Executive Summary

Vanasse Hangen Brustlin, Inc. ("VHB") was retained by Jessica and Seiji Ohashi (the "Client") to conduct a Phase I Environmental Site Assessment ("Phase I ESA") of the Capital Cleaners building located at 9 Main Street, Montpelier, Vermont, hereinafter referred to as the "Site". The Site is an approximately 0.14-acre parcel of land with an associated building that is situated near downtown Montpelier and currently operates as Capital Cleaners. VHB understands that the purpose of this Phase I ESA is to provide environmental due diligence in support of the potential purchase of the Site.

This Phase I ESA has been completed using the American Society of Testing and Materials ("ASTM") E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (the "Standard") and the All Appropriate Inquiries ("AAI") Final Rule at 40 CFR Part 312 as guidance.

The objective of this Phase I ESA is to identify Recognized Environmental Conditions ("RECs") in connection with the Site. RECs are defined in the Standard as "*the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment*.

The Client is the sole User of this Phase I ESA. Pursuant to Section 3.2.98 of the Standard, "the User has specific obligations for completing a successful application of this practice as outlined in section 6" of the Standard.

The Phase I ESA should be read in its entirety to gain a comprehensive understanding of the findings presented in this Executive Summary.

Recognized Environmental Conditions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 for 9 Main St, Montpelier, Washington County, VT, the property. Any exceptions to, or deletions from, this practice are described in Section 8.1 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property except for the following:

REC#1 – Existing Fuel Oil Underground Storage Tank ("UST")

A 550-gallon, out of service fuel oil UST ("UST-1") that was installed in approximately 1992 is present at the Site. According to Mr. DeNoia, UST-1 is currently empty and is no longer in use due to a

malfunctioning vent whistle. While no evidence or record of past releases of fuel oil from UST-1 were identified, releases from USTs and their associated piping are common and thus it is possible that UST-1 may have adversely impacted environmental conditions at the Site.

> Opinion: Although no releases from UST-1 have been identified, it is possible that a release of fuel oil to the subsurface may have occurred that has not been detected. Thus, it is the Environmental Professional's Opinion that the out of service 550-gallon UST represents a REC. If additional information regarding the environmental conditions at the Site is desired, laboratory analysis of samples could be conducted. It should also be noted that in accordance with the DEC *Underground Storage Tank Rules*, dated October 26, 2020, any UST that is out-of-service for more than one year must be decommissioned in accordance with the rule.

REC#2 – Former USTs (UST-2 through UST-6)

VHB reviewed documentation indicating that up to five additional USTs were used at the Site to store fuel oil, gasoline, and waste oil (UST-2 through UST-6) throughout its history. While information was reported that gasoline USTs (UST-3 and UST-4) may no longer be present on-Site (Wheeler 2003), no documentation regarding any tank removals or the conditions of any of these additional tanks was identified during VHB's review of available information.

> Opinion: Although no releases have been identified from UST-2 through UST-6, it is possible that a release to the subsurface from one or multiple of these tanks may have occurred that was not detected or reported. Thus, it is the Environmental Professional's Opinion that UST-2 through UST-6 represent a REC. If additional information regarding the environmental conditions at the Site is desired, an underground utility location reconnaissance and laboratory analysis of samples could be conducted.

REC#3 – Historical Site Uses

Throughout its history, the Site has hosted many industrial and commercial uses including coal storage areas associated with an adjacent railroad corridor, a gasoline filling station and auto maintenance garage, and dry-cleaning businesses. Due to the likely use and storage of various chemicals and hazardous materials at the Site in connection with these uses it is possible that incidental and undocumented releases may have occurred.

> Opinion: Due to the various historical uses at the Site it is possible that past releases may have adversely impacted environmental conditions at the Site. Thus, it is the Environmental Professional's Opinion that historic property uses at the Site represents a REC. If additional information regarding the environmental conditions at the Site is desired, laboratory analysis of samples could be conducted.

REC#4 – Historical Nearby Uses and Hazardous Waste Sites

Based on the information available for review regarding nearby properties, VHB has identified multiple hazardous waste sites that exist adjacent to and surrounding the Site. Additionally, the Site is located in a heavily commercialized and industrial area.

Opinion: While it does not appear that subsurface impacts have been documented that are migrating towards the Site, there is a possibility that past releases from these nearby properties may have adversely impacted environmental conditions at the Site due to the proximity of these properties to the Site, the partially undefined nature and extent of impacts, and the historically industrial and commercial nature of these nearby properties.

Vapor Encroachment Conditions ("VECs")

A VEC is the presence or likely presence of COC vapors in the vadose zone of the Site caused by the release of vapors from contaminated soil or groundwater either on or near the target property. Based on the findings noted above within the four RECs, there is potential that volatile COCs could impact environmental conditions at the Site, thus VHB has concluded that:

- A 550-gallon fuel oil UST (UST-1) is currently present and unused at the Site
- Historical uses at the Site have included the use and storage of OHM and records indicate that up to six different tanks and likely USTs were used to store gasoline, fuel oil, and waste oil at the Site.
- Multiple releases of OHM have occurred at nearby properties that may pose a risk to contaminated vapor migration.

Therefore, VHB has concluded that a VEC exists at the Site in connection with the four RECs detailed in Section 7.1.

Data Gaps

VHB identified one data gap at the Site during the course of this Phase I ESA. The Environmental Professional's assessment as to whether these data gaps are considered significant is outlined below.

Data Gap	Assessment
As of the date of this report, VHB has not received information regarding its inquiry to the Montpelier Fire Department or Building & Zoning Departments	Based on the available information reviewed regarding the Site's history, VHB does not consider the lack of responses to constitute a significant data gap.

1

Introduction

1.1 Purpose and Scope of Work

Vanasse Hangen Brustlin, Inc. ("VHB") was retained by Jessica and Seiji Ohashi (the "Client") to conduct a Phase I Environmental Site Assessment ("Phase I ESA") of the former Capital Cleaner property located at 9 Main Street, Montpelier, VT, hereinafter referred to as the "Site" as shown on **Figure 1**. It is VHB's understanding from the Client that the purpose of this Phase I ESA is to provide environmental due diligence in support of the potential purchase of the property

This Phase I ESA has been completed using the American Society of Testing and Materials ("ASTM") E 1527-13, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (the "Standard") and the All Appropriate Inquiries ("AAI") Final Rule at 40 CFR Part 312 as guidance.

Jessica and Seiji Ohashi are the Users of this report as defined by the Standard. Pursuant to Section 3.2.98 of the Standard, "the User has specific obligations for completing a successful application of this practice as outlined in Section 6" of the Standard. This Phase I ESA is subject to the terms of the agreement between VHB and the Client. Other than those limitations expressly provided in **Appendix A** and/or specified in Section 8, completion of the Phase I ESA was not subject to additional assumptions, limitations, or exceptions to the Standard.

The objective of this Phase I ESA is to identify, to the extent feasible pursuant to the process described in the Standard, Recognized Environmental Conditions ("RECs") in connection with the Site. The Phase I ESA was completed following the Standard as guidance. RECs are defined in the Standard as "*the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions"* and are defined by Section 3.2.22 of the Standard as *"a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."*

A Controlled REC is a REC "resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority…with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)."

Historical RECs are *"a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls."*

Per the agreement between VHB and the Client, the scope of services to complete this Phase I ESA consisted of the following main components:

- an inquiry by an "Environmental Professional" as defined by the Standard;
- interviews with past and present owners, operators, and occupants, or abutters if the property is abandoned, in an effort to gather any specialized knowledge or experience with regard to the subject property;
- a review of historical sources, including, but not limited to, chain of title documents, aerial photographs, building department records, and land use records to determine previous uses and occupancy since first development;
- searches for recorded environmental cleanup liens against the facility that are filed under federal, state or local law;
- a review of federal, state, or local government records; and
- a visual inspection of the facility and surrounding properties.

The scope of the Phase I ESA did not include any environmental testing or sampling of soil, water, air, or soil vapor.

1.2 User Reliance

This Phase I ESA was completed solely for the Client and the Users, subject to the terms, conditions and limitations referenced herein and as issued in connection with the Agreement and the provisions thereof. Any use or reliance upon information provided in this report without the specific written authorization of the Client and VHB shall be at such party's sole risk.

2

Site Description

2.1 Site Location, Ownership, and Description

The Site consists of a small asphalt parking area and a structure on a concrete slab which currently operates as Capital Cleaners, a drop off location for Dry Cleaning by DeNoia's Dry Cleaners Specific Site information, collected from the Montpelier City Clerk's office as well as from the Agency of Natural Resources ("ANR") Natural Resources Atlas, is summarized in the table below.

Parent Parcel Description			
Address	**Parcel ID**	**Current Owner**	**Parcel Size (in acres)**
9 Main Street	095-009000 SPAN 405-126-10287	Nicholas DeNoia	0.14

A Site Location Map showing the location of the Site is provided as **Figure 1**, a Site Plan depicting the Site and relevant Site features is included as **Figure 2**, and a Site Vicinity Map showing the vicinity of the Site and nearby sensitive receptors is provided as **Figure 3.** The approximate center of the Site is located at 44˚ 15' 0.03'' north latitude and 72˚ 34' 35.57'' west longitude.

2.2 Site and Vicinity General Characteristics

The Site is located in an urban area in Montpelier, VT and can be accessed via Main Street or Barre Street. The topography of the Site is generally flat. The closest named surface water is the Winooski River located approximately 150-feet to the southwest of the Site. Additional information on the physical setting of the Site and nearby area is presented in Section 4.1.

