Subject Property is comprised of one, 0.30-acre parcel, improved with a mix-used residential and commercial building. The Subject Property building is currently vacant. The Subject Property was most recently used as a thrift store on the first floor and a residential apartment on the second floor. Previous use includes hair salon and tanning studio, office space, physician and dental medical center, and was originally developed as a residential dwelling in 1889.

Adjoining properties include an apartment building to the north, known as the Tilden House and owned by the Barre Hosing Authority, and a commercial plaza to the south, owned by Barre Pharmacy, LLC. The commercial plaza includes a vacant space, formerly occupied by a pharmacy. The commercial plaza is currently occupied by a restaurant. Main Street adjoins the Subject Property to the west and Spaulding Street adjoins the Subject Property to the east. Properties located to the west across Main Street include a Shell gasoline station and a religious institution, the Evangelical Free Church. Properties to the east across Spaulding Street include the McFarland building owned by the State of Vermont- Building and General Services. The surrounding area consists of mixed-use commercial/residential properties with the City of Barre downtown area located to the north and the Stevens Branch of the Winooski River located to the west.

The adjoining property located at 20 South Main Street, currently Basil's Pizzeria and Restaurant, was initially used as a residential dwelling and then as a filling station starting in approximately 1961. The filling station was located directly on the southern parcel boundary of the Subject Property. In approximately 1984, the building was razed and the Cumberland Farms gas station was constructed. The gas station operated until 1999 when the underground storage tanks (USTs) were removed. In 1998, a Site Investigation was performed on 20 South Main Street to assess soil and groundwater in the vicinity of the fuel dispenser island the USTs system. Volatile organic compounds (VOCs) were not detected in groundwater. Groundwater flow direction was determined to be in a northwesterly direction. The former filling station was never assessed. The filling station was known as Lou's Gulf Service and Cliff's Gulf Service and most likely was used for automotive service. Based on our professional experience and the US EPA Industry Sector Notebooks, automotive service operations routinely use and produce hazardous and petroleum materials in their business. A release of hazardous or petroleum materials to the environment at the upgradient adjoining property has the potential to migrate to the Subject Property, based on its hydraulically downgradient location.

This assessment has revealed no evidence of Recognized Environmental Conditions (RECs), except for the following:

> REC #1: The adjoining property to the south is a hazardous waste site known as the Cumberland Farms (SMS # 98-2415) and previously operated as an automotive service garage.

Phase I Environmental Site Assessment – 18 South Main Street, Barre, Vermont

1. Introduction

1.1. Purpose

Stone Environmental, Inc. (Stone) was commissioned by the City of Barre to perform this Phase I Environmental Site Assessment (ESA) of the property located at 18 South Main Street in Barre, Vermont (the Subject Property). This Phase I ESA was performed on behalf of the Turning Point Center of Central Vermont, the User of this Phase I ESA. Turning Point Center of Central Vermont is performing environmental due diligence prior to purchasing the Subject Property and as a requirement for a USDA Rural Development and Housing Preservation Grant.

This Phase I ESA was prepared in conformance with the *Standard Practice for Environmental Site Assessments: Phase I ESA Assessment Process*, published by ASTM International as Standard Practice E1527-13. ASTM Standard Practice E1527-13 constitutes "all appropriate inquires" with respect to the previous ownership and past uses of a property consistent with good commercial and customary practice, as defined at 42 U.S.C. §9601(35) (B) and is intended to permit the User of the Phase I ESA to qualify for one of the landowner liability protections of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).

In accordance with ASTM Standard Practice E1527-13, this Phase I ESA was performed to identify recognized environmental conditions (RECs) at the Subject Property, which are defined as follows:

> *"The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."* (ASTM, 2013)

1.2. Detailed Scope of Services

Stone performed the following activities for the Phase I ESA:

- Performed a walkover inspection of the Subject Property on June 28, 2021. The purpose of the walkover inspection was to search for visible signs of contamination, and to assess current Subject Property activities to determine the likelihood of a release to the environment.
- Conducted a windshield survey of adjacent properties on June 28, 2021.
- Conducted interviews with:
  - Mr. David Lawrence, property owner of 18 South Main Street, on July 1, 2021.
  - Mr. Chip Castle, Board Treasurer of Turning Point Center of Central Vermont, and User of this Phase I ESA, on June 30, 2021.
- Reviewed federal and State of Vermont environmental databases to identify state or federally-listed sites present within the radii defined in ASTM E1527-13 (Appendix D).
- Reviewed available Vermont Department of Environmental Conservation (VT DEC) Sites Management Section files for the adjoining properties.

- Reviewed historical sources of information to assess past Subject Property use, including:
    - Sanborn fire insurance maps;
    - Historical USGS topographic maps;
    - Historical aerial photographs;
    - Historical city-street directories; and
    - City of Barre, Vermont land records.
- Drafted a *Phase I ESA Report* (this report) summarizing the findings of the Phase I ESA and acknowledging areas of uncertainty that may have affected Stone's conclusions.

As specified by ASTM Standard Practice E1527-13, the scope of work described above allows for the use of professional judgment by the Environmental Professional to determine the extent to which specific information sources are reviewed.

The following items are outside of the scope of this Phase I ESA:

- Evaluation for asbestos-containing building materials, lead (paint/plumbing), radon, mold, fluorescent light ballasts, and polychlorinated biphenyl (PCB)-containing light ballasts or caulk/glazing;
- Wetlands, ecological resources, historical/cultural resources;
- Regulatory and health & safety compliance; and
- Endangered species.

The items listed above typically present little environmental risk to a property; however, these items may be liabilities during property transfer, regulatory audits, and construction, renovation, or demolition projects.

1.3. Significant Assumptions

Access to the Subject Property was granted by Mr. David Lawrence, property owner of 18 South Main Street. Although every effort was made to inspect all accessible areas of the Subject Property, Stone does not render an opinion of unassessed portions of the Subject Property.

1.4. Limitations and Exceptions

The *Phase I ESA Report* documented herein (the Report) was prepared for the exclusive use of Turning Point Center of Central Vermont. No additions or deletions to the Report are authorized without the prior written consent of Stone. Reliance on the conclusions of the Report or any other use of the Report in whole or in part by parties other than the designated Users is prohibited without prior written consent of Stone. Stone retains a copy of the Report.

1.5. Special Terms and Conditions

Stone summarized the available information but assumes no responsibility for the accuracy of the information gathered from written records, interviews, or questionnaires. Testing for radon, asbestos, and/or lead is outside the scope of this Phase I ESA. Stone renders no opinion as to the presence of petroleum and/or hazardous materials located at inaccessible and/or non-inspected portions of the Subject Property.

2. Subject Property Description

2.1. Location and Legal Description

The Subject Property is located at 44.195617° north latitude and -72.500623° west longitude at an elevation of approximately 616 feet above sea level in the City of Barre, Washington County, Vermont (Figure 1, Appendix A). The Subject Property is comprised of one, 0.30-acre parcel located at 18 South Main Street, Barre, Vermont. This property is depicted on Figure 2, Site Map (Appendix A). The Subject Property is identified with the City of Barre as parcel 1345-0018-0000.

2.2. Subject Property and Vicinity General Characteristics

The Subject Property is zoned in the commercial district in the City of Barre, Vermont. Adjoining properties include an apartment building to the north, known as the Tilden House and owned by the Barre Hosing Authority, and a commercial plaza to the south, owned by Barre Pharmacy, LLC. The commercial plaza includes a vacant space, formerly occupied by a pharmacy. The commercial plaza is currently occupied by a restaurant, known as Basil's Pizzeria and Restaurant. Main Street adjoins the Subject Property to the west and Spaulding Street adjoins the Subject Property to the east. Properties located to the west across Main Street include a Shell gasoline station and a religious institution, the Evangelical Free Church. Properties to the east across Spaulding Street include the McFarland building owned by the State of Vermont- Building and General Services. The surrounding area consists of mixed-use commercial/residential properties with the City of Barre downtown area located to the north.

2.3. Description of Structures, Roads, and Other Improvements on the Subject Property

The Subject Property is improved with a commercial and residential building that is currently vacant. The building is served by municipal water and sewer. The Subject Property is accessed with an asphalt paved driveway from Main Street located south of the building. A parking lot is in the rear of the building on the eastern portion of the parcel. Overhead electrical service is provided to the Subject Property from a pole-mounted electrical transformer located southwest of the Subject Property across Main Street. The balance of the Subject Property comprises greenspace to the north and west of the building. There is a small, wooded area on the eastern portion of the Subject Property with a steep slope to Spaulding Street.

The Subject Property building is one and a half stories and approximately 2,745-square feet with a small attic space and a full basement. The building was constructed in 1889 with wood construction and has a poured basement slab with stone foundation. The eastern portion of the building is an addition constructed in 1900 with slab on grade construction.

2.4. Past Use of Subject Property

According to the historical records reviewed (Section 5.4) and interviews with the User of the Phase I ESA, the Subject Property was first developed in 1889 with a residential dwelling. An addition was constructed in 1900. The Subject Property was used as office space and a physician office starting in approximately 1933 until

approximately 1984. The Subject Property continued use as an office space and was used by the Center on Aging in 1998. The Subject Property was renovated into a hair salon and tanning studio in 1997 and operated as a hair salon and tanning studio until approximately 2012. The Subject Property was most recently used as a thrift store on the first floor and a residential apartment on the second floor.

2.5. Past Uses of Adjoining Properties

Based on historical records reviewed (Section 5.4), including Sanborn Fire Insurance Maps and City Directories, the surrounding area was developed prior to 1884. Uses included residential properties, small scale industrial properties including wood planing and a grist mill, religious institutions, a post office, Barre City Hospital, gasoline stations, automotive service garages, and the Calmont Beverage Company.

Specifically, the adjoining property to the south at 20 South Main Street was initially used as a residential dwelling and then as a filling station starting in approximately 1961. The filling station was located directly on the southern parcel boundary of the Subject Property. In approximately 1984, the building was razed and the Cumberland Farms gas station was constructed. The gas station operated until 1999 when the USTs were removed.

The Barre Shell gasoline station located at 15 South Main Street, across Main Street from the Subject Property was initially used as a residential dwelling and then an automotive service garage and gasoline station starting in 1961 and currently is operating as a gasoline station.

3. Physical Description

3.1. Topography

The topography at the Subject Property is generally flat. The surrounding area slopes to the northwest towards the Stevens Branch.

3.2. Geology

3.2.1. Bedrock

According to the Bedrock Geologic Map of Vermont (Ratcliffe, et al., 2011), bedrock below the Subject Property is mapped as phyllite and metalimestone described as dark-gray to silvery-gray, lustrous, carbonaceous-muscovite-biotite-quartz phyllite containing abundant beds of punky-brown-weathering, dark-bluish-gray micaceous quartz-rich limestone in beds ranging from 10 cm to 10 m thick. No bedrock outcrops were observed during the June 28, 2021 Subject Property inspection.

3.2.2. Surficial Material

According to the Surficial Geologic Map of Vermont (Doll, Ed., 1970), the Subject Property surface soils are mapped as alluvium, sands and gravel formed by postglacial river deposits. A Site Investigation was performed on the adjoining property to the south in April 1999. Soils were described as very fine to medium sands, overlying medium to coarse sands, gravel, boulders, and trace silt (LAG, 1999). The soil was deposited fluvially by the Stevens Branch of the Winooski River, located approximately 320 feet from the Subject Property.

3.3. Hydrology and Hydrogeology

Surface water at the Subject Property is expected to mimic surface topography and flow northwest. Groundwater flow direction is most likely predominantly northwest towards the Stevens Branch of the Winooski River. The Site Investigation on the adjoining property to the south indicated groundwater flow was in a northwesterly direction with a relatively flat gradient of 0.005 feet/foot (LAG, 1999).

4. User-Provided Information

Mr. Chip Castle, Board Treasurer of Turning Point Center of Central Vermont, the User of this report provided the following information to Stone to address the User obligations portion of All Appropriate Inquiry (AAI) and ASTM Standard Practice E1527-13:

4.1. Environmental Liens or Activity and Use Limitations

Mr. Castle indicated that he was not aware of any environmental cleanup liens or environmental land use restrictions filed or recorded against the Subject Property, or engineering controls in-place at the Subject Property.

In addition, Stone utilized the Vermont Agency of Natural Resources (ANR) Environmental Research Tool[1] and other resources with the objective of identifying environmental land use restrictions or engineering controls that may be in place at the Subject Property. No environmental land use restrictions or engineering controls were identified at the Subject Property in the readily available and practically reviewable information sources reviewed by Stone for this Phase I ESA.

4.2. Specialized Knowledge

Mr. Castle previously used the Subject Property as office space when he was the Director of Central Vermont Council on Aging. Additionally in 2012, the Barre Housing Authority was the prospective purchaser of the Subject Property, and Mr. Castle was the acting Director. Dubois & King, Inc (D&K) prepared a Phase I ESA on behalf of the Barre Housing Authority in 2012 (D&K, 2012). Subsequently, the Barre Housing Authority did not purchase the Subject Property.

Mr. Castle indicated that he does not have specialized knowledge of chemicals used at the Subject Property and that he only used the building as an office space.

4.3. Commonly Known or Reasonably Ascertainable Information

Mr. Castle provided the following commonly known or reasonably ascertainable information relative to the Subject Property or adjoining properties:

- The Subject Property has been vacant for years. Previously, the Subject Property was used as a thrift shop on the first floor and an apartment on the second floor. Additional prior uses included a hair salon and tanning studio, and Council on Aging office space.

[1] https://anrweb.vt.gov/DEC/ERT/Hazsites.aspx, accessed July 9, 2021

4.4. Valuation Reduction for Environmental Issues

Mr. Castle indicated the purchase price reasonably reflected the fair market value of the Subject Property.

4.5. Reason for Performing Phase I ESA

This Phase I ESA is being performed on behalf of Turning Point Center of Central Vermont who is performing environmental due diligence prior to purchase of the Subject Property and as a requirement for a USDA Rural Development and Housing Preservation Grant.

4.6. Additional Documents

Mr. Castle provided Stone with the D&K Phase I ESA performed for the Subject Property in September 2012 and a Building Inspection Report prepared by Jourdan Building Inspection Services, LLC in April 2021.

5. Records Review

Stone utilized a Government Records Report generated by Envirosite Corporation (Envirosite) to perform a search of relevant environmental databases for the Subject Property and vicinity, in accordance with AAI and ASTM Standard Practice E1527-13. The full Government Records Report from Envirosite, dated June 24, 2021, is included in Appendix D. In addition to the Envirosite report, Stone reviewed the Vermont ANR Natural Resources Atlas[2] and Environmental Research Tool[3] to review relevant databases maintained by the State of Vermont. Results of the database review are summarized in the following sections organized into federal (5.1), State of Vermont (5.2), and "additional" (5.3) environmental record sources.

5.1. Federal Environmental Resources

A review of federal environmental record sources determined there are twenty-two federal listings within the search distance reported in the attached Envirosite report (Appendix D) and the ANR Natural Resources Atlas.

5.1.1. National Priority List Sites (NPL)

A review of the NPL database identified no NPL sites located within a 1.0-mile radius of the Subject Property.

5.1.2. CERCLA (Active and NFRAP Archive) Sites

A review of the Superfund Enterprise Management System (SEMS) database, formerly known as Comprehensive, Environmental Response, Compensation, and Liability Information System, (CERLIS), as provided by Envirosite identified two sites within 0.5 miles of the Subject Property that were formerly managed by the United States Environmental Protection Agency (EPA) under the Comprehensive, Environmental Response, Compensation, and Liability Act (CERCLA) as summarized in Table 1, below. No sites were identified that are actively being managed by the EPA.

Table 1: Registered CERCLA sites within 0.5-mile of the Subject Property

Facility	Address	Distance (miles)/Direction from Subject Property	Elevation Relative to Subject Property
ENTERPIRSE ALLEY (FORMER HOWE CLEANERS)	9 DEPOT SQUARE	0.262/NORTHWEST	LOWER
BARRE COAL TAR	33 WILLIAMS LANE	0.287/WEST-NORTHWEST	LOWER

The Former Howe Cleaners (SMS #992631) has undergone corrective action implementation including source excavation, installation and operation of soil vapor extraction (SVE) systems, and in-situ chemical oxidation (ISCO) to remediate the dissolved phase chlorinated volatile organic compound (VOC)

[2] http://anrmaps.vermont.gov/websites/anra5/, accessed July 9, 2021
[3] https://anrweb.vt.gov/DEC/ERT/GlobalSearch.aspx, accessed July 9, 2021

groundwater plume (ECS, March 2016). The Former Howe Cleaners is located downgradient from the Subject Property. Based on the implemented remedy, distance and downgradient location, there is no risk of contaminants migrating from the Former Howe Cleaners to the Subject Property.

The People's Heat Lighting Power Company, also referred to as Barre Coal Tar (SMS Site #870024, and #770206), on 33 Williams Lane is located downgradient of the Subject Property. Based on the distance and downgradient location, there is no risk of contaminants migrating from the Barre Coal Tar to the Subject Property.

5.1.3. Resource Conservation and Recovery Act (RCRA) Hazardous Waste Generator Corrective Action Sites (RCRA CORRACTS)

A review of the RCRA CORRACT database performed by Envirosite identified no RCRA CORRACT site within 1.0 mile of the Subject Property.

5.1.4. RCRA Hazardous Waste Generator Sites

A review of the Resource Conservation and Recovery Information System (RCRIS) database performed by Envirosite identified twenty facilities within 0.25 mile of the Subject Property as current or former generators of hazardous waste, as summarized in Table 2, below. Categories of hazardous waste generators include:

- Very Small Quantity Generators (VSQG), defined as a facility that generates 100 kilograms (220 pounds) or less of hazardous waste per calendar month;
- Small Quantity Generators (SQG), defined as a facility that generates between 100 and 1,000 kilograms (2,200 pounds) of hazardous waste per month; and
- Large Quantity Generators (LQG) defined as a facility that generates more than 1,000 kilograms (2,200 pounds) of hazardous waste per month.

Table 2: Registered hazardous waste generators within 0.25-mile of the Subject Property

The Barre Shell gasoline station is located at 15 South Main Street, west-northwest of the Subject Property, approximately 0.2 miles across Main Street at a lower elevation. The Barre Shell is a very small quantity generator of benzene with a violation in 1998 for being out of compliance. This site is discussed in further detail in section 5.2.5 (State File Review).

The SB Colins Convenience Plus is a former gasoline station located at 20 South Main Street, south-southwest of the Subject Property and is an adjoining property at a higher elevation. The SB Colins Convenience Plus is a non-generator and previously generated benzene. There were no violations reported. This site is discussed in further detail in section 5.2.5 (State File Review).