2.3 Description of Structures, Roads, and Other Site Improvements

The Site contains a single slab on-grade brick building located in the center of the Site. This building previously hosted a gasoline station and its associated maintenance garage, but underwent renovation to support its use as a dry-cleaners drop of location in the 1980s. This building is currently heated with a fuel oil fired forced hot air

furnace. According to the current Site owner, all historic heating systems at the Site were also fuel oil fired furnaces. Fuel oil at the Site is currently stored in an interior 275-gallon above ground storage tank ("AST"), and has previously been stored in an out of use 550-gallon underground storage tank ("UST") located to the east of the building. According to a May 2003 Phase I ESA conducted at the Site this UST replaced a prior 550-gallon fuel oil UST (see Section 4.2).

The Site is connected to the municipal water and sewer systems that are owned and operated by the Montpelier Department of Public Works.

2.4 Current Uses of Adjoining and Surrounding Properties

The table below presents the properties and features surrounding the Site:

Direction	Adjoining	Surrounding
North	› Barre Street › Residential Apartments › Art Gallery › Launderama Coin-op Laundromat (SMS #19890413)	› Various Commercial Storefronts › Downtown Montpelier › Winooski River North Branch
East	› Restaurant (Buddy's Famous) › Barre Street	› Residential properties › Commercial Storefronts › Blanchard park
South	› Former Railroad corridor › Bank › Commercial Storefronts	› Restaurant (Sarducci's) › Commuter Bike Path › Winooski River
West	› Main Street › Former Railroad Corridor › Grocery Store	› Winooski River › Jacob's Property (SMS #931478).

3

User Provided Information

To qualify for one of the Landowner Liability Protections offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the User(s) and/or Grantee(s) or a party on behalf of the User(s) and/or Grantee(s) must collect the following information, if applicable, and should make the information available to the Environmental Professional upon request:

- Environmental cleanup liens that are filed or recorded against the property;
- Activity and land use limitations that are in place on the property or that have been filed or recorded in a registry;
- Specialized knowledge or experience of the person seeking to qualify for the Limited Liability Protections;
- Relationship of the purchase price to the fair market value of the property if it were not contaminated;
- Commonly known or reasonably ascertainable information about the property;
- The degree of obviousness of the presence or likely presence of contamination at the property and the ability to detect the contamination by appropriate investigation.

VHB provided the User Questionnaire to Jessica and Seiji Ohashi, the Clients, and prospective purchasers of the Site, which specifically requests information related to each of the six items listed above. Information obtained from User Questionnaire responses have been incorporated throughout this report. The completed questionnaires have been included as **Appendix H** of this report.

4

Records Review

VHB conducted a review of environmental databases and municipal files to identify potential environmental concerns at the Site. This review also included properties in the vicinity that have had a release or pose a threat of release of oil and/or hazardous materials ("OHM") that may potentially impact the quality of environmental media at the Site. VHB reviewed Federal and state environmental databases supplied by Environmental Data Resources, Inc. ("EDR"). VHB also conducted a targeted review of files available from the Vermont Department of Environmental Conservation ("DEC"). The results of the records review are summarized below.

4.1 Physical Setting

VHB reviewed several sources of information pertaining to the Site's physical setting to better understand natural characteristics of the Site and surrounding area as summarized below

4.1.1 Topography

Topography of the Site and surrounding area are generally flat with an average elevation of approximately 522-feet above mean sea level.

4.1.2 Soils/Surficial Geology

According to the EDR report the soils at the Site are mapped by the U.S. Department of Agriculture's Soil Conservation Service as Udipsamments, which consists of coarse-grained soils, sands, clean sands, and poorly graded sand. This soil type is not classified within a hydrologic group.

4.1.3 Bedrock Geology

According to the Bedrock Geologic Map of VT (Ratcliffe, et al., 2011), the bedrock at the Site is mapped as carbonaceous phyllite and limestone, which consists primarily of Dark-gray to silvery-gray, lustrous, carbonaceous muscovite-biotite-quartz phyllite containing abundant beds of punky-brown-weathering, dark-bluish-gray micaceous quartz-rich limestone in beds ranging from 10 cm to 10 m thick.

4.1.4 Groundwater

Groundwater flow is best determined using site-specific groundwater elevation data and may be affected by surface topography, hydrology, and characteristics of the soil and nearby wells. No site-specific groundwater flow data was provided for the Site. In the absence of site-specific data, other sources of information are typically used to determine flow direction including surface topographic information and hydrogeologic information collected from nearby properties. Based on a review of available information, regional groundwater flow is presumed to be generally to the southwest, towards the Winooski River and the North Branch of the Winooski River approximately 150 feet to the southwest of the Site. However, groundwater flow directions in this area may vary locally due to the presence of subsurface utilities or historical fill materials in the area. These groundwater flow directions may further vary seasonally due to the presence of a dammed area of the Winooski River to the southwest of the Site.

According to the EDR report, 1 public water supply well is located approximately 600 feet to the north of the Site. Additionally, one private well is located approximately 200 feet to the southeast of the Site. According to the ANR Natural Resources Atlas Site Vicinity Map provided as **Figure 3**, the Site is not located within a groundwater or surface water Source Protection Area ("SPA").

4.1.5 Wetlands

According to the ANR Natural Resources Atlas Site Vicinity Map provided as **Figure 3**, no Class II Wetlands were mapped on the Site in the Vermont Significant Wetland Inventory.

4.1.6 Surface Water

The closest named surface water body is the Winooski River located approximately 150 feet to the southwest of the Site. In the area of the Site, the Winooski River flows generally to the west. Approximately 360 feet to the west of the Site the North Branch of the Winooski River joins the main stem of the Winooski River, which flows to the northwest and eventually discharges to Lake Champlain.

4.1.7 Flood Plains

According to the Flood Insurance Rate Map ("FIRM") for Montpelier, VT dated March 19, 2013 (Map Number Map 50023C0264E), the Site is located within Zone X, defined as an area with 0.2% annual chance of flood hazard. The National Flood Hazard Layer FIRMette is included as **Figure 4.**

4.2 Prior Environmental Investigations

During this Phase I ESA, VHB reviewed one prior environmental investigation that had occurred at the Site and is described below.

May 2003 Phase I ESA

In May 2003, a Phase I ESA was performed at the Site on behalf of Union Bank by Wheeler Environmental Services, LLC (Wheeler, 2003). This Phase I ESA did not identify any RECs present at the Site. In 2003, one 550-gallon fuel oil UST was present to the east of the building and according to the owner at the time, had been installed between approximately 1990 and 1992. As described in Section 5.3, this 550-gallon fuel oil UST was still present at the Site

during VHB's March 2021 Site reconnaissance ("UST-1"). Additionally, the May 2003 Phase I ESA indicated that extra fill and vent pipes were observed in the area of UST-1, that were previously connected to a 550-gallon fuel oil UST ("UST-2") that was removed from the Site and replaced with UST-1. VHB also observed these additional pipes during their March 2021 Site Reconnaissance as described in Section 5.3 and identified in the Phase I ESA photolog included as **Appendix J**.

The 2003 Phase I ESA also included a *December 2002 Gasoline UST Investigation Report* that described an investigation by Wheeler Environmental Services, LLC to determine if any unknown USTs remained onsite that were associated with the Site's former use as a gasoline filling station and automotive repair business. In December 2002, On-Target Locating Services screened the property for evidence of USTs using a Metrotech 9860XT magnetic locator and interviewed various personnel regarding the history of the Site. This 2002 *Gasoline UST Investigation Report* did not yield any evidence of additional USTs at the Site.

VHB identified through a historical records review, further described in Section 4.4.2, that several UST's (UST-3 through UST-6, defined in Section 4.4.2) existed at the Site throughout its history. While the *2002 Gasoline UST Investigation Report* suggests that buried gasoline tanks were not present on-Site, it is possible that interference between the magnetic locator that was used during the investigation and the asphalt or concrete slab may have occurred, thereby hindering the magnetic locators ability to identify a UST still in the ground. Additionally, no information or documentation of tank removals or tank conditions was documented, therefore VHB cannot rule out the possibility of a past release or future threat of release associated with UST3 through UST-6.

4.3 Standard Environmental Record Sources

EDR provided a report dated March 18, 2021, summarizing available and reasonably ascertainable information from standard environmental record sources at the minimum distances required in Section 8.2.1 of the Standard. A copy of the EDR report is provided as **Appendix C**.

Sites with minimal address information that may be located in proximity to the Site are listed separately in the database report as "Orphan sites." A review of listed Orphan sites was conducted to estimate their location, distance, and direction from the Site. Based on information contained in the EDR report and information derived from local maps, no orphan sites were identified on the Site or abutting properties.

A summary of the EDR findings is included in the table below and following sections.

Record Source	Search Radii	Subject Property Listed	Number Sites Within Search Distance
Federal National Priorities List ("NPL") Sites	1.0 mile	No	0
Federal Delisted NPL Sites	0.5 miles	No	0
Superfund Enterprise Management System ("SEMS") Sites	0.5 miles	No	1
Federal SEMS No Further Action Planned Sites	0.5 miles	No	0
Federal Resource Conservation and Recovery Act ("RCRA") Corrective Action ("CORRACTS") Sites	1.0 mile	No	0
Federal RCRA Non-CORRACTS Treatment, Storage and Disposal Sites	0.5 miles	No	0

Record Source	Search Radii	Subject Property Listed	Number Sites Within Search Distance
Federal RCRA Generators	Site & Abutting	No	17
Federal Engineering/Institutional Control Sites	Site	No	0
Federal Emergency Release Notification System	Property	No	0
State and Tribal Equivalent SEMS Sites (i.e. State Hazardous Waste Sites, Release Sites)*	1.0 mile	No	32
State and Tribal Landfill or Solid Waste Disposal Sites	0.5 miles	No	1
State and Tribal Leaking Storage Tank Sites*	*1.0 miles	No	58
State and Tribal Registered Storage Tank Sites	Site & Abutting	No	43
State and Tribal Engineering/Institutional Control Sites (i.e. Activity and Use Limitations)*	*1.0 Miles	No	0
State and Tribal Voluntary Cleanup Sites	0.5 miles	No	0
State and Tribal Brownfield Sites	0.5 miles	No	9

* For Vermont, standard search distances are extended to that of state hazardous waste sites because sites are broken out into these categories from a single database.