None of the remaining hazardous waste generators listed in Table 2 pose a risk of contaminant migration to the Subject Property due to topography, nature of waste generated, relative distance to the Subject Property, or the absence of reported RCRA violations.

5.1.5. Federal Institutional Controls / Engineering Controls Registries

A review of the Federal Institutional Controls / Engineering Controls (IC/EC) Registries, performed by Envirosite, indicated there are no federal IC/EC sites located within 0.5 mile of the Subject Property.

5.2. State of Vermont Environmental Record Sources

5.2.1. State-Listed Hazardous Waste Sites

Stone utilized the Envirosite report (Appendix D) and the ANR Natural Resources to identify 80 State-Listed Hazardous Waste Sites (SHWS) within 1.0 mile of the Subject Property. Table 3, below, summarizes 23 SHWS identified within 0.25 miles of the Subject Property:

Table 3: SHWS within 0.25 miles of the Subject Property

Abbreviations: Sites Management Activity Completed (SMAC), No Further Action Planned (NFAP), Certificate of Completion (COC)

The Former Dave's Min Mart (Barre Shell) and the Cumberland Farms hazardous waste sites are discussed in further detail in section 5.2.5 (State File Review).

Bonacorsi and Sons, located at 16 Prospect Street, approximately 0.072 miles west-northwest of the Subject Property at a lower elevation is an active hazardous waste site (SMS#2002-3048). Bonacorsi and Sons was a former dry cleaner with petroleum and chlorinated solvent contamination with offsite migration. The adjoining properties including the United States Post Office and Barre City Hall are impacted by contamination and have sub-slab depressurization systems installed to mitigate the vapor intrusion risk (H&N, 2004). Based on the degree and extent of release from Bonacorsi and Sons, the is no risk of contaminants migrating to the Subject Property.

30 Washington Street is located approximately 0.082 miles north-northeast of the Subject Property at a lower elevation and is an active hazardous waste site (SMS #2015-4600). There was a former UST on the property that released gasoline and the contamination migrated offsite. Based on an Additional Site Investigation performed by Stantec in 2019, petroleum contamination is migrating south toward Washington Street. The southern extent of the plume has not been defined. However, based on the nature of the release and the petroleum compound concentrations on the property boundary, it is expected for the contamination to attenuate prior to migrating to the Subject Property. There is low risk of contaminants migrating from 30 Washington Street to the Subject Property.

Stone reviewed the remaining list of hazardous waste sites that could pose a threat of contaminants migrating to the Subject Property. It was determined that none of the remaining hazardous waste sites present a risk to the Subject Property due to their location relative to regional topography, and nature of their releases.

5.2.2. Leaking USTs and ASTs

A review of the Vermont SHWS database for properties listed due to Leaking Underground Storage Tank (LUST) or Leaking Aboveground Storage Tank (LAST), performed by Envirosite, identified four LUST sites and nine LAST sites within 0.5 mile of the Subject Property. Table 4 summarizes the LUST and LAST sites identified.

Table 4: LUST and LAST sites within 0.5-miles of the Subject Property

Facility	Address	Type	Distance (miles)	Direction from Subject Property	Elevation Relative to Subject Property
LYMAN AMSTEAD APARTMENT BUILDING	5 AVERILL STREET	LAST	0.19	NNE	HIGHER
FAIRPOINT COMMUNICATIONS	46 ELM STREET	LUST	0.19	N	LOWER
BARRE PUBLIC WORKS GARAGE	6 BURNHAM STREET	LUST	0.20	WNW	LOWER
STONES SERVICE STATION INC	133 WASHINGTON ST	LUST	0.27	ESE	HIGHER
URSULA OLENDER RESIDENCE	7 ELMORE ST	LAST	0.32	S	HIGHER
JOE HICKS PROPERTY	82 TREMONT ST	LAST	0.32	NE	HIGHER
LYNNETTE CLAUDON RESIDENCE	55 WELLINGTON STREET	LAST	0.36	NNW	HIGHER
BIGRAS AUTO AND TIRE	25 GABLE PLACE	LAST	0.40	NW	LOWER
TATRO RESIDENCE	73 CURRIER ST	LAST	0.41	ENE	HIGHER
LANPHEAR RESIDENCE	47 BEACON ST	LAST	0.42	N	HIGHER
CUMBERLAND FARMS #4027	132 SOUTH MAIN ST	LUST	0.43	SSE	HIGHER
RICHARD STEVENSON	20 BASSETT ST.	LAST	0.47	W	HIGHER
MURPHY PROPERTY	338-360 NORTH MAIN STREET	LAST	0.49	NW	LOWER

None of the listed LUST or LAST sites identified in Table 4 pose a risk of contaminant migration to the Subject Property due to the nature of their release, relative distance to the Subject Property, and topography.

5.2.3. State-Registered USTs and ASTs

A review of the Vermont Underground Storage Tank (VT UST) list, and Vermont Aboveground Storage Tank (VT AST) list, performed by Envirosite, identified 40 registered UST facilities, and no registered AST facilities within 0.25 mile of the Subject Property. The identified sites within 0.125 miles of the Subject Property are included in Table 5, below:

Table 5: UST and AST sites within 0.125-miles of the Subject Property

Facility	Address	Type/ Status	Distance (miles) from Subject Property	Direction from Subject Property	Elevation Relative to Subject Property

The Barre Shell (Cumberland Farms Shell 90-BE1) located at 15 South Main Street has four active USTs, including three gasoline USTs and one diesel UST. Previously, four gasoline USTs were installed in 1966 and removed in 1986, and one used oil UST that installed in 1979 and removed in 1990. The Barre Shell UST site is discussed in further detail in section 5.2.5 (State File Review).

The Cumberland Farms located at 20 South Main Street previously had three gasoline USTs that were installed in 1984 and removed in 1999. The Cumberland Farms UST site is discussed in further detail in section 5.2.5 (State File Review).

None of the remaining listed UST sites with active or pulled tanks pose a risk of contaminant migration to the Subject Property due to topography, relative distance to the Subject Property, or location, presumed to be hydraulically downgradient or cross-gradient of the Subject Property.

5.2.4. Solid Waste Facilities/ Landfills

A review of the Vermont Solid Waste Facilities/ Landfills (SWF/LF) database performed by Environsite identified one solid waste or landfill facilities within 0.5 miles of the Subject Property. Restore Barre located at 28 Granite Street, is listed as a closed recycling center. This SWF/LF does not pose a risk of contaminants migrating to the Subject Property based on use as a recycling center and not for disposal of petroleum or hazardous materials.

5.2.5. State File Review

In accordance with AAI and ASTM E1527-13, Stone reviewed documents maintained by VT DEC for environmentally-managed sites with a release of oil or hazardous materials that, based on proximity and direction relative to the Subject Property, may have resulted in contaminants migrating to and impacting the quality of environmental media at the Subject Property.

5.2.5.1. Barre Shell, Former Dave's Mini Mart (SMS #95-1841)

In July 1995, a Phase II ESA was performed on the adjoining Calmont Beverage Company property located at 21 South Main Street. The Phase II ESA results indicated there was a release from the Barre Shell UST system that was migrating onto the Calmont Beverage Company property. In 1998, an Additional Site Investigation was performed by Aquaterra and confirmed there was a dissolved phase petroleum plume migrating offsite to the Calmont Beverage Company property. Groundwater flow direction was determined to be to the west-southwest toward the Stevens Branch. Biennial groundwater sampling was performed in 2008 and 2010 and then again in 2016 and 2018. It was determined the petroleum contamination was confined to the UST source area and no sensitive receptors, including the Stevens Branch were impacted. All monitoring

wells were properly abandoned, and the Barre Shell site received a Site Management Activities Complete (SMAC) designation in September 2019.

5.2.5.2. Cumberland Farms (SMS #98-2415)

In May 1998, the UST system piping was upgraded, and petroleum contaminated soils were encountered in the vicinity of the dispenser island. Approximately 60 cubic yards of soils were removed and transported offsite for thermal treatment. Groundwater monitoring was performed in 1998 and 1999 and no VOCs were detected above laboratory reporting limits during either event. Groundwater flow direction was documented to be to the northwesterly direction. The Cumberland Farms site received a SMAC designation in July 1999. The UST system was subsequently removed in 1999 and the tanks were reported in good condition.

5.3. Additional Environmental Record Sources

The Envirosite report provided a review of additional environmental sources, including the Brownfields site database maintained by the VT DEC and EPA, the Spills database maintained by the VT DEC, and the hazardous waste manifest databases maintained by several states (Appendix D). On July 9, 2021, Stone utilized the ANR Environmental Research Tool to review the VT DEC Spill Response database, for identifying spills that may have been located at the Subject Property.

5.3.1. Brownfields Program

Reviews of the Vermont State Brownfields Program and the EPA Brownfields Program database identified thirteen State or federally-listed Brownfield sites located within 0.5 mile of the Subject Property. These are summarized in Table 6, below:

Table 6: State or Federally listed Brownfield sites within 0.5-mile of the Subject Property

Facility	Address	Status/Priority	Distance (miles)	Direction from Subject Property	Elevation Relative to Subject Property
BONACORSI AND SONS	16 PROSPECT STREET	ACTIVE/MEDIUM	0.072	WNW	LOWER
BLANCHARD BLOCK	14 NORTH MAIN STREET	ACTIVE/LOW	0.107	NNW	LOWER
FORMER CLARK'S FEED STORE	51 PROSPECT STREET	ACTIVE/LOW	0.108	WNW	LOWER
36 MAIN STREET BARRE	36 NORTH MAIN STREET	ACTIVE/LOW	0.137	NNW	LOWER
12 KEITH AVE	12 KEITH AVENUE	ACTIVE/MEDIUM	0.193	NNW	LOWER
SUMMER STREET PROJECT	22 KEITH AVENUE	COC	0.203	NNW	LOWER
FORMER JAMES DENTE PROPERTY	207R N MAIN STREET	COC	0.259	NW	LOWER
BARRE CITY PLACE	219 NORTH MAIN STREET	COC	0.268	NW	LOWER
ENTERPRISE A. REDEVELOPMENT AREA	16 ENTERPRISE ALLEY/ MERCHANTS	ACTIVE/HIGH	0.347	NW	LOWER
FORMER TWIN CITIES CUSTOM SANDBLAST	32 GRANITE STREET	COC	0.359	NW	LOWER
GABLE PLACE	10,11-15,19, 22 GABLE PLACE	COC	0.388	WNW	LOWER
RUEDA PROPERTY	110 GRANITE STREET	ACTIVE/LOW	0.415	W	LOWER

These Brownfield sites are discussed in further detail in in the SHWS review (Section 5.2.1) section of this report, and do not pose a risk of contaminant migration to the Subject Property due to the nature of their releases, relative distance to the Subject Property, topography, or are in areas presumed to be hydraulically downgradient or cross-gradient of the Subject Property.

5.3.2. Vermont Spills Database

Stone reviewed the VT DEC Spills database for spills reported in the City of Barre. It should be noted that the listings contained within the database often do not contain enough information to locate a spill. No spills were

reported for the Subject Property. Five spills were reported at the Barre Shell located at 15 South Main Street, including a fifteen-gallon spill in 1987, a two-gallon spill at the dispenser island in 1995, a two-gallon spill during fueling of a vehicle at the dispenser island reported in 1996, a five-gallon spill in 1998, and a three-gallon spill at the dispenser island in 2014. The spill in 1987 was cleaned up by the fire department and the remaining spills were cleaned up using Speedi-Dri® and closed by the VT DEC spills program.

Two spills were reported at the Cumberland Farms located at 20 South Main Street, including a 6 gallon spill during a piping upgrade performed in 1998, and a 4 gallon spill from fueling of a vehicle at the dispenser island reported in 1994. The spill during the tank upgrade was cleaned up by removing and properly disposing of petroleum contaminated soils. The spill at the dispenser island was cleaned up with Speedi-Dri® and closed by the VT DEC spills program.

5.3.3. Hazardous Waste Manifest

There are three listed hazardous waste generators within 0.25 miles of the Subject Property. Trow & Holden Company, located at 45 South Main Street, is listed for generating petroleum naphthalene and no violations were reported. Dollar General Store, located at 74 South Main Street, is listed for generating alcohol and no violations were reported. Accuworx USA Inc, located at 21 Metro way Unit 2, was a spill response contractor and listed for generating various petroleum materials with no violations reported. There is no risk of contaminants migrating to the Subject Property from the hazardous waste generators based on relative distance to the Subject Property, topography, or are in areas presumed to be hydraulically downgradient or cross-gradient of the Subject Property.

5.3.4. Vapor Intrusion Database

A review of the Vermont Hazardous Sites List for sites where the project manager has determined an indoor air impact has occurred, related to vapor intrusion or release of hazardous material into a building, identified no facilities within 0.5 miles of the Subject Property.

The ASTM E 2600-15 Tier I Screening Process recommends initial screening distances to estimate contaminant plume length and width with no empirical plume data. Table 7, below, presents the vapor screening distances (i.e. distances from a potential off-site contaminant source to the nearest boundary of the Subject Property) with respect to the type of contaminant and presumed direction of groundwater flow.

Table 7: VES Area of Concern (AOC) Screening Distances

Contaminant Type	Source Location with respect to the nearest Subject Property boundary and considering known or assumed groundwater flow direction (3).		
	Up-gradient	Cross-gradient	Down-gradient
Non-petroleum COC(1)	1,760 feet (1/3rd mile)	365 feet	100 feet
Petroleum COC NAPL (2)	528 feet (1/10th mile)	165 feet	100 feet
Petroleum COC Dissolved	528 feet (1/10th mile)	95 feet	30 feet

(1) – COC-Chemicals of Concern; (2) – NAPL – Non-Aqueous Phase Liquid (i.e. free product); (3) Groundwater Flow Direction – if not known or assumed, use search distance of 1,760 feet for up-gradient, cross-gradient, and down-gradient

Table 8, below, presents potential Vapor Encroachment Conditions (VECs) associated with the Subject Property.

Table 8: Identified Potential Contaminant Sources

Contaminant Source	Distance, direction, and groundwater flow direction (with respect to nearest Subject Property Boundary)	Contaminant Type and Screening Distance	Vapor Encroachment Condition Determination
20 South Main Street, former Gulf Service Center	50 feet, south, upgradient	Non-petroleum COC	VEC exists

5.3.5. Historic Dry Cleaners

A review of the Historic Dry Cleaners list identified one facility within 0.125 miles from the Subject Property that may have operated as a dry-cleaning business. Malnati Dry Cleaners was located at 12 Prospect Street, northwest and at a lower elevation than the Subject Property. Malnati Dry Cleanersis was located at the Bonacorsi and Sons hazardous waste site, discussed in Section 5.2.1. Based on the nature and extent of the release, and the downgradient location of the former dry cleaners, there is no risk of contaminants migrating to the Subject Property.

5.3.6. Unmappable Site Summary

Unmappable sites (orphan sites) are sites that could not be placed onto a map for geographic comparison of distance and elevation versus the target property due to inadequate address information. There are twenty listed orphan Sites. By conducting internet research and online directory assistance of the area surrounding the Subject Property, the location of each site was determined and assessed for potential migration of contamination to the Subject Property. All other orphan sites are either located outside of the appropriate search distance radius for the standard environmental record, or the exact location of the property could not be ascertained.

5.4. Historical Use Information on the Subject Property and Adjoining Properties

Stone reviewed the following historical records during the performance of the Phase I ESA:

- Sanborn fire insurance maps,
- Historical aerial photographs,
- Historical Topographic Maps,
- Historical city-street directories, and
- Title Review in the City of Barre land records.

The results of Stone's review of the above-listed historical records for evidence of Recognized Environmental Conditions in connection with the Subject Property is documented in the following sections:

5.4.1. Sanborn Fire Insurance Maps

Stone reviewed Sanborn Fire Insurance Maps covering the Subject Property for the years 1884, 1889, 1894, 1900, 1905, 1910, 1916, 1925, 1949, and 1964 (Appendix C). Observations of the Subject Property and surrounding properties from the available Sanborn Maps are summarized below:

- 1884: The Subject Property dwelling has yet to be constructed. The properties to the north and south are dwellings and the properties across Main Street to the west are dwellings. The Stafford Holden Fork Manufacturing Company is located to the south. Two religious institutes are located to the north.

- 1889: The Subject Property is developed with residential dwelling. Adjoining properties remain as residential dwellings.
- 1894: No significant changes to the Subject Property are evident. The Stafford Holden Fork Manufacturing Company is also the Ayers Planing Mill.
- 1900: A small addition is apparent on the southeast side of the Subject Property building.
- 1905: The Central Fire Station is located north of the Subject Property. The Averill Grist Mill is located west across Main Street. The Subject Property appears the same.
- 1910: The planing mill to the south is now the Trow & Holden Granite Tool Manufacturing. The Barre City Hospital is located to the east of the Subject Property across Spaulding Street.
- 1916: The Averill Grist Mill is now the Kempton Grist Mill. The post office has been developed to the northwest of the Subject Property. The Subject Property appears the same.
- 1925: There is an automotive garage located north of the Kempton Grist Mill. The Subject Property appears the same.
- 1949: The Subject Property is now labelled offices. The Kempton Grist Mill is now the Barre Feed Company.
- 1964: The Subject property appears the same. The adjoining property to the south is a filling station. The Barre Feed Company to the west across Main Street is now the Calmont Beverage.

5.4.2. Historical Aerial Photographs

Stone requested historical aerial photographs from Envirosite. Aerial photographs were reviewed for the years 1960, 1966, 1973, 1976, 1978, 1980, 1986, 1987, 1992, 1998, 2003, 2008, 2008, 2009, 2011, 2012, 2014, 2016, and 2019 (Appendix C). Observations of the Subject Property and surrounding properties from the available aerial photographs are summarized below:

- 1960: The Subject Property is apparent and is developed. The surrounding area has been developed.
- 1966 and 1973: The Subject Property building is apparent. The filling station to the south is apparent.
- 1976 and 1978: The aerial photographs are poor quality.
- 1980: The Subject Property building is apparent. The filling station to the south is apparent.
- 1986, 1987 and 1992: The aerial photographs are poor quality.
- 1998: The Subject Property building is apparent. The filling station to the south has a different configuration with the pump island adjacent to Main Street and the convenience store set back from Main Street. The gasoline station to the west is now apparent.
- 2003: The filling station to the south pump island has been removed. The Subject Property remains the same.
- 2008, 2009, 2011, 2012, 2014, 2016 and 2019: The Subject Property and surrounding area appear the same.

5.4.3. Historical Topographic Maps

Envirosite provided topographical maps for the years 1922, 1924, 1957, 1978, 2012, 2015, and 2018 (Appendix C). Table 9 summarizes Stone's review of these maps:

Table 9: Historical Topographic Maps

Year	Notes
1922, 1924, 1957, 1978, 2012, 2015, and 2018	The Subject Property appears to be developed with a building. The Stevens Branch is apparent to the west. The City of Barre is apparent to the north.

5.4.4. City-Street Directories

Stone requested city-street directories from Envirosite. Street directories were provided for Main Street for the years 1914, 1918, 1924, 1928, 1933, 1939, 1944, 1949, 1955, 1961, 1967, 1998, 2001, 2006, 2010, 2015, and 2018 (Appendix D). Table 10 includes historical listings associated with the Subject Property and adjoining properties.

Table 10: Historical City Directories Listings

Year	Site Location	Address	Property Listed
1914, 1918	Subject Property	18 South Main Street	Dr. William D. Reid
1924, 1928			Sarah H. Reid
1933			William McFarland, physician and Michael Cerasoli, physician
1939			William McFarland, physician and Michael Cerasoli, physician, Aldo Leani, physician, Howard H Reid, dentist, Louis C Kingston, physician,
1944			Michael Cerasoli, physician, William McFarland, physician, Betty Lee's Beauty Salon, Howard R Reid, dentist
1949			Michael Cerasoli, physician, William McFarland, physician, Alphonso E Morale, dentist, Howard R Reid, dentist, Nathaniel D Gordon, chiropodist
1955			Michael Cerasoli, physician, William McFarland, physician, Alphonso E Morale, dentist, Howard R Reid, dentist, Nathaniel D Gordon, chiropodist, Medical Center
1961			Richard Parnigoni, optometrist, Cornelius O Granai Jr, physician, William McFarland, physician, Alphonso E Morale, dentist, Nathaniel D Gordon, chiropodist, Medical Center
1967			Richard Parnigoni, optometrist, Cornelius O Granai Jr, physician, Alphonso E Morale, dentist, Nathaniel D Gordon, chiropodist, Medical Center
1998			Central Vermont Council on Aging
2001			En Vogue Salon, Endless Summer
2006, 2010, 2015, 2018			David Lawrence, En Vogue Salon, Endless Summer
1914, 1918, 1924, 1928, 1933, 1939, 1944, 1949, 1955	Adjoining Property to the south	20 South Main Street	Henry H. Jackson
1961			Lou's Gulf Service
1967			Cliff's Gulf Service
2001			Medicine Shoppe Pharmacy

Year	Site Location	Address	Property Listed
2006, 2010, 2015, 2018			Basils Pizzeria & Restaurant, Green Mountain Nutrition Association, Medicine Shoppe Pharmacy
1924, 1928, 1933, 1939, 1949, 1955	Adjoining Property to northwest across Main Street	13 South Main Street	H. F. Cutler and Son, automobiles
1961			Dewey's Auto Service
1961	Adjoining Property to west across Main Street	15 South Main Street	Rod's Esso Service Center
1998, 2001			Daves Mini Mart & Car Wash
2010, 2015, 2018			Champlain Farms
1924, 1928, 1933, 1944, 1949	Adjoining Property to southwest across Main Street	21 South Main Street	Kempton Mills
1939, 1944, 1949			Barre Feed Company
1955, 1961, 1967			Calmont Beverage Company

5.4.5. Title Review

Stone reviewed the City of Barre land records on June 28, 2021 to identify a chain-of-title history for the Subject Property. This review does not constitute a formal "title search," and is not part of the scope of a Phase I ESA under ASTM E1527-13. According to City of Barre land records, the partial chain–of-title summarized in Table 11 exists for the Subject Property:

Table 11: Chain-of-Title from City of Barre Land Records

Book/ Page	Date	Grantor	Grantee	Comments
233/092	July 19, 2006	Salon Salon Associates	David Lawrence	Warranty Deed
168/016	October 10, 1997	Frank W. Bailey & Eva L. Bailey	Salon Salon Associates	Warranty Deed
119/533-534	May 14, 1984	David B. Reid	Frank W. Bailey & Eva L. Bailey	Warranty Deed
94/420	April 16, 1973	Howard R. Reid & Pearl W. Reid	David B. Reid	Warranty Deed
42/527	September 33, 1933	Granite Savings Bank and Trust Company	Howard R. Reid & Pearl W. Reid	Trustee's Deed
42/525	July 18, 1933	Allan W. Reid	Howard R. Reid & Pearl W. Reid	Quitclaim Deed
23/142	November 12, 1887	Henry Jackson	W.D. Reid	Warranty Deed of Old Town of Barre

6. Property Reconnaissance

Ms. Katrina Mattice of Stone performed a walk-through inspection of the 18 South Main Street property on June 28, 2021. The Subject Property was inspected to the best of the abilities of Stone personnel. Photographs from the reconnaissance are presented in Appendix A.

6.1. General Property Settings

The Subject property consists of a 0.30-acre parcel in the commercial district of the City of Barre. The City of Barre downtown area is located north of the Subject Property and the Stevens Branch of the Winooski River is located west, across Main Street. Adjoining properties include a residential apartment building to the north known as the Tilden House and a commercial plaza to the south, currently occupied by a restaurant. Main Street adjoins the Subject Property to the west with a gasoline station across Main Street to the west. Spaulding Street adjoins the Subject Property to the east with the McFarland building across Spaulding Street owned by the State of Vermont- Building and General Services. Access to the Subject Property is from Main Street via a driveway to the south of the Subject Property building. A parking lot is in the rear of the building, on the eastern portion of the parcel.

6.2. Exterior Observations

The following exterior observations were made during the June 28, 2021 walk-through of the Subject Property:

- Fill and vent pipes to fuel oil ASTs in the basement were observed on the eastern side of the building. The fill and vent pipes appeared to be in good condition and no indications of a release were observed.
- The exterior of the Subject Property consisted of a paved driveway and parking lot, located south and east of the building. The balance of the Subject Property comprises greenspace. There is a small, wooded area on the eastern portion of the Subject Property with a steep slope to Spaulding Street.
- A sign is located on the west side of the Subject Property along Main Street.

6.3. Interior Observations

The following interior observations were made during the June 28, 2021 walk-through of the Subject Property:

- The building is currently vacant. It was apparent the building was used as retail space on the first floor and as an apartment on the second floor.
- There were several sink and plumbing fixtures that were disconnected, presumed to previously be used by the hair salon.
- A fan was apparent in the basement, connected to a vent on the first floor. The vent may have been used by the hair salon.
- The basement foundation is a poured slab with stone foundation. The basement consists of the three room. In the eastern portion of the basement, there appeared to be a cut-out in the basement floor

covered by a rug. Additionally, a pipe was observed protruding from the basement floor. Previous accounts indicated the cut-out in the basement floor was a chute used for coal storage. The coal supplied fuel to the boiler for radiant heat.

- One 275-gallon fuel oil ASTs is located on the southern wall of the basement. The tank appeared to be in excellent condition. Previous accounts indicated the tank was installed in approximately 2009.
- The boiler system was observed in the eastern portion of the basement and was observed to be rusted. No staining of petroleum odor was noted in the basement near the boiler system. Staining was observed beneath the boiler circulator pump, however, is most likely water staining.
- There were broken fluorescent light bulbs observed in the eastern portion of the basement. The light bulbs were most likely used for tanning beds.

7. Interviews

Stone interviewed the following individuals as part of this Phase I ESA:

- Mr. David Lawrence, Subject Property owner, on July 1, 2021.
- Mr. Chip Castle, Board Treasurer of Turning Point Center of Central Vermont, and User of this Phase I ESA, on June 30, 2021.

Stone attempted to contact the Barre City Fire Department. At the date of this report, the fire department has not responded to the inquiry.

Stone asked all interviewees to answer questions in good faith and to the best of their knowledge. Information gleaned from the interviews is presented below and referenced throughout this report, as appropriate. Stone bears no responsibility for the accuracy or completeness of information, whether obtained or undisclosed, during conducting the interviews.

7.1. Phase I ESA User

Mr. Castle was interviewed via a User Questionnaire and on the telephone on June 30, 2021. A copy of the User Questionnaire, completed by Mr. Castle, is included in Appendix B. Pertinent information relevant to Mr. Castle's interview is included in Section 4 User Provided Information.

7.2. Subject Property Owner

Mr. Lawrence was interviewed via an Owner Questionnaire on July 1, 2021. A copy of the Site Owner Questionnaire is provided in Appendix B. Mr. Lawrence indicated the property was not used industrially and he was not aware of any chemicals stored on the Subject Property.

8. Data Gaps

No data gaps, as defined by ASTM E1527-13 were identified during the completion of this Phase I ESA.

9. Summary of Findings

Based on the results of this Phase I ESA, Stone has identified the following findings of potential environmental significance for the Subject Property:

- **Finding #1: The presence of a fuel oil heating system including one 275-gallon heating oil ASTs and oil burning boiler in the basement.** There was no evidence of a release or staining from the AST during the Site reconnaissance.

- **Finding #2: The adjoining property to the south is a hazardous waste site known as the Cumberland Farms (SMS # 98-2415) and previously operated as an automotive service garage.** The adjoining property to the south at 20 South Main Street was used as a filling station starting in approximately 1961. The filling station was located directly on the southern parcel boundary of the Subject Property. In approximately 1984, the building was razed, and the Cumberland Farms gas station was constructed. The gas station operated until 1999 when the USTs were removed. Soil and groundwater were assessed at the Cumberland Farms hazardous waste site due to a release from the fuel piping system in the vicinity of the pump island. No VOCs were detected in groundwater and the hazardous waste site received a SMAC designation in 1999.

- **Finding #3: The adjoining property to the west across Main Street is a hazardous waste site known as the Barre Shell (SMS # 95-1841).** The Barre Shell gasoline station located at 15 South Main Street, across Main Street from the Subject Property was used as an automotive service garage and gasoline station starting in 1961 and currently is operating as a gasoline station. Soil and groundwater were assessed due to a release from the gasoline UST. Biennial groundwater sampling was performed in 2008 and 2010 and then again in 2016 and 2018. It was determined the petroleum contamination was confined to the UST source area and no sensitive receptors, including the Stevens Branch were impacted. The Barre Shell hazardous waste site received a SMAC designation in September 2019.

10. Opinion

Stone offers the following Environmental Professional opinions regarding each finding identified in connection with the Subject Property.

- **Finding #1: The presence of a fuel oil heating system including one 275-gallon heating oil ASTs and oil burning boiler in the basement.** Based on the absence of evidence of a release from the 275-gallon heating oil AST and the excellent condition of the AST, this finding is not considered a REC.

- **Finding #2: The adjoining property to the south is a hazardous waste site known as the Cumberland Farms (SMS # 98-2415) and previously operated as an automotive service garage.** The adjoining property to the south is located hydraulically upgradient from the Subject Property. The previous location of the filling station that operated from 1961 until 1984 was located directly on the southern parcel boundary of the Subject Property. The soil and groundwater assessment performed during the 1998 Site Investigation focused on the dispenser island, located on the western portion of the property and the UST system located on the southern portion of the property. The location of the former filling station was never assessed. The filling station was known as Lou's Gulf Service and Cliff's Gulf Service and most likely was used for automotive service. Based on our professional experience and the US EPA Industry Sector Notebooks, automotive service operations routinely use and produce hazardous and petroleum materials in their business. A release of hazardous or petroleum materials to the environment at the adjoining property has the potential to migrate to the Subject Property. As such, it is the opinion of the qualified environmental professional that this finding constitutes a REC as defined by ASTM E1527-13.

- **Finding #3: The adjoining property to the west across Main Street is a hazardous waste site known as the Barre Shell (SMS # 95-1841).** The gasoline release at Barre Shell is confined to the source area. Groundwater flow direction was determined to be to the west-southwest toward the Stevens Branch and the Subject Property is located hydraulically upgradient. Therefore, it is unlikely the previous release or future releases will migrate to the Subject Property and such this finding does not constitute a REC.

11. Phase I Conclusions

Stone has performed a Phase I Environmental Site Assessment, in conformance with the scope and limitations of ASTM Standard Practice E 1527-13, of the property located at 18 South Main Street, Barre, Vermont. Any exceptions to or deletions from this practice are described in Section 12.0 of this Phase I ESA Report.

This assessment has revealed no evidence of Recognized Environmental Conditions (RECs) in connection with the Subject Property. except for the following:

- REC #1: The adjoining property to the south is a hazardous waste site known as the Cumberland Farms (SMS # 98-2415) and previously operated as an automotive service garage.

12. Deviations from ASTM 1527-13

None.

14. Signature of Environmental Professionals

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Katrina Mattice — 7/13/21

15. Qualifications of Environmental Professionals

John Hanzas / *President & Agrochemical Fate & Exposure Leader*

John Hanzas is the president of Stone Environmental Inc. and the leader of the Agrochemical Fate and Exposure Group. He has over 25 years of experience in conducting studies for registration of pesticides under FIFRA. He has direct experience with the following categories of field registration studies: surface drinking water monitoring, watershed and field-scale runoff monitoring, field deposition (drift), runoff monitoring under simulated rainfall, small-scale prospective groundwater studies, retrospective groundwater studies, and pipe lysimeter studies.

Years of Experience / 26

Years of Experience at Stone / 24

Education
Geology (42 Undergraduate Credits), 1991-1993, University of Vermont

B.S. Business Management, 1991, Ithaca College

Professional Certifications
Remote Pilot Certification under 14 CFR Part 107 - Small UAS Rule

Vermont Certified Pesticide Applicator – 2014; special certification in Demonstration and Research

US EPA Worker Protection Training - Certified Pesticide Handler, Montpelier, VT, 1999 (identification # H0448278)

Additional Education
Good Laboratory Practice (GLP) Standards Training (40 CFR Part 160)

Groundwater Hydrology: Principles, Exploration and Measurement, Wright State University, 1996

Glacial Geology, Norwich University, 1997

Good Laboratory Practices Practical Approach Seminar, Montpelier, Vermont, March 30, 2000, Presented by the West Coast Quality Training Institute

Employment History

Stone Environmental, Inc. / Montpelier, Vermont
President / 2017–Present
President of environmental science consulting company specializing in water quality, modeling, geographic information systems, data management, brownfields redevelopment, hazardous waste investigation and agrochemical registration services.

Stone Environmental, Inc. / Montpelier, Vermont
Agrochemical Fate and Exposure Group Leader / 2008–Present
Responsible for helping develop and implement company strategic planning, project management policies and programs. Responsible for technical and financial performance of the Agrochemical Fate and Exposure Group.

Oversee all studies performed in support of pesticide registration. Serve as study director/project manager on surface water and groundwater projects and fate and exposure modeling projects.

Stone Environmental, Inc. / Montpelier, Vermont
Senior Geoscientist / 2004–2008
Project Geoscientist / 1998–2004
Performs financial analysis. Manages ongoing effort to improve project management skills at Stone.

Assists in the development of budgets, planning, and marketing and sales for the FIFRA Group.

Manages and performs all aspects of surface water monitoring programs under FIFRA. Performs small-scale and large-scale runoff studies. Performs watershed analysis and site selection in Geographic Information Systems (GIS) for surface water studies. Manages lysimeter installations for groundwater studies. Performs site selection investigations, and groundwater, soil, and lysimeter sampling for FIFRA groundwater studies.

Stone Environmental, Inc. / Montpelier, Vermont
Team Leader / 2000–2002
Supervised and coordinated a team of scientists within the FIFRA Group. Assisted in the development of budgets, planning, and marketing for the FIFRA Group. Monitored workload and billability levels.

Stone Environmental, Inc. / Montpelier, Vermont
Staff Geoscientist / 1994–1998

Managed the day-to-day activities of surface water monitoring programs. Conducted site selection investigations for groundwater studies. Performed FIFRA ground- water, soils, and lysimeter sampling. Performed subsurface Underground Storage Tank investigations and conducts Environmental Site Assessments. Responsibilities included project cost proposals, logistics, on-site investigations, sampling results analysis, figure and cross section preparation, GIS work, and report writing.

Geographic Data Technology / Lebanon, New Hampshire
Digital Map Technician / 1994–1995

Updated and expanded geographic database of United States road network. Worked on special projects for Advo and Polk creating postal carrier routes and FCC road classifications.

Related Project Experience

Hybrid Drift and Volatility Studies / Multiple Confidential Clients / 2019–Present / Multiple Studies

Managed the application of test substances in four hybrid studies and conducted sampling activities. Consulted with study directors on resource planning and logistics for these studies.

Vegetative Filter Strip (VFS) Impact on Runoff Transport and Fate /Confidential Client / 2016–2020 / Georgia / 16-097

Managed all stages of this VFS runoff study, including project planning and protocol development, site selection, site instrumentation and monitoring, data processing, and reporting.

Prospective Groundwater Monitoring Study / Confidential Client / 2016–2017 / Nebraska & Georgia / 16-028

Assisted with site selection efforts and study design in Nebraska and Georgia. Assisted with site selection report writing and protocol development.

Off-Field Deposition Using Multiple Swath Numbers with Various Nozzles / Confidential Client / 2017 / Texas / 16-170

Managed all aspect of the study. Assisted with laboratory setup and protocol design for processing downwind deposition samples. Assisted with statistical analysis of results in R and MS Excel. Assisted with writing the final report.

Spray Drift Field Deposition Testing for an Herbicide / Confidential Client / April 2014 / Nebraska / 14-043

Provided study directorship, assisted in creation of the study design and wrote the study protocol, calibrated study sprayer, collected samples, and wrote final report.

Professional and Community Activities

American Chemical Society Member: 1995-2003; 2008-2020

Member of CropLife America's Spray Drift Issue Management Team: 2012–2018

Bradford Town Tree Warden: 2008–2017

Corinth Planning Commission Chair: 1998–2005

Katrina Mattice, PE / *Project Engineer III*

Katrina is a professional engineer and project manager with 10 years of experience focused on the investigation and remediation of contaminated sites and Brownfield properties. Katrina is skilled in all aspects of site investigation and remediation, including investigation and treatment of emerging contaminants such as PFAS, vapor intrusion assessment and mitigation, environmental regulatory compliance, and remedial planning and implementation. Her remediation experience has ranged from large-scale excavation projects, multi-phase extraction and biosparging systems, and various injection technologies including chemical oxidation. Katrina's expertise also includes stormwater management, water system operation, dam safety monitoring and Oil Pollution Prevention regulation compliance.

Employment History

Stone Environmental, Inc. / Montpelier, VT
Project Engineer / November 2017–Present

Project Engineer for environmental assessment and remediation projects. Project Manager and field team leader for Phase I and II ESA's, Brownfield Assessments, State of Vermont hazardous Waste Sites, and ECAA/CAP projects. Responsibilities include: development of technical specifications, preparation of work plans and reports, field technical support, development of project proposals, specifications and budgets, and management of subcontractors. Clients include state and federal regulatory agencies, government organizations, such as the Vermont Department of Environmental Conservation, Regional Planning Commissions, and private entities.