The EDR report provides search results of other federal, state and local databases which are not listed as *Standard Environmental Resources* in the Standard. These databases include, but are not limited to, Brownfields, Facility Indexing System ("FINDS"); Polychlorinated Biphenyl ("PCB") Activity Database ("PADS"); Toxic Chemical Release Inventory System ("TRIS"); Toxic Substances Control Act ("TSCA"); Federal Insecticide, Fungicide & Rodenticide Act ("FIFRA") and TSCA Tracking System; Section Seven Tracking System; Tier 2 data listing; dry cleaners; and manufactured gas plants. Tribal Records were also searched for this report. The Site was listed in three of these additional databases as described in Section 4.3.1. The full EDR report is included in **Appendix C**.

4.3.1 Summary of Site Records

According to the EDR report the Site was listed in the Vermont Drycleaners, EDR Historical Auto and EDR Historical Cleaner databases. As described in Section 4.6 the Site currently and historically has operated as a drop off location for a dry-cleaning business and has historically operated as a filling station and auto maintenance garage. These historical Site uses are identified as a REC as described in Section 7.1.

4.3.2 Summary of Nearby Properties of Interest

Based on preliminary information from the EDR report, certain nearby properties were deemed to require additional review to evaluate their potential to impact environmental conditions at the Site. Available records were reviewed electronically via DEC and/or other state and federal databases. Information obtained during the additional reviews is summarized below.

Mowatt Site / 12 Main Street

The Mowatt Site (Site Management Section, "SMS"# 20154615), is at 12 Main Street and is adjacent to the Site to the northwest and is currently vacant. During demolition of a small retail building at the site, 6 USTs were encountered. In 2019, a Phase II ESA was conducted, and COCs including polycyclic aromatic hydrocarbons ("PAHs") and lead were found in soils, and naphthalene, trimethylbenzene, ethylbenzene, arsenic and lead were found in groundwater. Groundwater at this site was found to flow generally to the northwest, away from the Site. This Phase II ESA found that soils and groundwater were most predominantly impacted at the southeast corner of the former building, which is the closest sampling location to the Site. The full extent of impacts along the southern boundary of the Mowatt Site was not identified in the Phase II ESA. A Corrective Action Plan ("CAP") was developed for the site in June 2020 and implemented in the summer of 2020 that involved the installation of engineered barriers to properly isolated impacted soils at this site.

FGB Launderama / 8 Barre Street

The property located at 8 Barre Street currently hosts the FGB Launderama and is listed as a hazardous waste site with DEC (SMS #890413). This property is located approximately 50 feet to the north and upgradient of the Site. In September 1989, a heating oil UST was removed from the site and petroleum contamination was found in soils and groundwater. Subsequently, two monitoring wells were installed and sampled. These groundwater samples were analyzed for volatile organic compounds ("VOCs"). VOCs were detected above their respective groundwater standards at the time, and in 2001, 0.02 feet of light non-aqueous phase liquid ("LNAPL") was found in one well. Ongoing monitoring occurred at this site and no further LANPL was found to be in the monitoring wells since it was first discovered in 2001. In 2008, groundwater samples were collected, and no VOC contamination was found above enforcement standards. Monitoring wells at the site were subsequently abandoned. This site received a Site Management Activities Complete ("SMAC") designation by the DEC in May 2009.

Montpelier City Hall / 39 Main Street

Montpelier City Hall is located approximately 300 feet to the north and upgradient of the Site and is listed as a hazardous waste site (SMS #20073688). In September 2007, two heating oil USTs were removed from the property. During tank removal, soils were screened for evidence of impacts with a photoionization detector ("PID") and a maximum reading of 137 parts per million ("ppm") was found in soils. Approximately 80 cubic yards ("cy") of impacted soil were excavated and disposed of offsite. In October 2007, five monitoring wells were installed onsite and groundwater was sampled for VOCs and total petroleum hydrocarbons ("TPH"). VOCs and TPH were detected, but below the Vermont Groundwater Enforcement Standards ("VGES"). Follow up sampling was conducted in August 2008 and VOCs and TPH were not found to exceed the VGES. The monitoring wells were then decommissioned in August 2008 and the Site received a SMAC designation from DEC on September 26, 2008.

Great American Salvage Yard / 3 Main Street

The former Great American Salvage Yard is located approximately 115 feet downgradient of the Site and is listed as a hazardous waste site (SMS #931411). Contamination was found during the removal of two gasoline USTs in June 1993. Extensive groundwater monitoring occurred at this site from 1993 until 2018. VOC contamination above the VGES was identified in groundwater; however, was limited to the former UST area. Groundwater monitoring confirmed that groundwater flow direction at this site is south, towards the Winooski river. The most

recent groundwater sampling analytical results (July 2017) show that no further petroleum contamination is present at the site. This site received a SMAC designation on January 2, 2019.

Jacob's Property / 28 Main Street

Jacob's Property which is located at 28 Main St, is listed as a hazardous waste site (SMS #931478). Jacob's Property is located adjacent to the North Branch of the Winooski river. In October 1993, evidence of a fuel oil release into the North Branch prompted the removal of a fuel oil UST that was located onsite. Subsequent site investigation occurred which found VOCs and chlorinated-VOCs ("CVOCs") in groundwater. The source area for CVOCs was determined to be from an on-site UST that historically stored tetrachloroethylene ("PCE") which was located in an alleyway to the north of the building which was removed and found to be leaking. The source area and extent of impacts appear to be limited to properties to the west of Main Street. Groundwater flow at Jacob's Property was consistently found to be towards the northwest, towards the North Branch of the Winooski River and away from the Site, and contaminant concentrations were found to decrease rapidly away from the source area of the former UST. A CAP was developed for this Site in July 2020 which outlined the removal of PCE contaminated soils from the former UST source area, and the testing of indoor air at the property to evaluate the potential vapor intrusion risk.

Nearby Properties Summary

Based on the information available for review regarding these nearby properties, it does not appear that subsurface impacts have been documented that are migrating towards the Site. However, due to the proximity of these properties to the Site, the partially undefined nature and extent of impacts, and the historically industrial and commercial nature of these nearby properties (further described in Section 4.5), there is a possibility that past releases from these nearby properties may have adversely impacted Site conditions and thus represent a REC. This conclusion is further supported by the potential for variability in groundwater flow direction in the area of the Site due to the presence of historic fill materials, subsurface utility corridors, and nearby surface waters (see Section 4.1.4).

4.4 Local Records Review

VHB personnel visited the Montpelier City Clerk's Office in person on March 29, 2021 and requested information from other municipal departments via email due to closures. The following is a summary of the files reviewed by department.

4.4.1 Vermont DEC

VHB submitted an email request to the DEC on March 22, 2021 for any recorded documents on file for the Site, such as chemical storage tank registrations (USTs/ASTs), spills, investigation reports. According to the DEC the only record on file with their department is the Site's listing within their "Dry Cleaners" database. The Site was listed in this database as "Capital Cleaners" with the former name of "Jason's Cleaners", and is listed as being a drop off center. No documentation associated with any existing or prior USTs was recorded. VHB also conducted a search of records available on the DEC online database and no additional Site records were found.

4.4.2 Land Records

A search of the land records at the Montpelier City Clerk's Office was conducted. VHB staff are not title search professionals; a formal land records review should be conducted by a qualified title search attorney. The table below provides a summary of ownership history for the Site that was generated based on VHB's limited review of land records.

Grantor	Grantee	Book/Pg.	Date
Nicholas and Marie DeNoia	Mont Dry Properties LLC	587/334	5/26/2010
David A and Sally B. Benvenuti	Nicholas and Marie DeNoia	421/244	6/20/2003
The Augsbury Corporation	David A and Sally B. Benvenuti	173/249	9/24/1982
The Filling Station Supply Corporation	The Augsbury Corporation	163/271	6/3/1980
The Filling Station Supply Co. Inc.	The Filling Station Supply Corporation	147/478	7/27/1977
Montpelier and Barre Railroad Company	The Filling Station Supply Co. Inc.	91/256 *	10/3/1958
Central Vermont Railway Inc.	Montpelier and Barre Railroad Company	87/171	5/15/1958

* Reference made within an included survey of the Site to "Land Leased to Corker Coal Co"

In addition to the ownership history provided above, historical lease documents for the Site were also reviewed. Specifically, the Site was leased for use to the Shell Oil Company, by the Filling Station Supply Co. Inc., who owned the Site at the time. This lease was recorded on page 295 in book 93, and referenced improvements at the Site such as a 2-bay masonry service station building, a hydraulic lift, 2-2000 gallon gasoline storage tanks ("UST-3" and "UST-4"), a fuel oil tank ("UST-5"), a waste oil tank ("UST-6"), and a pump island and canopy. However, no plans showing the locations of any of these features were included.

Copies of pertinent documents are provided in **Appendix I**.