ATC Group Services, LLC. / Waterbury, VT
Engineer Level II / October 2016–November 2017

Served as lead engineer, project manager, and field manager on several environmental site assessment, remediation, and Brownfields redevelopment projects. Prepared work plans, Corrective Action Plans, and designed remediation systems including soil vapor extraction and multi-phase extraction systems. Implemented other remedial technologies including chemical oxidant injections and source excavation. Performed erosion prevention & sediment control inspections for construction activities.

Environmental Compliance Services, Inc. / Waterbury, VT
Engineer Level II / May 2015– October 2016

Coordinated and implemented all aspects of site investigation and remediation projects under a variety of small state funded contracts and federal brownfields grants. Oversaw subsurface investigations and cleanups, along with conducting remedial system installation, operation, and maintenance and management activities. Operated and maintained public and transient non-community water systems. Consulted on environmental compliance including Oil Pollution Prevention.

FPM Remediations, Inc. / Rome, NY
Environmental Engineer / December 2013 –May 2015

Served as the field manager and site lead on site investigation and remediation projects for former and active air force and military bases and other contaminated properties. Performed work involving preparation of reports, work plans, specifications and contract documents in the areas of site assessment and remediation, stormwater management, hydrology, environmental compliance and waste characterization, soil vapor intrusion

mitigation, risk assessment and data management. Acted as field manager and site lead on several projects. Coordinated with GIS specialist and supervised and trained field technicians and interns. Developed solutions that are beneficial to stakeholders, been a liaison with regulatory involvement and have achieved site closure to reclaim land for residential use.

FPM Remediations, Inc. / Rome, NY
Junior Engineer / February 2009–December 2013

Performed duties as an engineer in training including soil, groundwater and air sampling on contaminated properties located on former and active military bases. Performed site assessment and remediation under direct supervision of a Senior Engineer including long term monitoring of chlorinated solvent and petroleum contaminated sites. Oversaw active remediation systems including pump and treat, enhanced bioremediation, and chemical oxidation. Prepared stormwater management plans for construction activities.

Related Project Experience

Risk-Based Cleanup and Disposal Plan and Corrective Action Plan, 19 Bennett Drive/ Coop Hill, LLC / 2018 - 2020 / Brattleboro, Vermont

Project Manager for Supplemental Phase II ESA and cleanup of commercial property that was used as a printing facility with an offset printing press that operated into the 1980s and lead to widespread PCB contamination in the 8,700 square foot warehouse and office building. Prepared Corrective Action Plan in accordance with the VT DEC Investigation and Remediation of Contaminated Properties Rule and a Risk-Based Cleanup Plan for EPA review in accordance with 40 CFR 761. Corrective actions include concrete slab removal, and encapsulation in the warehouse and maintenance bay and building materials removal in the office space.

Phase I and II ESA, 80 Flat Street/ Vivace Realty LLC / 2020 / Brattleboro, Vermont

Prepared a Phase I ESA with funding from Windham Regional Commission (WRC) through the Brownfields Assessment Grant for a former wood manufacturing facility with several industrial properties adjacent to the Subject Property and identified several recognized environmental conditions (RECs). Next phase of work also funded by WRC included a Site-Specific Quality Assurance Project Plan (SSQAPP) and Phase II ESA. Phase II ESA field work is pending and includes soil gas, soil and groundwater assessment.

Phase II Environmental Site Assessment, Lynwood Crown Farm/ Vermont Fish and Wildlife / 2019 / West Charleston, Vermont

Designed and implemented a Phase II Environmental Site Assessment to support a property transaction and farm retirement plan to restore the Clyde River and surrounding wetlands on a former dairy farm with large farm dump. Performed test pitting, soil and groundwater assessment and identified petroleum and hazardous materials within the farm dump. Coordinated with Solid Waste division to determine appropriate clean-up plan.

Corrective Action Plan Implementation, 12 Keith Avenue Redevelopment / City of Barre / 2019 / Barre, Vermont

Project engineer performing construction oversight and soil management to redevelop a former dry cleaners' location into a parking lot. Oversight during a vapor barrier installation along foundation wall of existing commercial building, encapsulation of polycyclic aromatic hydrocarbon (PAH) contaminated soils and excavation and disposal of F-Listed hazardous waste.

Corrective Action Plan Implementation, 116 Gin Lane / Caledonia Spirits / 2018-2019 / Montpelier, Vermont

Performed construction oversight during a Brownfields redevelopment project to implement a corrective action plan including polycyclic aromatic hydrocarbon (PAH) contaminated soil management and the installation of engineered barriers to prevent unacceptable exposure risks to site users. Identified a creative solution to manage excess contaminated soils on adjoining property that was also impacted by PAH due to location next to active and former railroad.

Groundwater Monitoring and Water Supply Treatment, Southern Vermont Regional Airport / Vermont Agency of Transportation / 2019 / North Clarendon, Vermont

Field lead performing quarterly drinking water supply well sampling at impacted residential properties and public community water system (PCWS) due to release of aqueous film forming foam from firefighting and firefighting

training on the Southern Vermont Regional Airport property. Support operations and maintenance of point-of-entry treatment systems using activated carbon to treat per- and polyfluoroalkyl (PFAS) in drinking water. Manage large data set and prepare deliverables to inform property owners of drinking water results.

Phase I and II Environmental Site Assessment, Former Champlain Transmission / 314 North Winooski Ave, LLC. / 2018-2019 / Burlington, Vermont

Prepared a Phase I ESA with funding from Chittenden County Regional Planning Commission through the Brownfields Assessment Grant for a former transmission repair station and identified several recognized environmental conditions (RECs). Next phase of work also funded by CCRPC included a Site-Specific Quality Assurance Project Plan (SSQAPP) and Phase II ESA. Identified chlorinated and petroleum volatile organic compounds as contaminants of concern. Redevelopment of the property includes commercial use for a turnkey tenant and corrective actions are pending redevelopment plans.

Phase I and II Environmental Site Assessment, and Interim Corrective Action, Former Middlesex Service Center / Planetary Matters, LLC. / 2017-2019 / Middlesex, Vermont

Performed Phase I ESA for a property formerly used as a retail gasoline station and automotive service repair. Identified recognized environmental conditions. Site entered Brownfields Reuse and Environmental Liability Limitation Program and subsequently a Phase II ESA was performed. Performed field sampling including vapor intrusion, indoor air and groundwater assessment. Implemented interim corrective action to prevent vapor intrusion prior to redevelopment of the property.

Corrective Action Plan, Former Ernie's Garage/561&567 North Main Street LLC/2017-2019/Barre, Vermont

Site enrolled in Brownfields Program. Completed a Corrective Action Plan (CAP) to mitigate exposure risks to site users from former use of the property as automotive garage. Corrective actions included installing a vapor intrusion barrier on the concrete slab. Facility was upgraded to be compliant with the Underground Injection Control (UIC) program by permanently closing floor drains and installing a trench drain connected to an oil/water separator.

Phase I and II Environmental Site Assessment and Supplemental Site Investigation, Dente's Property/Lawrence Holdings, LLC/2018-2019/Barre, Vermont

Performed a Phase I ESA for client as due diligence prior to purchase of the property. Site is an active hazardous waste site due to a petroleum release from an underground storage tank (UST). Site was also formerly used as a printing facility and automotive service garage.

Site Investigation and Corrective Action Plan, 120 State Street Department of Motor Vehicles/ EF Wall & Associates, Inc. / 2018-2019 / Montpelier, Vermont

Lead engineer to design and implement a Corrective Action Plan (CAP) supported by a Site Investigation (SI) for management of contaminated soils related to building upgrades at a State of Vermont public facility. Polycyclic Aromatic Hydrocarbon (PAH) contamination in soils was identified at the property. Soil management activities included proper on-site handling and off-site disposal. On-site long-term soil management included installation of physical barriers to protect site users and the public from contact with any remaining PAH impacted soils above state standards.

Onion River Campground Water System / El Nonamo, LLC. / 2018 / Plainfield, Vermont.

Performed source permitting and design for a Transient Non-Community seasonal water system. The permitting process included modifying existing drilled bedrock well by hydrofracturing and performing water quality, long term yield, and interference testing.

NEPA Environmental Assessment / Roxbury Fish Culture Station / Vermont Department of Buildings and General Services / 2017-2018 / Roxbury, Vermont

Prepared a Supplemental Environmental Assessment for the Roxbury Fish Culture Station construction project in accordance with National Environmental Policy Act. Coordinated with Vermont Fish and Wildlife, FEMA and Vermont Division for Historic Preservation.

Environmental Review/ Bolton Valley Resort and Bolton Valley Community Water and Sewer District / BVR, LLC/ 2019 - 2020 / Bolton, Vermont

Prepared an Environmental Review for a U.S. Department of Housing and Urban Development (HUD) assisted project to assess the impacts of the project on the environment and the impacts of the environment on the project, in accordance with the National Environmental Policy Act (NEPA), and all other local, state, and federal associated laws and authorities triggered by the HUD Part 58 ER. The environmental review included a Phase I and II Environmental Site Assessment.

Source Protection Plan/ Berlin Health & Rehabilitation Center Water System / 2020 / Berlin, Vermont

Delineated a groundwater source protection area for a public water supply using hydrogeologic modeling and mapping. Incorporated the source protection area into a management and contingency plan by identifying potential sources of contamination, performing public outreach to reduce risk of contamination to the public water supply and identifying alternative sources and treatment if needed. Source Protection Plan was prepared in accordance with the Vermont Water Supply Rule.

Previous Experience (Before Stone)

Phase I and II Environmental Site Assessments / Site Assessment and Remediation

Performed Phase I and II Environmental Site Assessments for a wide variety of clients and stakeholders under both state funded contracts and federal brownfields grants, and for federal regulatory agencies.

Soil Remediation / Site Assessment and Remediation

Delineated soil using X-Ray Fluorescence (XRF), direct push and incremental sampling. Designed best alternative including multi-phase extraction, excavation and chemical oxidant soil mixing. Performed operations and maintenance on remediation systems.

Groundwater Remediation / Site Assessment and Remediation

Sampled groundwater using USEPA low flow method. Designed, operated and maintained groundwater extraction and biosparging system, enhanced bioremediation, and monitored natural attenuation. Optimized groundwater monitoring well networks using statistical analysis modeling software.

Soil Vapor Remediation / Site Assessment and Remediation

Performed soil vapor sampling and pre-sampling assessments. Designed sub-slab vapor mitigation and soil vapor extraction systems using horizontal and vertical wells.

Geophysical Remediation / Site Assessment and Remediation

Imaged grave sites using ground penetrating radar and GPS real time kinetic for spatial control. Completed visual surface sweep of a military munitions response site with use of digital GPS and imaged the subsurface with electromagnetic geophysical instrumentation.

Risk Assessment

Performed human health risk assessments (HHRA) consistent with the federal Risk Assessment Guidance for Superfund. Used risk management and site-specific data to develop remediation goals. Achieved site closure based on risk.

Water System Operation

Collected potable water samples from public water systems and provided troubleshooting for contaminated systems. Completed monthly and annual reporting to maintain water system compliance. Prepared source permit for transient non-community water system.

Stormwater Management

Erosion Prevention and Sediment Control Specialist for Moretown Landfill construction activities. Performed biweekly inspections and reports.

Developed Stormwater Pollution Prevention Plans (SWPPP) in accordance with NPDES and Nationwide Permit for erosion and sediment control. Used the Revised Universal Soil Loss Equation (RUSLE), designed dewatering components and best management practices such as soil berm and stabilized haul road and used several types of erosion control products. Performed site inspections and directed maintenance.

Environmental Compliance and Waste Management

Completed Spill Prevention, Control, and Countermeasure Plans in accordance with the Oil Pollution Prevention regulation.

Complied with permits for the discharge of wastewater into a sanitary sewer. Prepared non- hazardous waste profiles and bill of ladings. Coordinated with the federal Underground Injection Control Program.

Data Evaluation Quality Control and Assurance

Project data manager using Air Force, Army and Access based platforms. Validated analytical laboratory reports.

Hydrology

Assistant to lead engineer. Developed work plan for culvert construction and validated design using creek hydrograph, Rational Method and Manning's equation, priced and ordered materials.

Conducted quarterly flow analyses using concepts of open channel hydraulics and USGS six- tenths depth method.

Performed hydraulic assessments to determine interactions of groundwater (confined and unconfined aquifers) and surface water including gaining/loosing stream classification, pump tests on gravel and bedrock aquifers and data logging groundwater elevations.

Dam safety monitoring for Waterbury Reservoir Dam Enhancement Project.

Phase I Environmental Site Assessment, NES Rentals/United Rentals/2017/Plattsburgh, New York

Performed Phase I ESA for a property used for heavy equipment rental with underground and above ground storage tanks and wash bay.

Phase I Environmental Site Assessment, Goodyear Lake Hydro-Electric Power Plant/Green Mountain Power/2016/Milford, New York

Performed Phase I ESA for a property with a hydroelectric power plant and adjacent New York State Electric and Gas (NYSEG) substation.

Phase II Environmental Site Assessment, Emery's Village Store and Deli/TD Bank/2016/Waterbury Center, Vermont

Conducted Phase II ESA for a former retail gasoline station including subsurface investigation with direct push drill rig and installation of several monitoring wells. Performed soil and groundwater samples for a suite of analyses including volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), polycyclic aromatic hydrocarbons (PAHs), and heavy metals.

Phase II Environmental Site Assessment, Norm's Automotive/Two Rivers-Ottauquechee Regional Planning Commission/2015-2016/Sharon, Vermont

Used incremental sampling methodology (ISM) to collect representative surface soil samples from decision units including the source area and several exposure areas to assist with planned site redevelopment into a Town Park with river access on the adjacent White River. Compared data to a site specific risk-based screening value assuming a hypothetical Park Visitor as the receptor.

Additional Site Investigation, Northern Petroleum Bulk Facility/Bradford Oil Company/2017/Saint Johnsbury, Vermont

Site is enrolled in petroleum cleanup fund. Conceptual site model identified two separate light non-aqueous phase liquid (LNAPL) plumes. Performed additional site investigation in northern portion of the Site using Optical Image Profiler capable of detecting and logging ultra-violet induced hydrocarbon fluorescence in the subsurface. In addition, tooling collects soil conductivity. Processed data, updated conceptual site model and depicted cross sections of LNAPL thickness at the Site.

Corrective Action Plan, Waterville Garage/ Waterville Fire District 1/2016-2017/Waterville, Vermont

Completed a corrective action plan to remediate soil and groundwater and the public drinking water supply contaminated with petroleum from several sources including a former retail gasoline station and automotive service repair. The selected corrective action technology included installing and operating a soil vapor extraction (SVE) and a

multi-phase extraction (MPE) system in addition to replacing the water line through the VOC affected area using an approved engineering plan prepared by Green Mountain Engineering.

Corrective Action Plan Implementation, Summer Street Project/Summer Street Housing Limited Partnership/2015-2016/Barre, Vermont

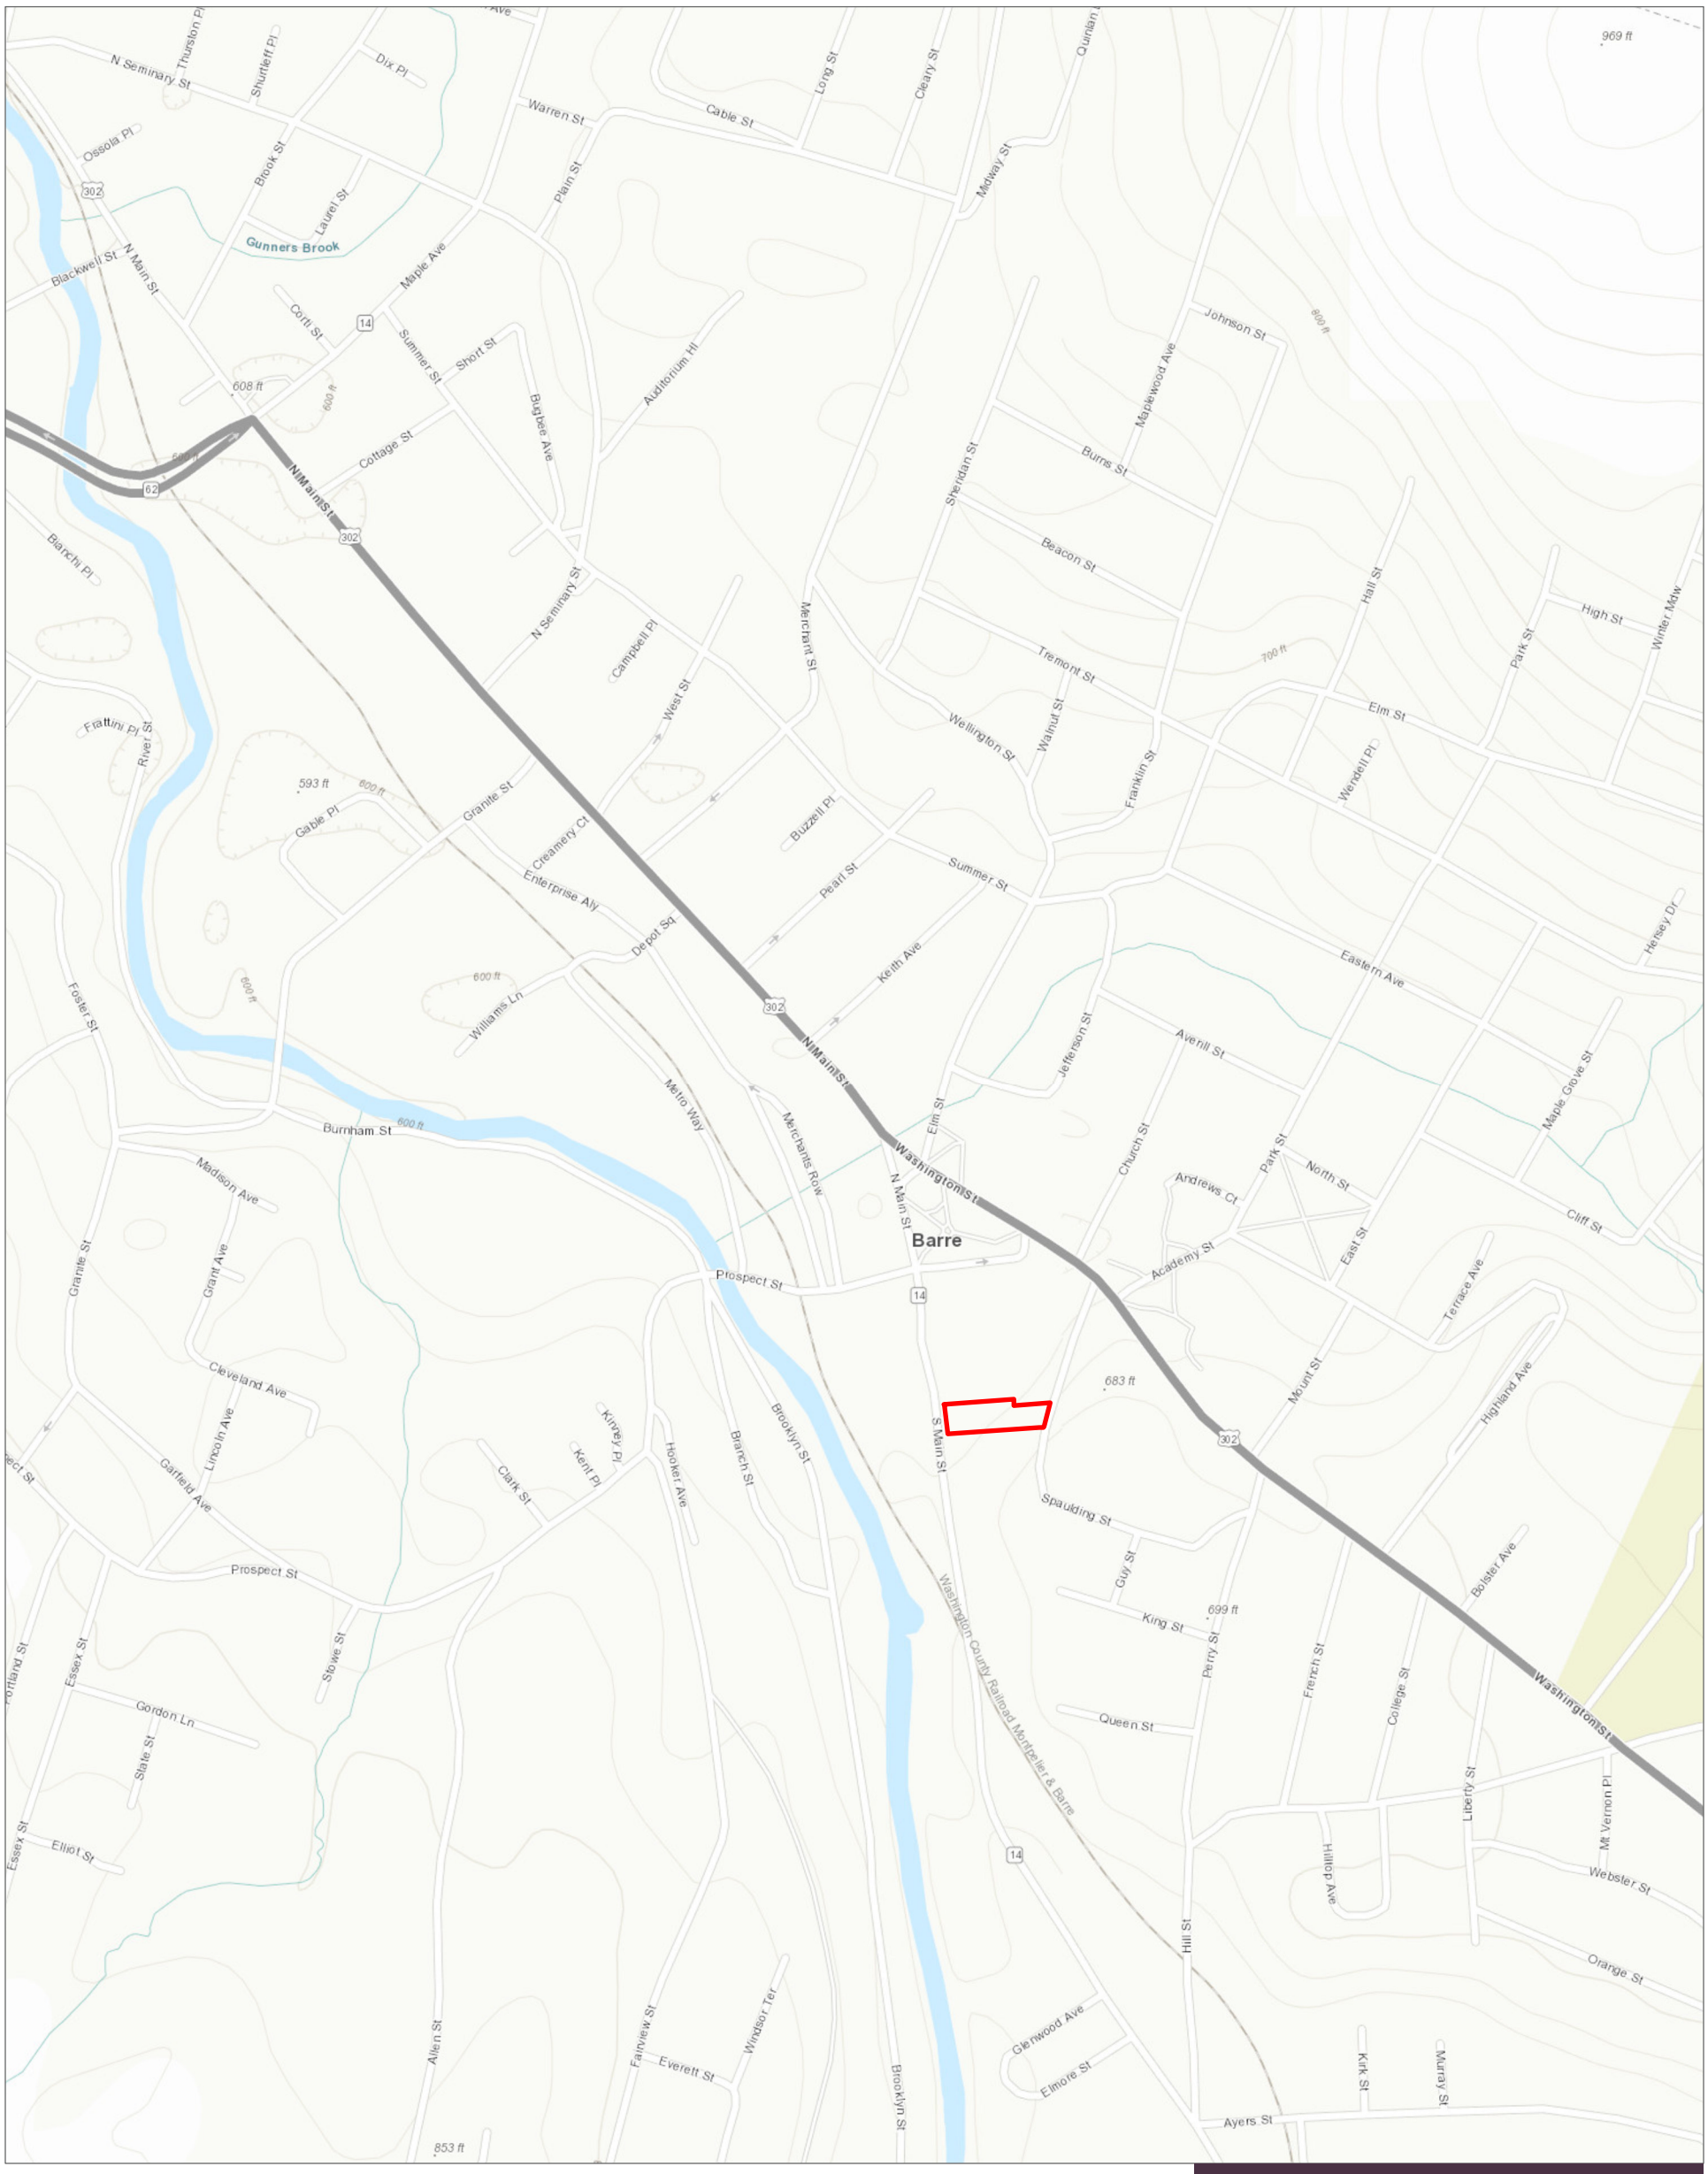

Site was enrolled in Brownfields Program and received Certificate of Completion (COC). Completed construction oversight on the excavation of contaminated soils including arsenic, chlorinated solvents and PAHs and during the installation of a sub-slab depressurization (SSD) system and vapor barrier beneath the foundation of a newly installed low-income housing apartment building. Performed operations and maintenance on the SSD system.

Remedial Design/Remedial Action, Griffiss Air Force Base/ Air Force Civil Engineer Center/ 2011-2015/ Rome, New York

Project engineer for chlorinated solvents vapor intrusion sites including SD052-01 Apron 2 Chlorinated Plume Sites (Buildings 785 and 786) and SD052-02 Building 775 Site (Building 774 and 776). Designed and operated horizontal sub-slab depressurization systems for vapor intrusion mitigation.

Phase I ESA

18 South Main Street, Barre, VT

STONE ENVIRONMENTAL

Photograph #1: Front entrance of 18 South Main Street, looking east.

Photograph #2: View of the eastern portion of the building, looking northwest.

Photograph #3: View of the fill and vent pipe to the 275-gallon AST located in the basement of the building. No staining was observed on the asphalt driveway.

Photograph #4: View of the rear parking lot of 18 South Main Street, with wooded area east of parking lot, and Tilden House located north of Subject Property.

Photograph #5: View of adjoining property to the south, located at 20 South Main Street. The property formerly operated as a Gulf Service Station and Cumberland Farms gasoline station.

Photograph #6: View of Barre Shell gasoline station located across Main Street to the west of the Subject Property.

Photograph #7: View of boiler located in the basement of the Subject Property building.

Photograph #8: View of fuel oil above-ground storage tank located in the basement of the Subject Property building. Tank appeared to be in excellent condition with no evidence of a release.

Photograph #9: Broken fluorescent bulbs from tanning beds observed in the basement of the Subject Property building.

Photograph #10: Cut-out in basement floor covered by carpeting. The cut-out was reported to be a former coal storage bin for boiler system.

Photograph #11: Residential apartment unit located on the second floor of the Subject Property building

Photograph #12: View of former hair salon space on first floor, with plumbing fixtures for sink.

Appendix B: Interview Documentation

ASTM E1527 Phase I Environmental Site Assessment
Site Owner / Site Owner Representative Questionnaire

Property:	18 South Main St, Barre	Stone Project Number:	20211145
Name:	Dave Lawrence	Company:	Stone Environmental, Inc
Signature:		Date:	7/1/2021
Relationship to Owner/Title:	Self	Interviewer:	Katrina Mattice

Please answer the questions below regarding the property identified above, to the best of your knowledge:

1) Is or has the property been used industrially? Yes / No / Unknown
   NO
2) Is or has the property been used as a vehicle body repair facility, furniture stripping facility, dry cleaning facility, gasoline station, motor repair facility, commercial printing facility, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility (if applicable, which?) Yes / No / Unknown
   No
3) Did you observe evidence or do you have any prior knowledge that any adjoining property has been used as a vehicle body repair facility, furniture stripping facility, dry cleaning facility, gasoline station, motor repair facility, commercial printing facility, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing or recycling facility (if applicable, identify which)?
   Yes / No / Unknown
   No
4) Are there currently or have their previously been any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than 5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or facility?
   Yes / No / Unknown
   No
5) Are there currently, or previously has there been, any industrial drums (typically 55 gallon) or sacks of chemicals located on the property or at the facility? Yes / No / Unknown
   No
6) Did you observe evidence or do you have any prior knowledge that fill material has been brought onto the property that originated from a contaminated site or an unknown source? Yes / No / Unknown
   No
7) Are there currently or has there previously been any floor drains, septic systems, dry wells, pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?
   Yes / No / Unknown
   No

8) Are there currently or has there previously been any registered or unregistered storage tanks above or under round located on the property? Yes / No / Unknown

No

9) Is there currently or has there previously been any evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property? Yes / No / Unknown

No

10) If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system? Yes / No / Unknown

Served by municipal system

11) Do you have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property? Yes / No / Unknown

No

12) Do you have knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property? Yes / No / Unknown

No

13) Do you have knowledge of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property? Yes / No / Unknown

No

14) Did you observe evidence, or do you have prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials have been dumped on the surface, buried and/ or burned on the property?
Yes / No / Unknown

No

15) Is there an electrical transformer, capacitor, or any hydraulic equipment at the property?
Yes / No / Unknown

No

16) If the answer to (15) is YES, are there any records indicating the presence of polychlorinated biphenyls (PCBs) in this equipment? Yes / No / Unknown

N/A

In accordance with Standard Practice ASTM E1527-13 for Phase I Environmental Site Assessments (ESAs), we are required to ask you as the property owner or a person identified as a key site manager, the following questions:

1) Please place an "X" next to each if you have or know of the existence of any of the following reports relating to the site:

- Environmental site assessment reports ☐
- Environmental compliance audit reports ☐
- Environmental permits ☐
- Underground storage tank notification forms ☐
- Registrations for underground injection systems ☐
- Safety data sheets ☐
- Community right to know plans ☐
- Safety plans, preparedness and prevention plans, spill prevention, countermeasure and control plans ☐
- Reports regarding hydrogeologic conditions on the property or surrounding area ☐
- Notices or other correspondence form any governmental agency relating to past or current violations of environmental laws ☐
- Hazardous waste generators notices or reports ☐
- Geotechnical studies ☐
- Risk assessments ☐
- Activity and use restrictions ☐

Please provide copies of each report to Stone Environmental prior to or at the time of the site visit.

1) Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?

   No

2) Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?

   No

3) Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability related to hazardous substances or petroleum products at the property?

   No

Site Description/Address: 18 South Main Street, Barre

Person Completing Questionnaire: Chip Castle

Date: June 30, 2021

Title/Relationship to Site: Barre Housing Authority

USER QUESTIONNAIRE

In order to qualify for one or more of the Landowner Liability Protections (LLPs) offered by the federal *Small Business and Brownfield's Revitalization Act of 2001*, the User of a Phase I Environmental Site Assessment should provide the following information (if available) to the Environmental Professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25).
Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local laws?

No

(2.) Activity and land use limitations that are in place on the site or that have been filed or recorded in registry (40 CFR 312.26).
Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local laws?

No

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).
As the *user* of this ESA do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

As Director of Central Vermont Council on Aging, used as office space. As Director of Barre Housing Authority, prospective purchaser of the property and performed environmental due diligence, however did not acquire property.

(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).
Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered

whether the lower purchase price is because contamination is know or believed to be present at the *property*?

Yes

(5.) Commonly known or reasonably ascertainable information about the property (40 CFR 312.30).

Are you aware of commonly known or reasonably ascertainable information about the property that you would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

(a.) Do you know the past uses of the *property*?

Yes, recently vacant for years, previously thrift shop on first floor and apartment on second floor, hair salon, tanning studio, and Council On Aging office space

(b.) Do you know of specific chemicals that are present or once were present at the *property*?

No

(c.) Do you know of spills or other chemical releases that have taken place at the *property*?

No

(d.) Do you know of any environmental cleanups that have taken place at the *property*?

No

(6.) The degree of obviousness of the presence of likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

As the user of this ESA, based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of contamination at the *property*?

No

(over)

In accordance with Standard Practice ASTM E1527-13 for Phase I Environmental Site Assessments (ESAs), we are required to ask you the following questions:

1) Please place an "X" next to each if you have or know of the existence of any of the following reports relating to the site:

- Environmental site assessment reports ☑
- Environmental compliance audit reports ☐
- Environmental permits ☐
- Underground storage tank notification forms ☐
- Registrations for underground injection systems ☐
- Safety data sheets ☐
- Community right to know plans ☐
- Safety plans, preparedness and prevention plans, spill prevention, countermeasure and control plans ☐
- Reports regarding hydrogeologic conditions on the property or surrounding area ☐
- Notices or other correspondence form any governmental agency relating to past or current violations of environmental laws ☐
- Hazardous waste generators notices or reports ☐
- Geotechnical studies ☐
- Risk assessments ☐
- Activity and use restrictions ☐

Building Inspection Report

(over)

Historic Preservation Report

Please provide copies of each report to Stone Environmental prior to or at the time of the site visit.

1) Are you aware of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property?

   No

2) Are you aware of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property?

   No

3) Are you aware of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability related to hazardous substances or petroleum products at the property?

   No

Prepared for Envirosite Corporation By:

Property Archives

Envirosite's City Directory report is a screening tool designed to assist in evaluating a subject property and possible adjacent properties resulting from past activities. It includes a search and abstract of available city directories and cross reference directories at five year intervals or the closest available intervals. Public map sources are reviewed to determine possible adjoining properties to the front, back, left and right of the property.

RESEARCH SUMMARY:

The following research sources were consulted in the preparation of this report:

SOURCE:	***YEAR:***
Property Archives	2018, 2015, 2010, 2006, 2001, 1998
Barre & Montpelier City Directory	1967, 1961, 1955, 1949, 1944, 1939, 1933, 1928, 1924, 1918, 1914, 1909, 1905, 1902

Property Archives is a proprietary and comprehensive database of over one billion commercial and residential records, business names and occupant records for every city and town in the United States. This database is owned by Property Archives, LLC.

This report was prepared by Property Archives, LLC for Envirosite Corporation

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Discovery Date :	08/01/1995
Closure Date :	09/25/2019
Site Number :	951841
Site Use :	Retail Motor Fuel
Priority :	SMAC - Site Management Activities Completed
Site Status :	Voluntary Action
Project Status :	UST gasoline release. Biennial groundwater monitoring with next round June 2014. Only one well remains above standard, and only for TMBs and naphthalene. 2018 achieved compliance with VGES in downgradient wells. Site assigned SMAC designation as NTLR for residual groundwater contamination in source area.

Date Reported :	2017-05-03
Date Closed :	2017-06-23
Spill Number :	WMD195
Report Number :	WMD195
Year :	2017
Responsible Party :	USPS
Nature of Incident :	PCS found during UST removal
Product :	N/R
Contaminants :	#2 Fuel Oil,
Quantity :	N/R
Spill Manager :	Tim Cropley
Comments :	Adjacent to a haz site.

Actions Taken :

Excavation extended in all directions. 10 cu. yds. PCS temp stockpiled on site. PID readings at extent were <1ppm. Confirmatory samples requested for VOCs by 8021B from bottom and one side wall were ND. Disposal soil sample analyzed for VOCs by 8260 due to adjacent site and TPH. No VOCs were detected and 72.1 ppm of TPH DRO was detected. 9.82 tons PCS disposed at ESMI-NH on 5/19/17. Work complete.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

BROWNFIELDS-ACRES ***(cont.)***

Former Use :

In 1884 residential structures occupied the site and sometime between 1905-1915 different uses were being established. Throughout its history the site has been host to a variety of commercial and industrial uses including an auto storage, general storage, wholesale grocers, dry cleaner, beverage bottling facility, and a recreation center. Most recently is been utilized as dry storage. Today the site consists of an approximately 0.45-acre parcel with an on-site building which is comprised of an amalgamation of multiple interconnected sub-buildings into a single structure. The various sub-building components were constructed between the mid 1900?s and the early 2000?s.