4.4.3 Assessor's Office

VHB contacted the Montpelier Assessor's office by email on March 29, 2021 with an inquiry for information regarding Site History, including documents such as Site photos, prior assessor's cards, or documentation of any stored hazardous materials at the Site. Stephen Twombly, the Montpelier City Assessor, discussed the Site's history and his offices available documents with VHB on March 31, 2021. Mr. Twombly indicated that the Site was formerly a Shell gasoline and service station until it was renovated in c. 1982 as "Howe Cleaners". Additionally, he indicated that there was no documentation regarding any gasoline or oil tanks at the Site, but mentioned that he recalls a gasoline pump island being located near the Sites boundary with Main Street. A copy of the 1972 assessor's card was provided to VHB and is included in **Appendix I**. This assessor's card reports that the Site was heated with a fuel oil fired system and included a photograph of the building at the time.

4.4.4 Fire Department

VHB contacted the Montpelier Fire Department with an inquiry for information on any releases, hazardous chemical storage, or fires at the Site. As of the date of this report, VHB has received no information from the Montpelier Fire Department. If additional information is received that affects the findings or conclusions of this Phase I ESA, VHB will prepare an addendum to document this additional information.

In the State of Vermont, the fire department does not maintain records of USTs or ASTs, as those records are available on-line from the VT DEC under the UST database and from EDR. No ASTs or USTs are registered at the Site, though they are known to be present as outlined in Section 5.3.

4.4.5 Building & Zoning Department

VHB contacted the Montpelier Building & Zoning Department by email on March 29, 2021 with an inquiry for information regarding Site History, including documents such as photos, permits, or other documentation regarding hazardous materials storage or tanks that may have existed on the Site. As of the date of this report, VHB has received no information from the Montpelier Building & Zoning Department. If additional information is received that affects the findings or conclusions of this Phase I ESA, VHB will prepare an addendum to document this additional information.

4.4.6 Summary of Records Review

VHB reviewed the EDR computer database search results, the DEC online database, and relevant municipal files for properties that have or could potentially have impacted environmental conditions at the Site. Nearby properties of interest and releases of OHM have been documented.

4.5 Historical Use Information

VHB reviewed the historical use information for the Site and nearby properties for conditions that have the potential to environmentally impact the Site.

4.5.1 Sanborn Maps

Sanborn maps are a uniform series of large-scale detailed maps, dating from 1867, that depict the commercial, industrial, and residential sections of cities. These maps historically assisted fire insurance agents in determining the degree of hazard associated with a particular property. Sanborn maps are currently used to track the changing landscape and property uses.

Summary of Sanborn Maps

Year(s)		Description
1884, 1889	Site:	The Site appears undeveloped
	Surrounding Area:	The Site is surrounded primarily by dwellings, however a stone cutting, and granite polishing businesses was mapped to the south of the Site by the Winooski River, and an iron and steel works and hardware and oil businesses were just to the north of the Site. A freight house exists just to the northwest of the Site. A railroad corridor containing multiple railway lines is located directly to the south of the Site.
1894, 1899, 1905	Site:	Two small structures are located on-Site, and both labeled as "coal", suggesting this area of the Site may have been used to store coal for the railroad
	Surrounding Area:	The iron and steel works to the north is now labeled as "hardware". The oil shop to the north is now a paint shop. A steam laundry facility, a "marble shop", multiple printing shops, and black smith facilities are now mapped to the north and northeast of the Site. E.W Bailey and Co Grist Mill operates to the southwest of the Site which harbors heat, stoves, and chemical fire extinguishers
1909	Site:	One of the buildings labeled as "coal" is now mapped as a barber shop.
	Surrounding Area:	No apparent changes
1915, 1925	Site:	The other small structure that was labeled as "coal" is now an office building. Another small structure is located adjacent to this building however the label is indistinguishable.
	Surrounding Area:	The stone cutting business to the south is no longer mapped.
1945	Site:	A new structure is present on the Site and is listed as an auto supplies business and filling station, though no gasoline tanks (typically labeled as "GT") are mapped at the Site.
	Surrounding Area:	A new garage and auto repair business is mapped adjacent to the Site to the northeast. Another filling station is located just to the north of the Site. Multiple gasoline tanks are mapped at these stations to the north and northeast of the Site.
1964	Site:	The layout of the structure changes but is still listed as a filling station.
	Surrounding Area:	A Plastics manufacturing facility is now mapped to the northeast of the Site.

A copy of the Sanborn map report is provided in **Appendix D**.

4.5.2 City Directory Abstracts

The City Directory Abstracts provided by EDR were reviewed; these provide address and owner or business name information from available City Directory data for the area. City Directory reports for Barre St and Main St were provided for the years 1961 and 1992 through 2017 at approximately 5-year intervals. Notable on-site and adjacent listings from the directories have been listed below.

The Site is located in a highly urbanized area and many notable businesses have historically operated in the vicinity of the Site. Such businesses include dry cleaners, auto repair shops, filling stations, a gas plant, a railroad corridor, cobblers, paint shops, a construction company, the Montpelier Department of Public Works, and the Montpelier Fire Department. Information regarding historical uses of the Site itself obtained from the City Directory Abstracts provided by EDR is listed below.

- 1961 – Shell Oil Co
- 1992 – Jason's Dry Cleaning

- 2010 to Present – Capital Cleaners

Copies of City Directory Abstracts are included as **Appendix E.**

4.5.3 Topographic Maps

Historical U.S. Geological Survey ("USGS") topographic maps showing the Site for the years 1919, 1921, 1922, 1924, 1944, 1951, 1957, 1968, 1978, 1988, 1999, and 2012 were obtained from EDR and reviewed. Relevant information obtained from these maps is summarized below.

The Site is located in an area with a heavily urbanized history and is adjacent to a railroad corridor and the Winooski River. The Site is situated on a generally flat portion of land located within a topographic low that that runs parallel with the Winooski River. In the surrounding area, the topography slopes up towards the north and east of the Site and the Winooski River. Due to the urbanized area surrounding the Site, Site specific structures mapped at the Site are not able to be distinguished on these topographic maps.

Copies of the historical topographic maps are included as **Appendix F**.

4.5.4 Aerial Photography

Aerial photographs were obtained from EDR for the Site and vicinity and were reviewed.

The image quality of the aerial photographs is primarily quite poor; however, it can be determined that an onsite structure can first be seen in the 1960 image. It is also clear that the surrounding area has been largely developed since the first available aerial image in 1942.

Copies of the Aerial Photographs are included as **Appendix G**.

4.6 Site History Overview

Based on a review of historical records dating back to 1884, the Site was associated with the neighboring railroad corridors but remained undeveloped until approximately 1894 when two small coal storage sheds were located on the Site. These small structures had varied uses over time including a barber shop and office building until approximately 1950 when an auto supply shop and filling station occupied the Site. In the 1980s the Site switched uses and became a dry-cleaners and has continued to operate as such to the present day.

4.7 Evaluation of Potential Vapor Encroachment

As part of this Phase I ESA, VHB conducted an Evaluation of Potential Vapor Encroachment ("EPVE") in order to determine whether or not a VEC exists at the Site. A VEC is the presence or likely presence of COC vapors in the vadose zone of the Site caused by the release of vapors from contaminated soil and/or groundwater either on or near the Site. This EPVE consisted of the review of information presented in previous or subsequent sections of this document such as:

› The Site's physical setting and features that may impact vapor migration
› Documented storage and releases of volatile COCs at the Site and/or nearby properties
› Potential preferential pathways for vapor migration such as subsurface utility corridors

VHB has concluded that:

- A 550-gallon fuel oil UST (UST-1) is currently present and unused at the Site
- Historical uses at the Site have included the use and storage of OHM and records indicate that up to six different tanks and likely USTs were used to store gasoline, fuel oil, and waste oil at the Site.
- Multiple releases of OHM have occurred at nearby properties that may pose a risk to contaminated vapor migration.

Therefore, VHB has concluded that a VEC exists at the Site in connection with the four RECs detailed in Section 7.1

5

Site Reconnaissance

5.1 Methodology and Limiting Conditions

Greg McDonald of VHB conducted a Site reconnaissance on March 24, 2020, for visual and reasonably identifiable indications of RECs as defined by ASTM E 1527-13. VHB was accompanied by Nicholas DeNoia, the current owner of the Site. Weather conditions did not limit observations during the Site reconnaissance.

VHB's Site observations and information obtained at the time of the Site reconnaissance are presented in the following sections. Photographs taken during the Site Reconnaissance visit are provided in **Appendix J**.

Observation	Observed or Suspected
Areas of OHM product storage and use / Drums / Hazardous Substance and Petroleum Products Containers	According to Mr. DeNoia, no dry-cleaning chemicals have ever been stored or used at the Site, as it has only been used as a drop-off and pickup location for customers, and all dry cleaning has occurred offsite (including spot treatments). Small volume containers of interior paints and household cleaning products were observed at the Site. Two fuel oil storage tanks are used at the Site as described in Section 5.2
Above Ground Storage Tanks (ASTs)	See Section 5.2
Underground Storage Tanks (USTs)	See Section 5.2
Odors	No suspect odors noted
Pools of liquid	None observed
Unidentified Substance Containers	None observed
Transformers and any identified PCB-containing equipment	PCBs are a synthetic chemical that was used in many dielectric fluids, heat transfer fluids, hydraulic fluids, lubricating oils, paints, or coatings manufactured prior to July 2,1979. A total of four pole mounted transformers are located within the right-of-way outside of the northern boundary of the Site. A single pole mounted transformer is located to the northwest of the Site, and three pole mounted transformers are located to the northeast of the Site. The three transformers located to the northeast of the Site were labeled with blue "NON-PCB" stickers, while the other transformer was not labeled as such. All of these transformers appear to be in good condition with no indication of leakage, such as staining on the transformer or the ground surface, and any releases from these transformers are assumed to be the responsibility of the utility company.
Heating/Cooling systems	See Section 5.2

Observation	Observed or Suspected
Interior stains or corrosion	None observed
Interior drains, sumps, and below grade conveyances	None observed or reported by Mr. DeNoia
Exterior pits/ponds/lagoons	None observed
Pesticide use	None observed
Stained soil or pavement	*De minimis* staining was observed on multiple paved portions of the Site. These *de minimis* stains appeared to be associated with small drips from vehicles parked at the Site.
Stressed vegetation	None observed
Evidence of solid waste disposal on the Site	None observed
Evidence of fill materials	None observed
Wastewater discharges	None observed other than municipal sewer
Wells	None observed
Septic systems	None observed
Evidence of spills/releases	None observed
Hazardous waste	None observed
Non-Hazardous waste	None observed
Air Emissions	None observed other than furnace exhaust
Adjacent Properties	Properties adjacent to the Site consisted of mixed commercial/residential uses including a railroad corrido to the south, various store fronts and apartments as well as a coin operated laundromat (Launderama) to the north, and a restaurant (Buddy's Famous) to the east. The west boundary of the Site is bordered by Main Street and a grocery store is located across the street.
Other	

5.2 Heating, Water, and Sewer Systems

The Site is connected to the both the municipal water and sewer systems owned and operated by the City of Montpelier Department of Public Works. The building at the Site is heated by fuel oil fired forced hot air furnace that was installed approximately 12 years ago and also uses a small heat pump for heating and cooling. Mr. DeNoia indicated that the prior heating system was also a fuel oil fired furnace and he is not aware of any other heating systems that have been used at the Site.

Fuel oil for this system is currently stored in a 275-gallon AST that is located within a clothing storage area at the Site. The AST was observed to be in good condition with no staining or fuel oil odors noted. Mr. DeNoia indicated that this AST was installed within the last year as a 550-gallon UST (previously defined at UST-1) located to the east of the building could no longer be filled due to a malfunctioning vent whistle. According to an April 7, 2021 email from the client, an inspection of the building heating system revealed that approximately 10-inches of product were still present in UST-1. Mr. DeNoia reported that UST-1 is no longer used and that he was not aware of any losses of product during its prior use. Additionally, Mr. DeNoia reported that to the best of his knowledge UST-1 was in good condition other than the malfunctioning whistle, and that it has been in place as long as he has owned the Site. As such, he understands that UST-1 was installed in approximately 1992 based on the 2003 Phase I ESA conducted before he purchased the Site (see Section 4.2). He was not aware of any additional USTs that

were installed, removed, or used at the Site. It should be noted that in accordance with the DEC *Underground Storage Tank Rules*, dated October 26, 2020, any UST that is out-of-service for more than one year must be decommissioned in accordance with the rule.

5.3 Exterior Observations and Surface Conditions

Exterior portions of the Site largely consisted of paved parking areas with the exception of a small area of landscaping along the southern portion of the building. The paved areas were typically in good condition with localized areas of *de minimis* staining specifically on the eastern portion of the Site, that appear to be associated with vehicle parking. This area of the Site is currently used as by the neighboring restaurant (Buddy's Famous) for additional parking.

The filling hatch and vent stick up for UST-1 and the fill and vent lines for the interior AST were observed on the eastern portion of the building exterior. No staining or fuel oil odors were noted near either the UST-1 filling hatch or the AST fill line. Multiple additional pipes and lines were observed protruding from the ground surface adjacent to the area of the existing UST, though Mr. DeNoia mentioned he was not aware of what these utilities were. According to the May 2003 Phase I ESA conducted at the Site, these may be associated with a former fuel oil UST (previously defined as UST-2) that was removed when UST-1 was installed. An inspection of interior portions of the buildings' furnace room revealed multiple apparently abandoned lines entering the building, suggesting these exterior pipes and interior lines may have been associated with former storage tanks at the Site.

5.4 Interior Observations

Interior portions of the Site consisted of two main clothing storage areas, a utility area that housed the furnace, and a small bathroom. The building is a slab on grade structure, though the slab is only visible in the utility area as the remainder of the building has a carpeted floor. As previously discussed, a recently installed 275-gallon fuel oil AST was observed within one of the clothing storage areas.

6

Interviews

6.1 Interview with Owner, Site Manager, Occupants, or Knowledgeable Person

The current owner of the Property, Nicholas DeNoia, was interviewed by VHB on March 24, 2021 in conjunction with the Site reconnaissance. The information obtained during the interview has been incorporated throughout this report.

6.2 Interviews with Local Government Officials

Information obtained from Local Government Officials is described in Section 4.4. Along with this, VHB also contacted Wendy Anderson of the DEC Waste Management and Prevention Division to obtain additional information regarding the Site.

7

Conclusions and Opinions

The goal of the Phase I ESA is to identify RECs as defined in Section 1.1. This section identifies known or suspected RECs, Controlled RECs, Historical RECs as well as additional Site considerations. During the Phase I ESA, VHB identified 4 RECs in connection with the Site. VHB's opinion is limited by the conditions prevailing at the time the work was performed and the applicable regulatory requirements in effect.

7.1 RECs

To meet the requirements of Section 12.8 of the Standard, the statement below has been included to preface the conclusions of this report.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 for 9 Main Street, Montpelier, Washington County, Vermont, the property. Any exceptions to, or deletions from, this practice are described in Section 8.1 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property except for the following:

7.1.1 REC #1 – Potential Release from UST-1

A 550-gallon, out of service fuel oil UST (UST-1) that was installed in approximately 1992 is present at the Site. According to Mr. DeNoia, UST-1 is no longer in use due to a malfunctioning vent whistle. While no evidence or record of past releases of fuel oil from UST-1 were identified, releases from USTs and their associated piping are common and thus it is possible that UST-1 may have adversely impacted environmental conditions at the Site.

> Opinion: Although no releases from UST-1 have been identified, it is possible that a release of fuel oil to the subsurface may have occurred that has not been detected. Thus, it is the Environmental Professional's Opinion that the out of service 550-gallon UST represents a REC. If additional information regarding the environmental conditions at the Site is desired, laboratory analysis of samples could be conducted. It should also be noted that in accordance with the DEC *Underground Storage Tank Rules*, dated October 26, 2020, any UST that is out-of-service for more than one year must be decommissioned in accordance with the rule.

7.1.2 REC #2 – Potential Release from Unknown USTs (UST-2 through UST-6)

VHB reviewed documentation indicating that up to five additional USTs were used at the Site to store fuel oil, gasoline, and waste oil (UST-2 through UST-6) throughout its history. While information was reported that gasoline USTs (UST-3 and UST-4) may no longer be present on-Site (Wheeler 2003), no documentation regarding any tank removals or the conditions of any of these additional tanks was identified during VHB's review of available information.

> Opinion: Although no releases have been identified from UST-2 through UST-6, it is possible that a release to the subsurface from one or multiple of these tanks may have occurred that was not detected or reported. Thus, it is the Environmental Professional's Opinion that UST-2 through UST-6 represent a REC. If additional information regarding the environmental conditions at the Site is desired, an underground utility location reconnaissance and laboratory analysis of samples could be conducted.

7.1.3 REC #3 – Historical Site Uses

Throughout its history, the Site has hosted many industrial and commercial uses including coal storage areas associated with an adjacent railroad corridor, a gasoline filling station and auto maintenance garage, and dry-cleaning businesses. Due to the likely use and storage of various chemicals and hazardous materials at the Site in connection with these uses it is possible that incidental and undocumented releases may have occurred.

> Opinion: Due to the various historical uses at the Site it is possible that past releases may have adversely impacted environmental conditions at the Site. Thus, it is the Environmental Professional's Opinion that historic property uses at the Site represents a REC. If additional information regarding the environmental conditions at the Site is desired, laboratory analysis of samples could be conducted.

7.1.4 REC #4 – Historical Nearby Uses and Hazardous Waste Sites

Based on the information available for review regarding nearby properties, VHB has identified multiple hazardous waste sites that exist adjacent to and surrounding the Site. Additionally, the Site is located in an area with a heavily commercialized and industrial past.

> Opinion: While it does not appear that subsurface impacts have been documented that are migrating towards the Site, there is a possibility that past releases from these nearby properties may have adversely impacted environmental conditions at the Site due to the proximity of these properties to the Site, the partially undefined nature and extent of impacts, and the historically industrial and commercial nature of these nearby properties.

7.2 VEC

A VEC is the presence or likely presence of COC vapors in the vadose zone of the Site caused by the release of vapors from contaminated soil or groundwater either on or near the target property. Based on the findings noted above within the four RECs, there is potential that volatile COCs could impact environmental conditions at the Site, thus VHB has concluded that:

- A 550-gallon fuel oil UST (UST-1) is currently present and unused at the Site

- Historical uses at the Site have included the use and storage of OHM and records indicate that up to six different tanks and likely USTs were used to store gasoline, fuel oil, and waste oil at the Site.
- Multiple releases of OHM have occurred at nearby properties that may pose a risk to contaminated vapor migration.

Therefore, VHB has concluded that a VEC exists at the Site in connection with the four RECs detailed in Section 7.1.

8

Data Gaps and Limitations

Other than those limitations expressly provided in **Appendix A** and/or specified herein, completion of this Phase I ESA was not subject to significant assumptions, limitations, or exceptions to the Standard.