Facility Name :	Gray-Bean Residence
Facility Address :	52 Spaulding St, Barre City
County :	Washington
Discovery Date :	05/12/2006
Closure Date :	11/18/2006
Site Number :	20063533
Site Use :	Residential
Priority :	SMAC - Site Management Activities Completed
Site Status :	N/R

Project Status :

Underground storage tank closed in place. Contamination found. Investigation needed. Approved WEM workplan to conduct initial site investigation. No groundwater encountered to a depth of 32 feet below grade during isi. The highest PID reading encountered was <1 ppm. Confirmatory soil samples from the borings showed no evidence of petroleum contaminatnts. All properties in the area served by municipal water. Indoor air showed no evidence of contamination when screened with a PID.

Source of Contamination :	UST-Heating Oil
Contaminant :	Heating Oil

Facility Address :	5 Perry Street, Barre City

Date Reported :	2013-10-17
Date Closed :	2013-11-12
Spill Number :	WMD479
Report Number :	WMD479
Year :	2013
Responsible Party :	VT Dept. of Buildings and General Services
Nature of Incident :	Forest & Parks vehicle vandalized - gas tank punctured
Product :	N/R
Contaminants :	Gasoline,
Quantity :	20 Gallons
Spill Manager :	Steve Simoes

Comments :

Gasoline drained and ran across the upper parking lot to a grassy border; while some gas (minimal amount) ran to storm drain, it seemed that most was absorbed into soil. Barre's Water Department pumped the storm drain sump; a representative of that department indicated that only a minor sheen was observed on the water in the sump and that the liquid level in the sump was below the level of the outflow pipe (so no contaminants escaped). The vac truck (which already contained material removed from other storm drain clean-outs) was then emptied at Barre's wastewater treatment plant (no HW determination was made though the Water Department director Steve Micheli (802-293-4718) said that no sheen was visible at the treatment plant after the truck was emptied and no odors were detected).

Actions Taken :	Accuworx was hired to assess/remove contaminated soil at the McFarland site.

Future Use :	N/R
GP Funding Type ID :	Hazardous
Property Size :	.21
Local Parcel Number :	N/R

Former Use :

The Property is currently under the ownership of ABG Corporation. ABG Corporation is planning to sell the Property to GCD. The Site is located at an elevation of 640 feet above mean sea level (AMSL) in the City of Barre, Vermont. The terrain is relatively flat. It consists of a rectangular parcel 0.21 acres in size. The footprint of the Site building is approximately 75? by 125? and it covers most of the parcel of land. The building is known locally as the Blanchard Block, a four-story, flat-roofed, brick building with a basement and an attic. The Site is bordered by North Main Street on its eastern side and by Merchants Row on its western side. It is bordered by the Barre City Hall / Barre Opera House on its south side and by TD Bank on its north side.

Contaminant Cleaned Up-Other (Description):	N/R

Description/History :

The Property is currently under the ownership of ABG Corporation. ABG Corporation is planning to sell the Property to GCD. The Site is located at an elevation of 640 feet above mean sea level (AMSL) in the City of Barre, Vermont. The terrain is relatively flat. It consists of a rectangular parcel 0.21 acres in size. The footprint of the Site building is approximately 75' by 125' and it covers most of the parcel of land. The building is known locally as the Blanchard Block, a four-story, flat-roofed, brick building with a basement and an attic. The Site is bordered by North Main Street on its eastern side and by Merchants Row on its western side. It is bordered by the Barre City Hall / Barre Opera House on its south side and by TD Bank on its north side.

Former Use :	Site is adjacent to a railroad corridor. Site housed a building holding a fire engine and jail. Stevens Branch river corridor passed through site and was moved circa 1911. Most recently, site operated as a retail store selling hardware, grains, feed, paints, and oil. The Bonacorsi property (16 Prospect Street), a former dry cleaners, is hydraulically down gradient from the site.

Source Description

Source Description :

ACRES stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Hazardous Waste Summary
Waste Code / Name : F001 - THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
K073 - CHLORINATED HYDROCARBON WASTE FROM THE PURIFICATION STEP OF THE DIAPHRAGM CELL PROCESS USING GRAPHITE ANODES IN CHLORINE PRODUCTION.

Notices of Violations Summary
Regulation Violated : N

SHWS - VT

Facility Name : former Clark's Feed Store
Facility Address : 51 Prospect Street, Barre City
County : N/R

Discovery Date : 01/24/2017
Closure Date : N/R
Site Number : 20174694
Site Use : Vacant

Priority : LOW - Site with contamination to soils or groundwater, but no effect on sensitive receptors

Site Status : Brownfields - BRELLA

Project Status : Phase I completed. Some RECs identified including the presence of chlorinated solvents in groundwater, soil gas and indoor air from the adjacent Bonacorsi site located on 16 Prospect Street), fill material of unknown quality, and historical railroad use. Prospective purchaser had the Phase I done - is going to enter BRELLA. Additional investigation is necessary to further define contamination.

Source Description

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

HIST SPILLS - VT

Facility Name :	BankNorth
Facility Address :	36 Main St., Barre City
Date Reported :	2009-09-23
Date Closed :	2009-09-24
Spill Number :	WMD434
Report Number :	WMD434
Year :	2009
Responsible Party :	Conti Oil
Nature of Incident :	Fuel hose leak
Product :	# 2 Heating Oil
Contaminants :	Heating Oil,
Quantity :	1 Gallons
Spill Manager :	Chuck Schwer
Comments :	After making a fuel delivery to the BankNorth property, The driver was winding up the delivery hose. In the process he accidentially hit the leaver which turned on the fuel . Approximently 1/2-1 gallon was released before shutting off oil.
Actions Taken :	The driver used absorbet pads to soak up the spill. He also used absorbent powder to finish the clean up. All the product was spilled on pavement. No product went or got to a strom drain. No additonal action needed

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Facility Name :	Ormsby Property
Facility Address :	75 North Main Street, Barre City
County :	N/R
Discovery Date :	10/14/2014
Closure Date :	01/27/2017
Site Number :	20144549
Site Use :	Business
Priority :	SMAC - Site Management Activities Completed
Site Status :	Voluntary Action

Project Status :

Soil and groundwater contamination identified during the removal of a 500-gallon kerosene UST. UST removed to facilitate upgrades to the stormwater conveyance system on property. NAPL observed within excavation. Site investigation reveals NAPL in one well near source, VGES exceedance for naphthalene and associated potential for VI. Spring 2015 monitoring revealed 0.01' NAPL in one well, no VGES exceedances, and no current potential for VI. Quarterly groundwater monitoring through January 2016 shows declining concentration trends in wells to below VGES.

Source of Contamination :	Free Product Present, UST-Kerosene
Contaminant :	Kerosene, Other Petroleum

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Contaminant :	Chlorinated Solvents, Gasoline
Source of Contamination :	Dry Cleaners, Unknown
Contaminants of Concern :	PAHs, cVOCs

Project Status :

City of Barre is planning on purchasing property where currently Ormby's owns a building used for computer repair. Past uses of the property and surrounding properties include uses as a dry cleaner, auto repair shop, printing, etc. A Phase I and Phase II ESA were conducted by Stone Environmental. The Phase II included collecting soil gas samples throughout the property. Concentrations of PCE, TCE, and some petroleum compounds were detected in soil gas at levels which are in excess of screening values. Additional site characterization work will be necessary.

Former Use :

The approximately 0.67-acre downtown site is located between North Main and Summer Street within the heart of historic Barre City. Several structures have occupied the site stretching back well into the 19th century. Past uses included the Barre Steam Laundry and later Sunshine Cleaners laundromat. Buildings associated with these uses were demolished in the early 1980?s; and in more recent history a rectangular one-story structure occupied the southeast corner of the site which housed offices, storage, and repair room for Ormsby?s Computer Systems (a computer repair company).

Description/History :

The approximately 0.67-acre downtown site is located between North Main and Summer Street within the heart of historic Barre City. Several structures have occupied the site stretching back well into the 19th century. Past uses included the Barre Steam Laundry and later Sunshine Cleaners laundromat. Buildings associated with these uses were demolished in the early 1980's; and in more recent history a rectangular one-story structure occupied the southeast corner of the site which housed offices, storage, and repair room for Ormsby's Computer Systems (a computer repair company).

Source Description :

ACRES stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

HIST SPILLS - VT

Facility Name :	12 Keith Ave
Facility Address :	12 Keith Ave, Barre City
Date Reported :	2019-07-29
Date Closed :	2019-07-29
Spill Number :	WMD332
Report Number :	WMD332
Year :	2019
Responsible Party :	City of Barre
Nature of Incident :	8,000-gal HO UST found during construction
Product :	#4/#6 Fuel Oil
Contaminants :	N/R
Quantity :	N/R
Spill Manager :	Tim Cropley
Comments :	UST contained ~4,000-gals oil. Tank was pulled and numerous holes present in bottom. Product in excavation when tank removed. Noted that product found in MW 10-15ft away with unknown source.
Actions Taken :	~6-7ft of clean soil over impacted soil with GW at ~9ft bgs. Considering site work is continuing, permission was given to backfill and manage as part of the site.

Discovery Date :	06/16/2014
Closure Date :	N/R
Site Number :	20144500
Site Use :	Vacant
Priority :	MED - Site with sensitive receptors that are threatened by contamination
Site Status :	Brownfields - BRELLA

Project Status :

City of Barre is planning on purchasing property where currently Ormby's owns a building used for computer repair. Past uses of the property and surrounding properties include uses as a dry cleaner, auto repair shop, printing, etc. A Phase I and Phase II ESA were conducted by Stone Environmental. The Phase II included collecting soil gas samples throughout the property. Concentrations of PCE, TCE, and some petroleum compounds were detected in soil gas at levels which are in excess of screening values. Additional site characterization work will be necessary.

Source of Contamination :	Dry Cleaners, Unknown

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Closure Date :	11/18/2006
Site Number :	20053462
Site Use :	Residential
Priority :	SMAC - Site Management Activities Completed
Site Status :	N/R

Project Status :

Minor amount of contamination discovered during the closure of a #2 fuel oil UST. No groundwater encountered at the property during the UST closure or soil boring investigation, which reached a depth of 27 feet below grade. Soil samples taken from the bottom of each soil boring had no petroleum contaminants exceeding the EPA Region IX PRGs. Indoor air showed no evidence of petroleum vapors using a PID. All properties in the immediate vicinity are served by municipal water.

Contaminant :	Arsenic, Chlorinated Solvents, PAH
Source of Contamination :	Unknown
Contaminants of Concern :	PAHs, Arsenic, VOCs

Project Status :

site started out being called "8 and 20 Summer Street", but has been changed to be called "Barre Street Apartments". The address also changed from 8 and 20 Summer Street to 22 Keith Avenue. UPDATE: on June 29, site name was changed to Summer Street Project in an effort to avoid further confusion with the Barre Street Apartments site in Montpelier (2014-4497) Phase I and Phase II completed by ECS. Phase II completed in January, 2013. Surface soil contamination detected - PAHs and TPH. SMS responded in February 4, 2013 letter and concurred with recommendation to cap areas where contaminants were present and place a notice on the land record. A sub-slab depressurization system will also be place beneath the building at 20 Summer. Phase I and Phase II conducted on 8 Summer Street by Weston & Sampson. No contamination was found on 8 Summer.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Year :	2017
Responsible Party :	Conti Oil Company
Nature of Incident :	HO UST Overfill
Product :	N/R
Contaminants :	#2 Fuel Oil,
Quantity :	20-30 Gallons
Spill Manager :	Tim Cropley
Comments :	Fuel on soil and road. Migrated to dry catch basin. Small amount in CB (5-gals).
Actions Taken :	Speedi-dri used to cleanup impervious surfaces on 11/17 and also placed in CB to recover oil there. CB blocked/closed off and soil covered with ploy. Will use vactor to remove impacted soil and speedi-dri in CB next week.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Former Use :

Twin City Dry Cleaner operated from 1947 to circa 1964 using non-chlorinated paraffin-derived Stoddard solvent, also known as white spirit, or mineral spirits. The Stoddard solvent was reportedly stored in two UST's within the footprint of the building. Reportedly, when Howe Cleaners began operations circa 1972, use of the Stoddard solvent and associated UST's ceased and a tetrachloroethene (PCE)-based process was incorporated. Subsequent investigations however, appear to indicate that the UST's were used for storage of PCe and the former UST's are currently considered a source of soil and groundwater contamination. The two UST's were reported closed in place circa 2002. The PE process included used (dirty) cleaning liquid being boiled to separate the PCE, which was subsequently reused. The remaining liquid was reportedly discharged to the ground surface at a location on the northwestern side of the building, as was un-boiled waste liquid and pure PCe at times. The City of Barre acquired the property by negotiated purchase from the 9 Depot Square Realty Trust, John H. Fiore Trustee, on January 17, 2014. The City has sole ownership of the property.

Horizontal Reference Datum : North American Datum of 1983

Description/History :

Twin City Dry Cleaner operated from 1947 to circa 1964 using non-chlorinated paraffin-derived Stoddard solvent, also known as white spirit, or mineral spirits. The Stoddard solvent was reportedly stored in two UST's within the footprint of the building. Reportedly, when Howe Cleaners began operations circa 1972, use of the Stoddard solvent and associated UST's ceased and a tetrachloroethene (PCE)-based process was incorporated. Subsequent investigations however, appear to indicate that the UST's were used for storage of PCe and the former UST's are currently considered a source of soil and groundwater contamination. The two UST's were reported closed in place circa 2002. The PE process included used (dirty) cleaning liquid being boiled to separate the PCE, which was subsequently reused. The remaining liquid was reportedly discharged to the ground surface at a location on the northwestern side of the building, as was un-boiled waste liquid and pure PCe at times. The City of Barre acquired the property by negotiated purchase from the 9 Depot Square Realty Trust, John H. Fiore Trustee, on January 17, 2014. The City has sole ownership of the property.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Discovery Date :	06/01/1999
Closure Date :	N/R
Site Number :	992631
Site Use :	Dry Cleaners
Priority :	HIGH - Site with sensitive receptors that are affected with contamination
Site Status :	State Legal Action

Project Status :

THIS SITE HAS BEEN COMBINED WITH ENTERPRISE A. REDEVELOPMENT AREA SITE #2011-4142. Facility was a dry cleaners from 1947 to 1992. In 2002, EPA Removal Program closed in place two abandoned underground storage tanks which were underneath the building and contained evidence of stoddard solvent and PCE. In 2003, EPA Removals excavated 140 tons of PCE contaminated soil from outside the building. Indoor air treatment system was in place from March, 2001 to February, 2007. A sub-slab vapor mitigation system was also installed. Groundwater contaminant plume extents to Stevens Branch. The site building burned down in October 2008. Low levels of PCE and TCE are present in basements of some adjacent buildings. Corrective Action is necessary.

Source of Contamination :	Free Product Present, Non-Petroleum
Contaminant :	Chlorinated Solvents, Non-Petroleum
Institutional Control :	N/R

Source of Contamination : Unknown
Contaminants of Concern : PAHs, Arsenic, VOCs

Project Status :

site started out being called "8 and 20 Summer Street", but has been changed to be called "Barre Street Apartments". The address also changed from 8 and 20 Summer Street to 22 Keith Avenue. Phase I and Phase II completed by ECS. Phase II completed in January, 2013. Surface soil contamination detected - PAHs and TPH. SMS responded in February 4, 2013 letter and concurred with recommendation to cap areas where contaminants were present and place a notice on the land record. A sub-slab depressurization system will also be place beneath the building at 20 Summer. Phase I and Phase II conducted on 8 Summer Street by Weston & Sampson. No contamination was found on 8 Summer.

BROWNFIELDS - VT

Facility Name :	City Place
Facility Address :	219 North Main Street, Barre City
County :	N/R
Site Number :	20124328
Record Last Updated :	01/03/2017
Discovery Date :	09/19/2012
Site Closure Date :	05/24/2014
Site Use :	Commercial - Office
Site Status :	Brownfields - BRELLA
Brownfield Status :	Active
Institutional Control :	Easement
Priority :	COC - Certificate of Completion (Brownfields)
Contaminant :	Chlorinated Solvents, PAH
Source of Contamination :	Dry Cleaners, Manufacturing, Other, Unknown
Contaminants of Concern :	PCE, PAHs, PCBs, metals

Project Status :

Soil Vapor assessment conducted by Johnson Company in Sept. 2012 showed levels of PCE, CTC, and napthalene over the soil vapor screening levels. Source of contamination was determined to be past uses of the property and surrounding properties which included fuel storage/use, dry cleaning operations, manufacturing, and other activities which may have used, stored, and/or disposed of hazardous materials. Property has been redeveloped into an office building which includes some retail space. ECS completed CAP in November, 2012. Soil excavation, capping and installation of a sub-slab depressurization system is the remedial approach. CAP approved December 20, 2012. CAP was implemented and completed in February and March, 2013. A sub-slab depressurization system was installed and will be sampled quarterly to assure that contaminants are not entering building. A Certificate of Completion was issued in July, 2014 as well as a deed restriction.

Alias Name :	N/R
Current Use :	N/R
Future Use :	N/R
GP Funding Type ID :	Hazardous & Petroleum
Property Size :	1
Local Parcel Number :	N/R

Former Use :

Property was former coin and hobby shop, parking lot and dry cleaner or next to a former dry cleaner. Most contamination is from PCE. A phase I was performed in 2010 (cost unknownn). A partial phase II was performed by CVRPC. Additional GW sampling/monitoring is needed. Barre City is working with DEW developers to redevelop the site. Additional assessments may be performed by the City, CVRPC or the developer depending on available funding.

FED BROWNFIELDS ***(cont.)***

Did Ownership Change :	N
SFLLP fact into the ownership :	N/R
Latitude :	44.199309
Longitude :	-72.50350500000002
Horizontal Collection Method :	Address Matching-House Number
Source Map Scale :	N/R
Reference Point :	Entrance Point of a Facility or Station
Horizontal Reference Datum :	North American Datum of 1983

Description/History :

Property was former coin and hobby shop, parking lot and dry cleaner or next to a former dry cleaner. Most contamination is from PCE. A phase I was performed in 2010 (cost unknownn). A partial phase II was performed by CVRPC. Additional GW sampling/monitoring is needed. Barre City is working with DEW developers to redevelop the site. Additional assessments may be performed by the City, CVRPC or the developer depending on available funding.

Last Date in Agency List : 2021-06-18

ACRES Property ID :	156746

County :	N/R
Site Number :	20124328
Record Last Updated :	01/03/2017
Discovery Date :	09/19/2012
Site Closure Date :	05/24/2014
Site Use :	Commercial - Office
Site Status :	Brownfields - BRELLA
Brownfield Status :	Active
Institutional Control :	Easement
Priority :	COC - Certificate of Completion (Brownfields)
Contaminant :	Chlorinated Solvents, PAH
Source of Contamination :	Dry Cleaners, Manufacturing, Other, Unknown
Contaminants of Concern :	PCE, PAHs, PCBs, metals

Project Status :

Soil Vapor assessment conducted by Johnson Company in Sept. 2012 showed levels of PCE, CTC, and napthalene over the soil vapor screening levels. Source of contamination was determined to be past uses of the property and surrounding properties which included fuel storage/use, dry cleaning operations, manufacturing, and other activities which may have used, stored, and/or disposed of hazardous materials. Property has been redeveloped into an office building which includes some retail space. ECS completed CAP in November, 2012. Soil excavation, capping and installation of a sub-slab depressurization system is the remedial approach. CAP approved December 20, 2012. CAP was implemented and completed in February and March, 2013. A sub-slab depressurization system was installed and will be sampled quarterly to assure that contaminants are not entering building. A Certificate of Completion was issued in July, 2014 as well as a deed restriction.

Description/History :

Property was former coin and hobby shop, parking lot and dry cleaner or next to a former dry cleaner. Most contamination is from PCE. A phase I was performed in 2010 (cost unknownn). A partial phase II was performed by CVRPC. Additional GW sampling/monitoring is needed. Barre City is working with DEW developers to redevelop the site. Additional assessments may be performed by the City, CVRPC or the developer depending on available funding.

GP Funding Type ID :	Hazardous
Property Size :	.5
Local Parcel Number :	0465-VL00-0001

Former Use :

Twin City Dry Cleaner operated from 1947 to circa 1964 using non-chlorinated paraffin-derived Stoddard solvent, also known as white spirit, or mineral spirits. The Stoddard solvent was reportedly stored in two UST's within the footprint of the building. Reportedly, when Howe Cleaners began operations circa 1972, use of the Stoddard solvent and associated UST's ceased and a tetrachloroethene (PCE)-based process was incorporated. Subsequent investigations however, appear to indicate that the UST's were used for storage of PCe and the former UST's are currently considered a source of soil and groundwater contamination. The two UST's were reported closed in place circa 2002. The PE process included used (dirty) cleaning liquid being boiled to separate the PCE, which was subsequently reused. The remaining liquid was reportedly discharged to the ground surface at a location on the northwestern side of the building, as was un-boiled waste liquid and pure PCe at times. This site is referred to as the Vermont Granite Museum Lot. It was part of the adjacent lot owned by the Barre and Chelsea Railroad

Company, who, in 1957, sold the lot with the Depot Building on it to the Montpelier and Barre Railroad Company. During this time, the land used as part of the Enterprise Aly parking lot was leased to the City of Barre, The Pinsly Railroad Company then became the successor and interest of this lot, who, in the year 2000, sold the lot to the VGM (Vermont Granite Museum of Barre, Inc.), and continuing leasing part of the land to the City. In the year 2014, the VGM completed a boundary line adjustment to the property, retaining the Pinsly Depot building and certain lands around it, and selling to the City of Barre 0.50 acres for the Enterprise Aly parking lot. The City of Barre acquired the property by negotiated purchase from the Vermont Granite Museum of Barre, Inc., on January 20, 2014. The City has sole ownership of the property.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Site Use :	Business
Priority :	SMAC - Site Management Activities Completed
Site Status :	Voluntary Action
Project Status :	One gasoline and one diesel UST removed from the property May 1999. PID readings peaked at 110 ppm at time of removal. Four MWs installed April 2010. Samples contained no VOCs in excess of laboratory method detection limits. One sample contained TPH in excess of method detection limits, but below action level for a residential property. No sensitive receptors affected, MWs closed November 2010.
Source of Contamination :	UST-Diesel, UST-Gasoline
Contaminant :	N/R
Institutional Control :	N/R
Site Closure Date :	11/16/2010
Record Last Updated :	11/16/2010

SPILLS - VT

Facility Name :	Capital Candy Company
Facility Address :	32 Burnham Street, Barre City
Date Reported :	2020-09-08
Date Closed :	N/R
Spill Number :	WMD398
Report Number :	WMD398
Year :	2020
Responsible Party :	Capitol Candy
Nature of Incident :	Heating Oil UST leak
Product :	N/R
Contaminants :	#2 Fuel Oil,
Quantity :	unknown --
Spill Manager :	James Donaldson
Comments :	Petro contaminated soils encountered at 4-5' bgs. Test pit to GW at 10-11' reveals 50 ppmv in soils on PID. 6" water line in excavation and other site constraints prohibit significant source removal.
Actions Taken :	Soil samples collected post-removal and analyzed by 8021. Lab results ND despite corresponding field screening readings. HO ASI requested.

Former Use :

Twin City Dry Cleaner operated from 1947 to circa 1964 using non-chlorinated paraffin-derived Stoddard solvent, also known as white spirit, or mineral spirits. The Stoddard solvent was reportedly stored in two UST's within the footprint of the building. Reportedly, when Howe Cleaners began operations circa 1972, use of the Stoddard solvent and associated UST's ceased and a tetrachloroethene (PCE)-based process was incorporated. Subsequent investigations however, appear to indicate that the UST's were used for storage of PCe and the former UST's are currently considered a source of soil and groundwater contamination. The two UST's were reported closed in place circa 2002. The PE process included used (dirty) cleaning liquid being boiled to separate the PCE, which was subsequently reused. The remaining liquid was reportedly discharged to the ground surface at a location on the northwestern side of the building, as was un-boiled waste liquid and pure PCE at times. This site is comprised of a portion of the city street known as Enterprise Aly. The City of Barre acquired the property by negotiated purchase from the Montpelier and Barre Railroad Company on November 14, 1967. The City has sole ownership of the property.

Site Details

Property ID :	125023
EPA FRS ID :	N/R
EPA FRS Site Name :	N/R
Alias Name :	N/R
Current Use :	N/R
Future Use :	N/R
GP Funding Type ID :	Petroleum
Property Size :	.04
Local Parcel Number :	N/R

Former Use :

The site is to be purchased by the City of Barre within the next few weeks. The site is currently designed as a restaurant/night club however it is no longer operational. The site was previously used as a print shop, which is believed to be the source of contamination. The site is also possibly contaminated by an upgradient spill from a former drycleaner. The entire Merchants Row area is affeted by the spill from the dry cleaner.

County :	N/R
Site Number :	20114142
Record Last Updated :	02/28/2019
Discovery Date :	N/R
Site Closure Date :	N/R
Site Use :	Abandoned
Site Status :	Brownfields - BRELLA
Brownfield Status :	Active
Institutional Control :	N/R
Priority :	HIGH - Site with sensitive receptors that are affected with contamination
Contaminant :	Chlorinated Solvents, Other Petroleum
Source of Contamination :	Dry Cleaners, Floor drain/Dry well
Contaminants of Concern :	PCE, TCE, VOCs

Project Status :

Corrective Action Plan is in the process of being implemented. Significant soil excavation occurred in combination with redevelopment activities. Currently implementing insitu chemical oxidation, and soil vapor extraction is in place to manage migration of vapors from site plume to adjacent properties. The 9 Depot Square/Former Howe Cleaners site has been combined with this site, since they were essentially the same.

Contaminant :	Chlorinated Solvents, Other Petroleum
Source of Contamination :	Dry Cleaners, Floor drain/Dry well
Contaminants of Concern :	PCE, TCE, VOCs

Project Status :

Phase I completed, RECs identified and Phase II recommended. Area wide site assessment to be completed by Stone for Merchant's Row, which will include properties from Granite Street to Prospect Street. Area wide assessment completed September 30, 2011. Additional work divided into granite st - depot square, depot square - prospect street. EPA hired Nobis in Spring 2012 to conduct additional assessment work in Merchant's Row. Phase II completed December 2012 identified continued presence of PCE/TCE subsurface vapor plume and groundwater contaminant plume. Nobis developed draft CAFI/CAP dated 1/30/13 for the site.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Description/History :

Former granite sandblast facility is located in historically industrialized area of Barre. As early as the late 1800's the facility has been a granite cutting and polishing operation also. Most recent uses as a granite storage facility. The site is located in proximity to former coal gasification plant and former laundromat, both of these sites are on the Vermont Hazardous Sites List. Active rail line and former rail spur border the property. The Stevens Branch of the Winooski River is approximately 0.25 miles south of the property.

Description/History :

Former granite sandblast facility is located in historically industrialized area of Barre. As early as the late 1800's the facility has been a granite cutting and polishing operation also. Most recent uses as a granite storage facility. The site is located in proximity to former coal gasification plant and former laundromat, both of these sites are on the Vermont Hazardous Sites List. Active rail line and former rail spur border the property. The Stevens Branch of the Winooski River is approximately 0.25 miles south of the property.

Nature of Incident :	Hot water heater failed and flooded cellar causing AST filter to fail.
Product :	N/R
Contaminants :	#2 Fuel Oil,
Quantity :	10 Pounds
Spill Manager :	Steve Simoes
Comments :	RP contacted FD last evening and approved Accuworx. Water level initially as deep as 12." Water level down to a few inches at time of call to DEC.
Actions Taken :	Barre FD contacted Accuworx this a.m.; Accuworx on-scene at time of call to DEC. Water level dropping and Accuworx wants to vac before fuel oil contaminates floor surface. SS approved.
DEC Contact Email Address :	Steve.Simoes@vermont.gov
Last Date in Agency List :	2021-05-28

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Discovery Date :	09/09/2005
Closure Date :	10/31/2018
Site Number :	20063479
Site Use :	Residential
Priority :	SMAC - Site Management Activities Completed
Site Status :	Voluntary Action

Project Status :

Petroleum contam soils found during renovation work. Believed to be related to AST system. Wheeler Environmental installed monitoring wells outside- no evidence of vapors and no groundwater samples available. Approved workplan to investigate below basement slab and collect air samples.. Investigation found significant amount of contamination beneath basement, and several exceedances of risk based standards for petroleum related compounds. Wheeler suggested removal of slab and upper layer of contaminated soil in basement. SMS approved a modified workplan to install a vapor barrier and a new fiberglass reinforced 4" slab in the basement. This work has been completed. This site meets the requirements for closure, though we will be requiring a Notice to the Land Record to document contamination below the slab was never filed in 2007. In 2018, the notice was incorporated into the SMAC letter which was filed by the current owner. Site is closed.

Responsible Party :	GMP
Nature of Incident :	Transformer hit by lightning
Product :	N/R
Contaminants :	MODF (mineral oil dielectric fluid),
Quantity :	20 Gallons
Spill Manager :	Tim Cropley
Comments :	Release to gravel in substation.
Actions Taken :	ENPRO removed impacted material. No impacts beyond the fenced substation footprint. Five drums of impacted material removed for disposal.
DEC Contact Email Address :	Tim.Cropley@vermont.gov
Last Date in Agency List :	2021-05-28

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Comments :

Transfer pump switch left on at end of work day (estimated between 1330 and 1400). Evening shift showed up at some point after 2000 and immediately noted strong oil odor and called 911. Pumped at an estimated rate of 2-3 gallons per minute for 7-8 hours before release noticed. Wall-mount transfer pump utilized to fill 275-gal indoor day tank AST from 5K-gal outside UST. Pump operated via switch, which was left on. FD has not determined discharge point for sump; JD requested river inspection. Iced over at property, FD looked downstream.

Actions Taken :

FD shut down down transfer pump to stop release. Recovered approximately 55 gallons from shop floor, the rest entered sump. FD assessed brook downstream of property and noted no visible oil impacts. ASR retained for clean up and deployed boom as precautionary measure late evening. 12/22/20 update - day tank (275-gal) AST contents pumped to allow for access to "sump". Soils in sump excavated to apporx. 18" below floor grade to extents of concrete walls. No outlet piping observed and sump base appeared to be native soil. Sump determined to have been installed to facilitate the UST supply/return piping entry to building. ASR excavated all accessible impacted soils outside of building footprint. Residual soil contamination left in place under foundation. Slammer well installed in exterior excavation. Analytical soil samples collected.

Waste Code / Name : VT02 - Waste containing greater than 5% by weight petroleum distillates with melting points of less than 100 degrees F, including but not limited to kerosene, fuel oil, hydraulic oils, lubricating oils, penetrating oils, tramp oils, quenching oils, and crankcase and automotive oils which have not been exempted under Section 7-203(n), (o) and (p)

Notices of Violations Summary
Regulation Violated : N

SPILLS - VT

Facility Name : B&B Monumental Engravers
Facility Address : 25 Gable Place, Barre City

Date Reported : 2020-12-21
Date Closed : N/R
Spill Number : WMD552
Report Number : WMD552
Year : 2020
Responsible Party : B&B Monumental Engravers
Nature of Incident : Above Ground Tank overfill
Product : N/R
Contaminants : #2 Fuel Oil,
Quantity : 750 - 1000 Gallons
Spill Manager : James Donaldson

Comments :

Transfer pump switch left on at end of work day (estimated between 1330 and 1400). Evening shift showed up at some point after 2000 and immediately noted strong oil odor and called 911. Pumped at an estimated rate of 2-3 gallons per minute for 7-8 hours before release noticed. Wall-mount transfer pump utilized to fill 275-gal indoor day tank AST from 5K-gal outside UST. Pump operated via switch, which was left on. FD has not determined discharge point for sump; JD requested river inspection. Iced over at property, FD looked downstream.

Actions Taken :

FD shut down down transfer pump to stop release. Recovered approximately 55 gallons from shop floor, the rest entered sump. FD assessed brook downstream of property and noted no visible oil impacts. ASR retained for clean up and deployed boom as precautionary measure late evening. 12/22/20 update - day tank (275-gal) AST contents pumped to allow for access to "sump". Soils in sump excavated to apporx. 18" below floor grade to extents of concrete walls. No outlet piping observed and sump base appeared to be native soil. Sump determined to have been installed to facilitate the UST supply/return piping entry to building. ASR excavated all accessible impacted soils outside of building footprint. Residual soil contamination left in place under foundation. Slammer well installed in exterior excavation. Analytical soil samples collected.

HIST SPILLS - VT

Facility Name :	GDR-Formerly Morrice's Memorials
Facility Address :	110 Granite St., Barre City
Date Reported :	2011-04-29
Date Closed :	2011-05-06
Spill Number :	WMD227
Report Number :	WMD227
Year :	2011
Responsible Party :	CDR Concrete
Nature of Incident :	UST leaked oil out of lines into excavation
Product :	Heating Oil
Contaminants :	Heating Oil,
Quantity :	15 Gallons
Spill Manager :	Richard Spiese
Comments :	UST uncovered to be removed. Water got into UST and forced oil out into excavation.
Actions Taken :	RP cleaned up with pads. I called Fri. pm offering assistance. Left voice mail message. No call back. Neighbor (Todd Wells - 279-5685) took pictures and complained. He lives at 15 Grant St.).

Source Description

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring. NCDB supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Product :	N/R
Contaminants :	Gasoline,
Quantity :	2 Gallons
Spill Manager :	Steve Simoes
Comments :	Customer drove off w/out reporting. Next customer reported spill to store manager. Storm drain nearby that flows directly to Stevens Brook. SS spoke w/ ECS (Laura Woodard; 802/338-5828) and EP&S (Steve Singer) and both said that the spill was minor and full cleaned-up. ECS will f/u w/ pictures.
Actions Taken :	Store employee spread speedi-dri. CFI hired ECS and EP&S to perform clean-up. ECS ("Gregg") checked catch basin and outflow to Stevens Brook and did not observe a sheen. EP&S re-applied speedi-dri and placed boom in the catch basin.

Actions Taken :

Barre FD first on scene. Absolute and ATC are responding. ATC screened surface soil samples collected from a pothole in the pavement down gradient of the dispenser island, with a recorded PID headspace reading of 83 parts per million (ppm) and evidence of a gasoline odor and staining in soil. ATC and Absolute Spill Response hand dug down 4" at the pothole and PID screened soil again with a PID headspace reading of 0.0 ppm, ATC removed 1/8 bucket of soil from pothole. ATC backfilled the pothole with stay mat back to grade. All speedi dry, excavated soil, and extracted liquids were placed into two DOT approved 55 gallon drums and removed from site.

Report Number : WMD311
Year : 2020
Responsible Party : Cumberland Farms Inc.
Nature of Incident : contamination under dispenser during piping/equipment replacement
Product : N/R
Contaminants : Gasoline,
Quantity : unknown --
Spill Manager : Jaymi Cleland
Comments : N/R

Actions Taken :

During a tank top equipment upgrade ATC encountered contamination in association with SE dispenser. Source removal was performed down to 8 feet where readings were below standards. A confirmation soil sample was collected for 8260. No groundwater was encountered. PCS=3yrds to be sent to treatment facility ESMI. Soil confirmation sampling was ND for the most part with a Xylene hit way below VSS-Residential

Quantity :	<1 Gallons
Spill Manager :	Tim Cropley
Comments :	Customer notice gasoline vapors and reported to store personnel.
Actions Taken :	Store saw sheens spread around the lot and called FD for assistance. Speedi-dri was ineffective as the release had spread out. Some may have gotten into catch basin but there was no evidence of this when FD was on scene. FD determined less than a pint had been spilled and the wet conditions made it look worse. Speedi-dri placed in drum for proper disposal.

SPILLS - VT ***(cont.)***

Actions Taken :	During a tank top equipment upgrade ATC encountered contamination in association with SE dispenser. Source removal was performed down to 8 feet where readings were below standards. A confirmation soil sample was collected for 8260. No groundwater was encountered. PCS=3yrds to be sent to treatment facility ESMI.
DEC Contact Email Address :	Jaymi.Cleland@vermont.gov
Last Date in Agency List :	2020-12-12
Facility Name :	Cumberland Farms #4027
Facility Address :	132 South Main St, Barre City
Date Reported :	2020-04-30
Date Closed :	N/R
Spill Number :	WMD158
Report Number :	WMD158
Year :	2020
Responsible Party :	Cumberland Farms Inc.
Nature of Incident :	Spill buckets failed hydrostatic testing
Product :	likely gasoline if release
Contaminants :	N/A,
Quantity :	N/R
Spill Manager :	Jaymi Cleland
Comments :	Tanknology performed spill bucket hydrostatic testing and SBs for Tank 1 and Tank 2 failed. Tanknology indicated the SBs can be replaced without breaking concrete.
Actions Taken :	CFI will coordinate replacement. Tank Program will need to discuss with them to ensure assessment of soil under SB when removed to determine release and extent of impacts as possible. If replacing with 15-gal SBs, will need to break concrete which could allow for greater assessment of underlying soil.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

HIST SPILLS - VT

Facility Name :	Champlain Farms
Facility Address :	169 Washington Street, Barre City
Date Reported :	2017-07-17
Date Closed :	2017-07-17
Spill Number :	WMD355
Report Number :	WMD355
Year :	2017
Responsible Party :	Wesco, Inc/Champlain Farms
Nature of Incident :	Failed Shut-off
Product :	N/R
Contaminants :	Diesel,
Quantity :	8 Gallons
Spill Manager :	Shawn Donovan
Comments :	Customer left his vehicle while pump was on, failed shut off resulted in approximately 8 gallons of gasoline onto pavement. gasoline migrated down sidewalk and some ended up on the roadway.
Actions Taken :	Facility personnel put down speedy-dry, will contact haz waste hauler when it is cleaned up.