8.1 Significant Assumptions, Limitations, Exceptions and Data Gaps.

VHB identified one data gap at the Site during the course of this Phase I ESA. The Environmental Professional's assessment as to whether these data gaps are considered significant is outlined below.

Data Gap	Assessment
As of the date of this report, VHB has not received information regarding its inquiry to the Montpelier Fire Department or Building & Zoning Departments	Based on the available information reviewed regarding the Site's history, VHB does not consider the lack of responses to constitute a significant data gap.

As described above and when appropriate, these data gaps have been conservatively incorporated into the findings of this report. Should additional data become available, the findings of this report should be reevaluated.

Signature and Qualifications of Environmental Professional

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of this part.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Environmental Professional: 

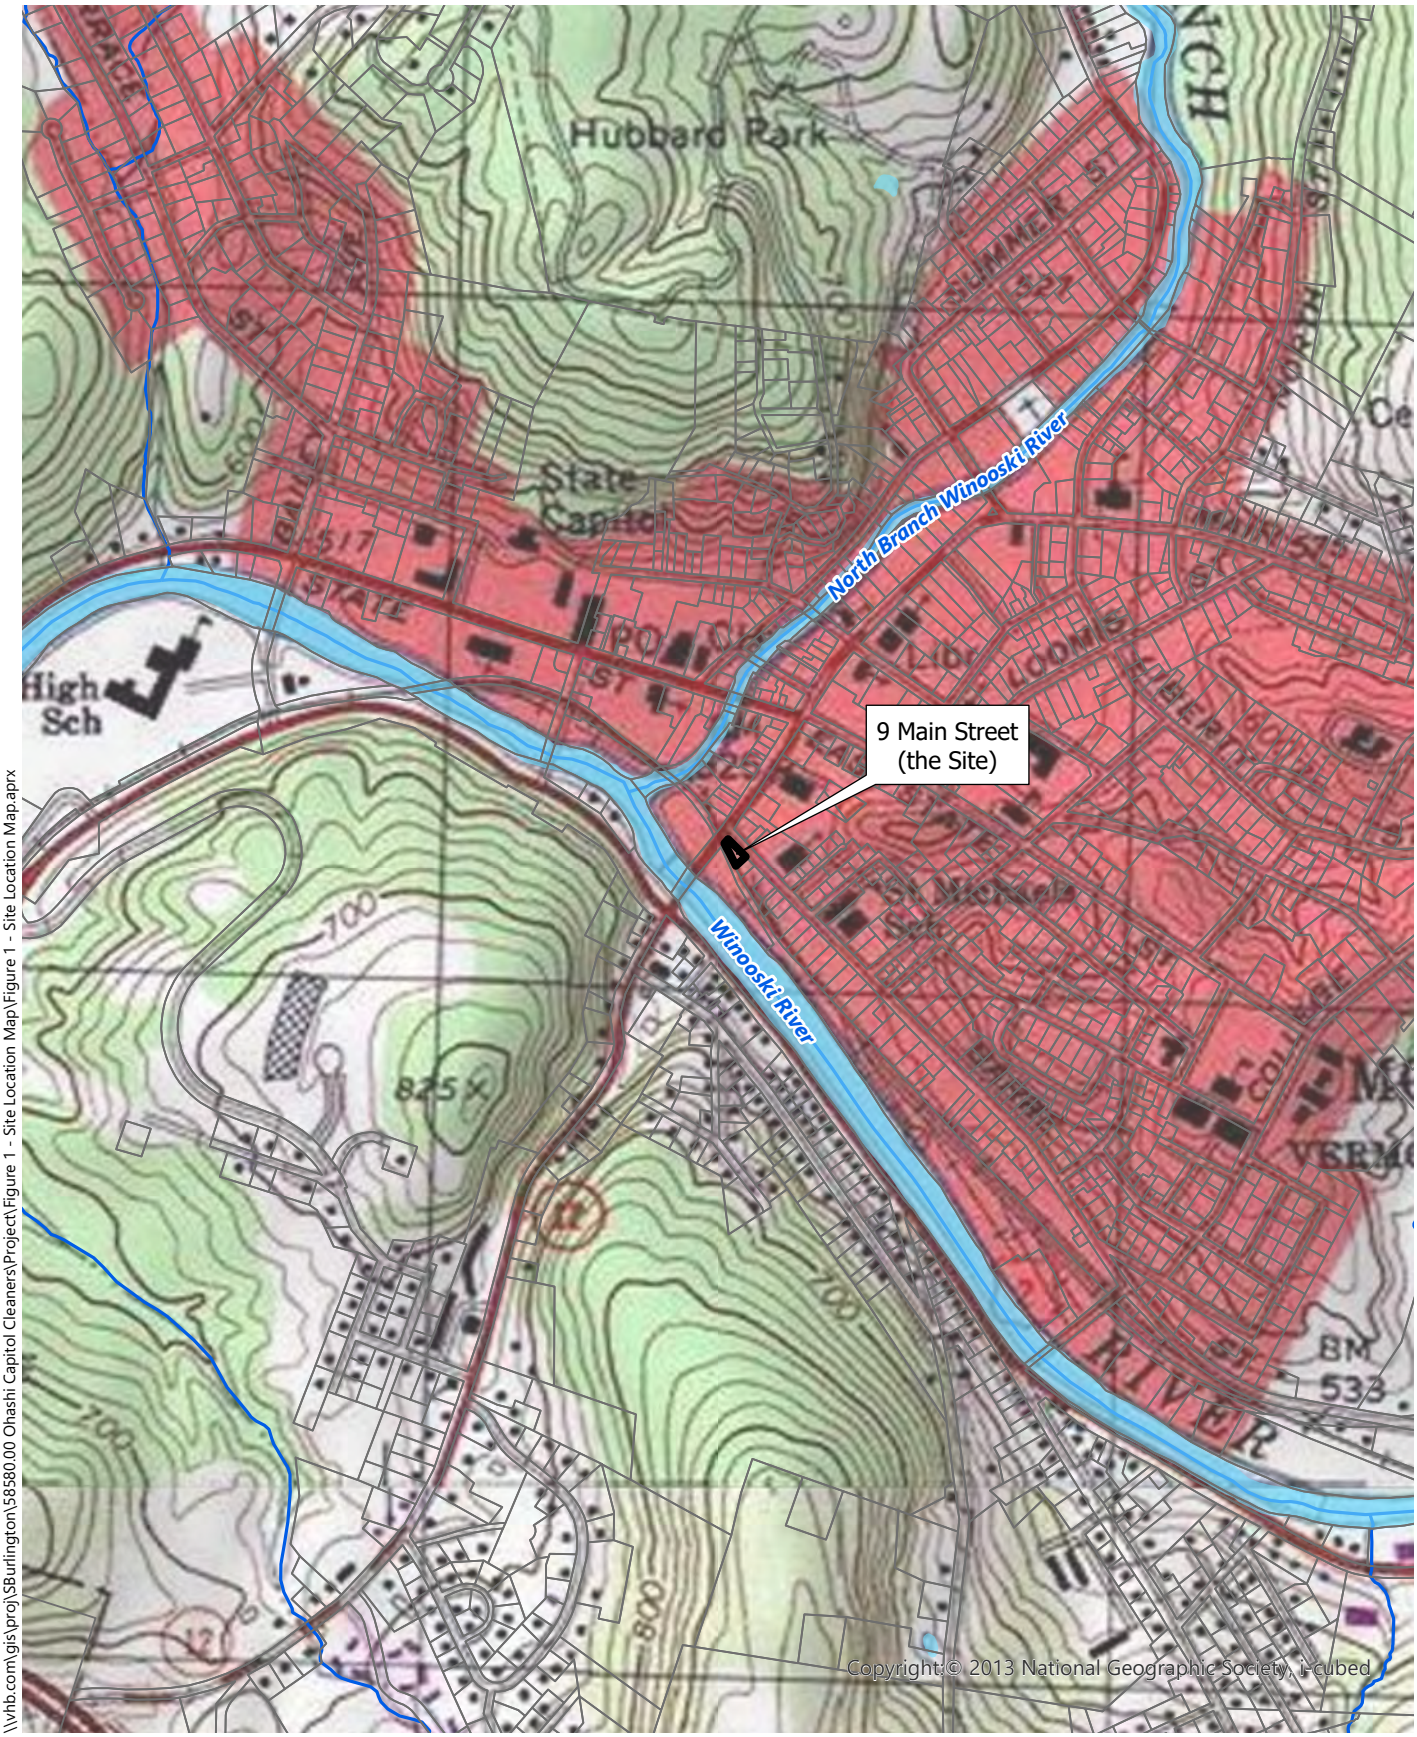

Kurt Muller, P.E.
Date 4/13/2021

- No Digital Data Available
- Unmapped

N

The pin displayed on the map is an approximate point selected by the user and does not represent an authoritative property location.

This map complies with FEMA's standards for the use of digital flood maps if it is not void as described below. The basemap shown complies with FEMA's basemap accuracy standards

The flood hazard information is derived directly from the authoritative NFHL web services provided by FEMA. This map was exported on 3/22/2021 at 1:27 PM and does not reflect changes or amendments subsequent to this date and time. The NFHL and effective information may change or become superseded by new data over time.

This map image is void if the one or more of the following map elements do not appear: basemap imagery, flood zone labels, legend, scale bar, map creation date, community identifiers, FIRM panel number, and FIRM effective date. Map images for unmapped and unmodernized areas cannot be used for regulatory purposes.