Source Description :

The NPDES module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Report Number :	WMD320
Year :	2009
Responsible Party :	Champlain Oil Co
Nature of Incident :	nozzle overfill
Product :	diesel
Contaminants :	diesel,
Quantity :	5 Gallons
Spill Manager :	Tim Cropley
Comments :	Failed shut off, driver error. FD responded to contain.
Actions Taken :	SpeediDri swept up and containerized for disposal.
DEC Contact Email Address :	Tim.Cropley@vermont.gov
Last Date in Agency List :	2021-05-28
Facility Name :	Barre Jiffy Mart
Facility Address :	360 North Main Street, Barre City
Date Reported :	2017-01-10
Date Closed :	2017-01-10
Spill Number :	WMD016
Report Number :	WMD016
Year :	2017
Responsible Party :	Champlain Oil Co/Jiffy Mart
Nature of Incident :	LUST Closure
Product :	N/R
Contaminants :	Gasoline,
Quantity :	N/R
Spill Manager :	Tim Cropley
Comments :	During removal of USTs, gasoline contamination found in groundwater at 11ft bgs at 1,100ppm at southern end of UST. There was standing water in a UST. Dispensers and diesel UST still to be removed so there may be more detail provided at that time. No LNAPL observed.
Actions Taken :	KAS to report back regarding their findings as needed as they continue the closure activities. Will call the Sites PM directly if Site has been assigned.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

HIST SPILLS - VT

Facility Name :	Barre Fastop Gulf 110-BE3
Facility Address :	377 N Main St, Barre City
Date Reported :	2017-05-12
Date Closed :	2017-05-22
Spill Number :	WMD218
Report Number :	WMD218
Year :	2017
Responsible Party :	Wesco, Inc/Champlain Farms OR JA. De Vos
Nature of Incident :	Delivery overfill
Product :	N/R
Contaminants :	Gasoline,
Quantity :	2-3 Gallons
Spill Manager :	Tim Cropley
Comments :	Passerby reported release to FD who confirmed an overfill occurred during gasoline delivery.
Actions Taken :	Driver did initial cleanup of pavement using speedi-dri. Site visit indicated some gasoline remained in spill bucket and liquid sensor in the piping sump in alarm. Wesco agreed to send tech same day to remove all liquid from the containment devices and follow-up with overfill device and hydrostatic test of spill bucket on Monday 5/15.

Date Closed :	2011-04-26
Spill Number :	WMD213
Report Number :	WMD213
Year :	2011
Responsible Party :	Wesco, Inc
Nature of Incident :	apparent vandalism to hose
Product :	gasoline
Contaminants :	Gasoline,
Quantity :	2.5 Gallons
Spill Manager :	Maria Stadlmayer
Comments :	Per Cindy Fasrland, Store MRG: apparent vandalism to hose, 2 slices in hose noted and product spraying during fueling
Actions Taken :	speedi dri and biosolve applied, swept up and put in 'hazmat barrel'
DEC Contact Email Address :	Maria.Stadlmayer@vermont.gov

Date Closed :	2007-08-22
Spill Number :	WMD361
Report Number :	WMD361
Year :	2007
Responsible Party :	Malcolm Grey
Nature of Incident :	customer drove off with hose attached
Product :	gasoline
Contaminants :	Gasoline,
Quantity :	26 Gallons
Spill Manager :	Maria Stadlmayer
Comments :	Quantity lost calculat3ed from what customer bought vs. what tank registered as lost.
Actions Taken :	Store personnel clean up with SpeediDri and swept up. One drum generated. Bio-Solve applied after cleanup.

Date Reported :	2015-11-23
Date Closed :	2019-09-09
Spill Number :	WMD610
Report Number :	WMD610
Year :	2015
Responsible Party :	Heating & More, LLC
Nature of Incident :	Above Ground Tank leak or failure
Product :	N/R
Contaminants :	#2 Fuel Oil,
Quantity :	>400 Gallons
Spill Manager :	James Donaldson

Comments :

Conti Oil delivered 474.1 gallons last Wednesday (11/18) to the uninhabited apartment building at 118 Summer Street in Barre. There are two 275-gallon ASTs in the basement that are manifolded. The property owner's HVAC technician had recently installed a new furnace and had not hooked up the fuel line, which was left open prior to fuel delivery. FO flowed out the open fuel line and onto the basement floor over time.

Actions Taken :

Remove old tanks, cleanup residual oily debris, investigate sub-slab. Approximately 211 gallons recovered to date (12/28/15) and four monitoring wells installed, one containing NAPL. Structural assessment performed to facilitate further soil and product removal. Additional monitoring/recovery wells installed; SVE piping installed in basement excavation; vapor barrier installed under new concrete floor.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Facility Name :	Consolidated Memorials
Facility Address :	112 Boynton St, Barre City
County :	Washington
Discovery Date :	02/27/2006
Closure Date :	01/18/2008
Site Number :	20063516
Site Use :	Industrial
Priority :	SMAC - Site Management Activities Completed
Site Status :	N/R

Project Status :

Contamination at this site originated from a heating oil AST release in 2006. Impacts to the nearby Jail Branch River were mitigated through the use of booms, and soil removal between the release point and the river. Recent groundwater samples taken in that area show no contaminant levels above the VGES. Monitoring wells have been properly abandoned. All properties in this area are served by the municipal drinking water system.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Report Number :	WMD542
Year :	2014
Responsible Party :	Suburban Propane or WC Heating
Nature of Incident :	Unconnected tank filled.
Product :	N/R
Contaminants :	#2 Fuel Oil,
Quantity :	254 Gallons
Spill Manager :	Matt Moran

Comments :

Delivery on 11/6/2014 and property caretaker determined tank was empty on 11/7. Appears that the heat for that unit was switched to propane last year and a valve was open at the bottom of the tank. Reportedly, Suburban delivered to the other fill pipe during last winter but delivered to the wrong one yesterday. Pipes may have been mislabeled. Unclear if one or both companies are responsible but WC Heating and Suburban Propane are working to determine.

Actions Taken :

TC requested that Suburban call a clean-up contractor. Also asked both companies contact their insurance companies so that a determination of cause can be made. ECS arrived at 4:30 pm, w/basement PID peak at 47 ppm, laundry/breezeway 13.8 ppm and 1st floor at 1.9 ppm; 2nd floor results had cigarette smoke interference. Oil had infiltrated into dirt floor basement, so this was covered with poly (8'X20' area), added and sealed ventilation fan to basement window, sealed the basement door and added poly to un-insulated basement ceiling below living space, and began running an industrial carbon air scrubber. PID levels dropped within 30 minutes and remained in single digits in basement over weekend. ECS to develop cleanup plan with Accuworx and submit Monday. Plan and approach were not approved and another contractor was contacted to get a 2nd opinion. Ultimately, Verterre was retained and plan to cap basement and utilize SVE. Part of rationale was due to sands and old foundation with no footers at risk of undermining if excavation pursued.

SHWS - VT

Facility Name :	Amsden Property
Facility Address :	62 Brooks Street, Barre City
County :	N/R
Discovery Date :	11/07/2014
Closure Date :	N/R
Site Number :	20164621
Site Use :	Residential
Priority :	HIGH - Site with sensitive receptors that are affected with contamination
Site Status :	Voluntary Action

Project Status :

254 gallons of No. 2 heating oil was delivered to wrong fill pipe by Suburban. Fill pipe went to basement of apartment where AST had been disconnected, so oil all to the dirt floor. Excavation deemed untenable due to stability of adjacent foundation. The Verterre Group covered with poly and then concrete cap. Recovery well removing oil from subsurface using state-owned SpillBuster automatic product pump. SVE system lines installed beneath concrete and may be activated as well, though vapors in indoor air were mitigated with the concrete cap.

Source of Contamination :	Above Ground Storage Tank, Spill

Site Use :	Residential
Priority :	SMAC - Site Management Activities Completed
Site Status :	Voluntary Action
Project Status :	Catastrophic loss of up to 250 gallons of heating oil from basement AST. After basement cleanout and air filtering, cleanup by SVE implemented as excavation precluded due to structural concerns. SVE removed approximately 200 gallons of product. All 6 groundwater monitoring wells below standard. No odors or PID readings in basement. Wells and SVE system closed/dismantle August 2010.

Project Status :

Tank Pull Showed Contamination. SMS requested ongoing quarterly sampling of monitoring wells on Feb. 27, 1992. Work at the site was discontinued after this request. Groundwater monitoring resumed in July of 2005. The results showed some residual contamination at concentrations slightly above the Verrmont Groundwater Enforcement Standards. The SMS offered to either close the site with a notice to the land record or continue monitoring. The decision was made to close the site. Notice is located in the Barre City Land Records, Volume 233, Page 498.

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Facility Name :	Irving Oil Bulk Plant
Facility Address :	24 Smith St, Barre City
County :	N/R

Discovery Date :	05/18/2011
Closure Date :	N/R
Site Number :	20114187
Site Use :	Bulk Storage
Priority :	MED - Site with sensitive receptors that are threatened by contamination
Site Status :	N/R
Project Status :	Out-of-service heating oil UST removed. Subsurface impacts found. ISI performed for that and former AST area. Additional borings/MWs installed to determine degree and extent of contamination and LNAPL. Approval given to develop WP/CE for source removal and regrading area. Routine monitoring ongoing.
Source of Contamination :	Above Ground Storage Tank, UST-Heating Oil
Contaminant :	Heating Oil
Institutional Control :	N/R

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

SHWS - VT

Facility Name :	Bellavance Trucking
Facility Address :	5 South Vine St, Barre City
County :	Washington
Discovery Date :	08/01/1991
Closure Date :	N/R
Site Number :	911078
Site Use :	Business
Priority :	MED - Site with sensitive receptors that are threatened by contamination
Site Status :	N/R
Project Status :	Ongoing monitoring being conducted at property to track contamination from two former 10,000-gallon gasoline USTs. It appears that contamination is confined within the property boundaries. No significant contamination detected in adjacent river. Biennial groundwater sampling - next sampling is scheduled for Spring 2018.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Number of Containers :	1
Type of Container :	Metal drums, barrels, kegs
Handling Method :	Incineration, heat recovery, burning
Specific Gravity :	01.00

HIST SPILLS - VT

Facility Name :	North End Deli 114 BE4
Facility Address :	475 North Main St., Barre City
Date Reported :	2012-12-11
Date Closed :	2012-12-17
Spill Number :	WMD604
Report Number :	WMD604
Year :	2012
Responsible Party :	Wesco, Inc
Nature of Incident :	Dispenser piping leak
Product :	N/R
Contaminants :	Gasoline,
Quantity :	unk --
Spill Manager :	Jaymi Cleland
Comments :	N/R

Actions Taken :

Wesco service technicians found and replaced a leaking flex connector in one of the dispensers. The dispensers are not equipped with sumps, so everything that leaked soaked into the ground. From what we know at this stage, this appears to be the most likely source of the release. There is a storm drain immediately adjacent to the leaky dispenser, but there were no noticeable gasoline vapors in the storm drainage system. The municipal sewer system runs approximately 10 feet below the street, and it had very high vapor levels. We did not have a PID, but the Barre fire department had a 4-gas meter. That meter registered 17% LEL in the manhole closest to the North End Deli Mart, and 5% LEL at the next downstream manhole (approx 300 feet away). The public works department is ventilating the sewer main.

Project Status :

Wesco service technicians found and replaced a leaking flex connector in one of the dispensers. The dispensers are not equipped with sumps, so everything that leaked soaked into the ground. From what we know at this stage, this appears to be the most likely source of the release. There is a storm drain immediately adjacent to the leaky dispenser, but there were no noticeable gasoline vapors in the storm drainage system. The municipal sewer system runs approximately 10 feet below the street, and it had very high vapor levels. We did not have a PID, but the Barre fire department had a 4-gas meter. That meter registered 17% LEL in the manhole closest to the North End Deli Mart, and 5% LEL at the next downstream manhole (approx 300 feet away). The public works department is ventilating the sewer main. Remedial actions performed in 2013/2014 include groundwater recovery and treatment and soil vapor extraction. Both remedial systems shut down as of July 2014. Groundwater monitoring performed 2x in 2014 shows VGES exceedances on-site and across Main Street. Semi-annual sampling in 2015 and 2016 shows declining trend both on- and off-site. Sampling frequency reduced to annual starting in 2017; continues through 2019.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

FEDERAL RCRA NON-CORRACTS TSD FACILITIES LIST

ARCHIVED RCRA TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 04/13/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 07/09/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 04/13/2021

RCRA_TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 04/13/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 07/09/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 04/13/2021

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/25/2013
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 05/11/2021

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/29/2013
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 05/11/2021

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 02/12/2021
Agency Update Frequency: Varies
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8712
Most Recent Contact: 05/11/2021

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 02/12/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 05/11/2021

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 02/12/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 05/11/2021

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 04/13/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 07/09/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 04/13/2021

HIST CORRACTS 2: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 09/03/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 06/08/2021

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 02/12/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 05/11/2021

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Agency Version Date: 02/12/2021
Agency Update Frequency: Quarterly
Planned Next Contact: 08/06/2021
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 05/11/2021

SOIL COMPOSITION IN GENERAL AREA OF SUBJECT PROPERTY:

Agency source: Soil Conservation Service, US Department of Agriculture

SOIL MAP ID 1

USDA Soil Name	Nicholville,Taxadjunct
USDA Soil Texture	Silt loam
Hydrologic Soil Group	B/D
Soil Drainage Class	Moderately well drained
Hydric Classification	2
Corrosion Potential - Uncoated Steel	High

Layer	Depth (inches)	Soil Texture	AASHTO Group	Unified Soil Description	Saturated Hydraulic Conductivity micro m/sec	Soil Reaction pH
1	0-8	Silt loam	Silt-Clay materials (more than 35% passing NO. 200), silty soils. Reference: This is a classification of soil material for highway and airfield construction (Procedure M 145-73 in Am. Assoc. of State Highway and Transportation Officials, 1984.	FINE-GRAINED SOILS, Silts and clays, (liquid limit is less than 50%), Silt. Reference: This is a classification of soil material designed for general construction purposes. It is dependent on the particle size distribution of the <75 mm, the liquid limit, and the plasticity index and on whether the soil material is high in organic matter (ASTM test D 2487, in ASTM, 1984).	4.2333-14.1111	4.5-6
2	8-14	Silt loam	Silt-Clay materials (more than 35% passing NO. 200), silty soils. Reference: This is a classification of soil material for highway and airfield construction (Procedure M 145-73 in Am. Assoc. of State Highway and Transportation Officials, 1984.	FINE-GRAINED SOILS, Silts and clays, (liquid limit is less than 50%), Silt. Reference: This is a classification of soil material designed for general construction purposes. It is dependent on the particle size distribution of the <75 mm, the liquid limit, and the plasticity index and on whether the soil material is high in organic matter (ASTM test D 2487, in ASTM, 1984).	4.2333-14.1111	4.5-6
3	14-65	Silt loam	Silt-Clay materials (more than 35% passing NO. 200), silty soils. Reference: This is a classification of soil material for highway and airfield construction (Procedure M 145-73 in Am. Assoc. of State Highway and Transportation Officials,	FINE-GRAINED SOILS, Silts and clays, (liquid limit is less than 50%), Silt. RTC Enforcement ID :	910218
Violation ID :	405024
Submission Year :	2020
Violation First Reported Date :	2017-08-21
Contaminant Name :	Tetrachloroethylene
Rule Family :	Volatile Organic Chemicals
Rule Group :	Chemicals
Rule Name :	Volatile Organic Chemicals
Violation Type :	Monitoring, Regular
Is Health Based :	N
Is Major Violation :	Y
Severity Indicator Count :	N/R
Public Notification Tier :	3
Address Line 1 :	BARRE, 05641
Address Line 2 :	125 NELSON ST
Compliance Status :	Returned to Compliance
RTC Date :	2018-05-03
Enforcement Action Description :	State no longer subject to Rule

Note: Zone 1 indoor average level > 4 pCI/L

: Zone 2 indoor average level > = 2 pCI/L and <= 4 pCI/L

: Zone 3 indoor average < 2 pCI/L

HIST PWS ENF
Historical Public Water Supply locations with Enforcement Violations
Environmental Protection Agency
(800) 426-4791
List of Safe Drinking Water Information Systems (SDWIS) with enforcement violations that are no longer in current agency list.

NWIS
National Water Information Systems
United States Geological Society
(703) 648-5953
Information on all water resources for the United States. This database contains all current and historical data for the nation.

PWS
Public Water Supply
Environmental Protection Agency
(800) 426-4791
Safe drinking water information Systems

PWS ENF
Public Water Supply locations with Enforcement Violations
Environmental Protection Agency
(800) 426-4791
Safe drinking water information Systems with enforcememnt violations

FLOOD Q3
Flood data
Environmental Protection Agency
(202) 566-1667
Q3 Flood Data

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

WETLANDS NWI
National Wetland Inventory
U.S. Fish and Wildlife Service
(703) 358-2171
Wetland Inventory for the United States

WETLANDS - VT

EPA list of Radon zones

AIRPORT FACILITIES
Airport landing facilities
Federal Aviation Administration
(866) 835-5322
Airport landing facilities

BASINS
Better Assessment Science Integrating point & Non-point Sources
U.S. Environmental Protection Agency
855-246-3642
Integrated geographical information system national watershed data and environmental assessment known as Better Assessment Science Integrating point & Non-point Sources

DIGITAL OBSTACLE
Obstacles of interest to aviation users
Federal Aviation Administration
855-379-6518
The Digital Obstacle File describes all known obstacles of interest to aviation users in the U.S. with limited coverage of the Pacific the Caribbean Canada and Mexico. The obstacles are assigned unique numerical identifiers; accuracy codes and listed in order of ascending latitude within each state or area by FAA Region.

EPICENTERS
National Geographical Data Center
National Geographical Data Center
303-497-6826
List of recent and historic earthquakes and information.

FLOOD DFIRM
National Flood Hazard Layer Database
Federal Emergency Management Agency
The National Flood Hazard Layer Database (NFHL) is a computer database that contains the flood hazard map information from FEMAs Flood Map Modernization program. These map data are from Digital Flood Insurance Rate Map (DFIRM) databases and Letters of Map Revision.