Limitations

Limitations

9 Main Street

Montpelier, VT

This report has been prepared for the sole and exclusive use of the Client and the Users. It is subject to and issued in connection with the Agreement and the provisions thereof. Any use or reliance upon information provided in this report, without the specific written authorization of the Client and VHB, shall be at the User's sole risk.

In conducting this assessment, VHB has obtained and relied upon information from multiple sources to form certain conclusions regarding potential environmental issues at and in the vicinity of the subject property. Except as otherwise noted, no attempt has been made to verify the accuracy or completeness of such information.

The objectives of the assessment described in this report were to assess the physical characteristics of the subject property with respect to overt evidence of past or present use, storage, and/or disposal of oil or hazardous materials, as defined in applicable state and federal environmental laws and regulations, and to gather information regarding current and past operations and environmental conditions at and in the vicinity of the subject property.

Where access was denied or conditions obscured, VHB makes no report on such areas.

No attempt has been made to assess the compliance status of any past or present Owner or Operator of the property with any federal, state, or local laws or regulations.

The findings, observations, and conclusions presented in this report are limited by the scope of services outlined in our Agreement, which reflects schedule and budgetary constraints imposed, by the Client for the current phase of environmental assessment. Furthermore, the assessment has been performed in accordance with generally accepted engineering practices and standards set forth in ASTM E 1527-13. No other warranty, expressed or implied, is made.

The assessment presented in this report is based solely upon information gathered to date. Should further environmental or other relevant information be developed at a later date, the Client should bring the information to the attention of VHB as soon as possible. Based upon an evaluation, VHB may modify the report and its conclusions.

The Environmental Data Resources, Inc. (EDR) Radius Map with GeoCheck was conducted under the Notice of Disclaimer/Waiver of Liability included in the summary report.

Appendix B
Qualifications of VHB Personnel

Quinn Ledak, EIT

Environmental Consultant

Quinn is an Environmental Consultant supporting site investigation and remediation projects throughout Vermont and New York. He has performed groundwater sampling, soil sampling, and environmental monitoring in support of infrastructure improvement projects. Additionally, he has provided performance monitoring and maintenance of groundwater treatment facilities.

1 years of professional experience

Education

BS, Environmental Engineering, University of Vermont, 2019

Registrations/Certifications

Engineer in Training, VT

OSHA 40-Hour Hazwoper Certificate

OSHA Confined Space Entry Training Certificate

2020

Secure Workers Access Consortium Member

2020

Pine Street Canal Superfund Contaminated Site Investigation, Burlington, VT

Quinn currently coordinates and oversees compliance monitoring activities at the Pine Street Canal Superfund Site which include groundwater and surface water monitoring, subaqueous cap coring and sample collection, and non-aqueous phase liquid measurement and removal activities. Develops compliance monitoring reports to be submitted to EPA summarizing monitoring activities and sampling results.

Chlorinated Solvent Site, Southern New York

Performed monthly field visits to groundwater treatment system to collect compliance samples and perform routine maintenance activities on air stripper system. Performed groundwater and surface water sampling on more than 50 monitoring wells. Remotely monitored and controlled treatment system performance through the use of a Human Machine Interface. Develops quarterly monitoring reports summarizing system performance and compliance sample results.

Vermont Agency of Transportation – Drawbridge #8 Replacement, North Hero, Vermont

Quinn conducted construction monitoring overseeing replacement of an existing drawbridge over Lake Champlain. Duties included onsite monitoring and observation to ensure contractor compliance with Site specific soil and sediment management plans, as well as environmental sampling and monitoring to delineate the nature and scope of potential environmental contamination.

Vermont Agency of Transportation – Drawbridge #8 Replacement, North Hero, Vermont

Quinn assisted in the subsurface investigation of Mothers Bridge which included soil sampling through the use of soil borings collected by sonic rig as well as Intermittent Sampling Method (ISM).

Former Apparel Label Manufacturing Facility Contaminated Site Investigation, North Carolina

Developed quarterly monitoring reports of air stripper groundwater treatment system summarizing system performance and groundwater sample results. Visited site to perform routine maintenance checks on air stripper system and extraction wells

Greg J. McDonald

Staff Environmental Engineer

Education

MS, Civil and Environmental Engineering, University of Maine, 2018

BS, Chemistry, St. Lawrence University, 2014

Registrations

OSHA 40-hour HAZWOPER certification

OSHA 10-hour Construction certification

Greg is a member of the Site Investigation and Remediation practice in VHB's Montpelier office. His field experience includes leading investigations that consist of soil, groundwater, soil gas, and air sampling, as well as overseeing drilling activities, and monitoring well installation.

2 years of professional experience

Phase I and Phase II Environmental Assessments, VT

Greg has experience conducting both Phase I and Phase II ESAs throughout Vermont, and has prepared written reports documenting the findings, conclusions, and recommendations of the investigations.

Pine Street Canal Superfund Site, Compliance Monitoring Activities, Burlington, VT

Greg performed periodic groundwater and surface water monitoring as well as NAPL monitoring and removal at the Pine Street Canal Superfund Site in support of ongoing environmental compliance monitoring.

Montpelier Union Elementary School, Environmental Oversight, Montpelier, VT

Greg provided oversight in support of the rehabilitation of the Montpelier Union Elementary School. Greg completed soil screening and sampling and coordinated project specific environmental requirements with the resident engineer and contractor.

Environmental Products and Services of Vermont Inc., Syracuse, NY

Prior to joining VHB, Greg worked as a Field Technician in the summers of 2008-2013 where he conducted hazardous waste sampling and field-monitoring for analysis of sediment, water, and debris samples.

SGS Galson Laboratories, East Syracuse, NY

Prior to joining VHB, Greg worked as an Industrial Hygiene Lab Analyst from 2014 to 2016, where he was responsible for the daily operation and maintenance of ICP and ICP-MS instruments to conduct trace metals analysis on various sample matrices. He also reported analytical results to clients to inform them of potential workplace environmental exposures.

Kurt Muller, PE

Vermont Director of Site Investigation and Remediation

Education

BS, Environmental Engineering, University of Vermont, 2004

BA, Biology, University of Vermont, 1999

Registrations

Professional Engineer, Vermont

Affiliations/ Memberships

Member of the Board - Vermont Environmental Consortium (2013- present)

American Council of Engineering Companies (ACEC)

Kurt's engineering experience encompasses project management, environmental site assessment, investigation and remediation design, clean-up oversight, and stakeholder collaboration, as well as brownfield environmental consulting work and managing large soil remediation projects. He has acted as lead project manager and Environmental Professional on more than 40 EPA-funded brownfield site investigations, 15 petroleum investigations that were eligible for reimbursement from Vermont's Petroleum Cleanup Fund, and 4 large CERCLA-compliant soil management and remediation projects for the National Park Service. His experience includes preparation of work plans, site investigation reports, Evaluations of Corrective Action Alternatives (ECAAs), and Corrective Action Plans (CAPs) that address a wide variety of contaminants. Kurt's work focuses on complex contaminated soil characterization and management projects that require coordination with a variety of stakeholders. During all of his projects, Mr. Muller has emphasized good communication and participation amongst the stakeholders in order to ensure a successful outcome.

SELECTED EXPERIENCE SUMMARY

- Management, Remediation and Construction Oversight –Between 2008 and project completion in 2013, provided oversight and project management for the National Park Service (NPS) on the successful Krejci Dump Site remediation in Cuyahoga Valley National Park. In 2014 and 2015 performed oversight and management assistance during the remediation of operable unit 1 (OU1) of the Washington Gas Site for NPS, and oversaw the construction of an isolation barrier at the Orphan Mine Site in Grand Canyon National Park. Provided investigation oversight and document review to confirm Administrative Order of Consent compliance at the GERO Vincennes Site. Designed, managed, and implemented an EPA approved soil and groundwater management plan for the City of Burlington's Waterfront Access North project (2013-present) that rehabilitated land surrounding a former coal fired power plant for safe recreational reuse.
- Brownfields Investigation and Redevelopment - Project manager on more than 40 EPA-funded Brownfield site investigations, prepare QAPP documents and investigation reports. Perform ,ECAAs and prepare CAPs that address a wide variety of contaminants. Familiar with and generate self-implementing cleanup plans for TSCA-regulated PCB sites. Designed, coordinated and implemented remediation for two former paper mills impacted by dioxins/furans and PCBs, which included developing EPA approved QAPPs for post remediation dioxins/furans indoor air clearance sampling, the first of their kind for Region 1 EPA. Prior to project management, Kurt performed soil, vapor and groundwater sampling using a variety of techniques including EPA's slow purge sampling procedures, Drive Point/Direct Push technology, Waterloo Profiling, soil and sediment coring, bathymetry assessments, and monitoring well installation. Also, supervised numerous underground storage tank closures throughout Vermont.
- Environmental Site Assessments (ESAs) –Performed and/or oversaw more than 50 ESAs on a variety of commercial and residential properties. Project manager/lead

engineer on several subsurface Phase II hydrogeologic investigations at a variety of petroleum, chlorinated solvent, and PCB contaminated sites.

- Expert Witness and Consulting Services –Working cooperatively with the Vermont Agency of Natural Resources to reevaluate management laws for urban soil impacted by low-level contaminants in a manner that equally mitigates risk to human health and the environment but employs more pragmatic and cost-effective alternatives. Hired to provide expert technical arbitration resolution support for several soil management disputes. Assist both private and public counsel by providing expert technical consulting services and testimony in support of recently passed soil management legislation (Act 52) in Vermont.
- Stormwater Management and Permitting – Worked closely with a regional planning commission to identify problem areas within an urban watershed and proposed low impact development and best management practices to mitigate stormwater control issues. Completed all aspects of municipal stormwater permit application process including engineer's feasibility assessments, existing treatment practice retrofit designs and cost analyses.
- Solid Waste Management and Sanitation - As an Urban Environmental Management Peace Corps volunteer in Cote d'Ivoire,, worked in conjunction with the technical services division of Bloléquin City Offices making sustainable improvements in municipal sanitation.

Civil Engineering Associates, - Shelburne, Vermont
Prior to joining VHB, Kurt was an Engineer focused on Construction Oversight for Civil Engineering Associates. He performed daily site inspections of a one hundred-million-dollar ski area resort expansion project. Kurt was responsible for implementing effective storm water management practices and he assessed fluvial morphologic impacts in conjunction with ANR.

Intervale Center for Farm Innovation, Burlington, Vermont
Prior to joining VHB, Kurt was an Environmental Engineer for Intervale Center for Farm Innovation. He researched, designed, and constructed nutrient management systems including anaerobic digesters, attached growth media reactors, gas scrubbers, phytoremediation troughs and constructed wetlands. Kurt was also responsible for maintaining a wastewater laboratory and performing necessary analytical water quality testing using EPA approved methods.

City Council of Blolquin, Côte d'Ivoire, West Africa
Prior to joining VHB, Kurt was an Urban Environmental Manager for the City Council of Blolquin in West Africa. As a Peace Corps volunteer, he worked in conjunction with the technical services division of Bloléquin making sustainable improvements in municipal sanitation including initiating a trash collection service, repairing potable water pumps, and teaching health science. He successfully advocated the effective use of appropriate, available, and affordable technology, and started two cooperative gardens in primary schools to help fund health education projects. Kurt also trained the community in HIV/AIDS awareness by launching a 10-week HIV/AIDS peer education seminar and he co-founded G.U.I.D.E., a Liberian female empowerment organization.

Living Technologies, Inc., Burlington, VT
Prior to joining VHB, Kurt was an Operations Engineer with Living Technologies where he managed a technologically advanced wastewater treatment facility known as a Living

Machine. He led all physical aspects of the research and development effort, as well as evaluated and presented experimental testing results to management. He supported design and construction procedures of an 80,000 GPD wastewater treatment facility. Kurt also designed, built, and operated an attached growth media reactor experiment. He served as a purchasing agent of wastewater treatment equipment and assisted in process monitoring by testing water quality and evaluating data.

Short Courses

- EBC Site Remediation – Redevelopment Program Series – Contaminated Property Buying/Selling Strategies, March 2017
- Princeton Groundwater Remediation Course, May 2015
- National Brownfields Conference 2007, 2009, 2011
- ASTM 1527-13 Phase I Environmental Site Assessments for Commercial Real Estate Course
- NEWMOA, Vapor Intrusion Technical Training, September 2013
- Environmental Business Council (New Hampshire) Management of Urban Fill and Non-Hazardous Contaminated Soil Training, November 2014
- Associated Industries of Vermont Stormwater Permitting Seminar, VTDEC, March 2006
- Stormwater Quality and Quantity Control Seminar, vendor sponsored, March 2006
- 21st Annual International Conference on Soil, Sediments and Water, ENSR sponsored, October 2005
- OSHA Hazardous Material Certified - 40 Hour Hazmat Handling and Emergency Response Course – January 2005, Supervisory Training 2013-2017.
- Stormwater Regulation in Vermont, Lorman Educational Services, November 2006

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 12/30/2020 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

FRANKLIN STREET AREA Site ID: 0102124 EPA Id: VTD988366704	4 FRANKLIN STREET	NE 1/4 - 1/2 (0.430 mi.)	X178	608

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

ASSOCIATED INDUSTRIE EPA ID:: VTP000560775	99 STATE STREET	NNW 1/8 - 1/4 (0.198 mi.)	O135	465

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 12/14/2020 has revealed that there are 15 RCRA-VSQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

VT SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Vermont Hazardous Waste Sites List.

A review of the VT SHWS list, as provided by EDR, and dated 09/21/2020 has revealed that there are 32 VT SHWS sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

ME SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Solid Waste Facility List.

A review of the ME SWF/LF list, as provided by EDR, and dated 11/03/2020 has revealed that there is 1 ME SWF/LF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

VT LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Conservation's Vermont Hazardous Waste Sites List.

A review of the VT LUST list, as provided by EDR, and dated 09/21/2020 has revealed that there are 57 VT LUST sites within approximately 1 mile of the target property.

Project Status: Gw Impacted Well Below Vges
Facility Id: 941650
Closure Date: 12/01/1994

GILBERTSON RESIDENCE 7 RICHARDSON PLACE NNW 1/4 - 1/2 (0.459 mi.) 181 611
Contamination: Heating Oil
Project Status: UST removed. Soil contamination found. Investigation complete, no impact to GW.
Facility Id: 20104106
Closure Date: 05/08/2012

MONTPELIER HIGH SCHO HIGH SCHOOL DRIVE WNW 1/2 - 1 (0.524 mi.) 185 614
Project Status: Underground storage tank removed. Contamination found. Investigation needed. Visual Survey town stump dump, found no evidence of soil stockpile from school. SMAC
Facility Id: 20002747
Closure Date: 02/10/2004

WALZ RESIDENCE 22 SUMMER ST NNE 1/2 - 1 (0.569 mi.) 188 617
Contamination: Heating Oil
Project Status: Contamination discovered during the removal of a heating oil UST. Tank was in fair condition. Contamination appeared to decrease with depth. PID readings were below action level at 10 to 11 feet below grade. No groundwater impacts identified during tank removal. A limited boring assessment conducted by LBG found no impacts to the shallow groundwater. Property is served by the municipal drinking water system.

Facility Id: 20104022
Closure Date: 07/22/2010

ARCHER/BROWN PROPERT | 16 HARRISON AVENUE | ENE 1/2 - 1 (0.570 mi.) | 189 | 617
Contamination: Heating Oil
Project Status: Abandoned heating oil UST discovered. Limited soil removal. No additional work needed.
Facility Id: 992630
Closure Date: 07/02/1999

SCHLOTT RESIDENCE | 9 VINE ST | NNE 1/2 - 1 (0.613 mi.) | 190 | 618
Contamination: Heating Oil
Project Status: Contamination discovered during the removal of a heating oil UST. No significant contamination detected during Expressway investigation. No elevated PIDs in adjacent structures. Water is supplied by the municipal system. Monitoring wells properly closed.
Facility Id: 20073676
Closure Date: 02/27/2009

PEROJO PROPERTY | 25 TERRACE ST | NW 1/2 - 1 (0.615 mi.) | Y191 | 618
Project Status: Underground storage tank removed. Contamination found. Investigation needed.SMAC 4/12/2002.

Contamination: Diesel, Gasoline
Project Status: Pcs Treatment Completed, Gw Naturally Attenuated-site Closed
Facility Id: 911068
Closure Date: 12/01/1995

KEARNEY/ARCHANGELO R | 396 ELM ST | NNE 1/2 - 1 (0.751 mi.) | 200 | 629
Contamination: Heating Oil
Project Status: AST release in basement. Hole in concrete floor found during cleanup. Contam soil beneath slab removed. Free product found in soil. 7 gw wells installed, fp in three of them. Additional wells recommended; sve system operational under basement slab. Offsite migration has occurred. Payment issues arising. Sent letter 07/06 regarding urgency of site response. Received wq report from may 2006 in December 2006. Another WQ event occurred in December 2006. Contamination does not appear to have migrated offiste. Indoor SVE system in operation. No VTGES exceedences in August 2007; decreasing SVE to phased operations. Another WQ event to occur in December 2007.No VTGES exceeded in 2008. Epoxy put on basement floor to mitigate indoor air issues. Site eligible for closure.
Facility Id: 20063488
Closure Date: 10/27/2009

LIPMAN RESIDENCE | 11 PARKSIDE AVE | NNW 1/2 - 1 (0.752 mi.) | 201 | 632
Contamination: Heating Oil
Project Status: UST removed. Soil contam found. Investigation complete; no impact to GW.
Facility Id: 20083858
Closure Date: 11/13/2009

SHERWIN WILLIAMS STO | 62 RIVER ST | SE 1/2 - 1 (0.807 mi.) | Z202 | 632
Contamination: Heating Oil, Other Petroleum
Project Status: #2 fuel oil UST leaked and discharged to Winooski River. During cleanup, additional historic petroleum contamination discovered. 1st letter to be sent to RP requesting additional work.
Facility Id: 20043218

VT DEPARTMENT OF BGS | 13 GREEN MOUNTAIN DR | WSW 1/2 - 1 (0.816 mi.) | 203 | 643
Contamination: Heating Oil
Project Status: Underground storage tank removed. Contamination found. Investigation needed. ISI report received January 2006. Limited gw contamination. No VTGES exceedences. Requested spring 2007 wq sampling event. Sampled in spring 2008 - no VTGES exceedences. Wells closed, site closed.
Facility Id: 20063558
Closure Date: 05/08/2009

PAULL RESIDENCE | 30 HUBBARD PARK DRIV | NNW 1/2 - 1 (0.821 mi.) | AA204 | 653
Project Status: Underground storage tank removed. Contaminated soil removed. Site SMACed March 2000.
Facility Id: 992682
Closure Date: 03/22/2000

WILLIAMS RESIDENCE | 26 HUBBARD PARK DRIV | NNW 1/2 - 1 (0.841 mi.) | AA205 | 653
Contamination: Heating Oil
Project Status: Underground storage tank removed. Contamination found. MWs abadoned Spetember 2006.
Facility Id: 20043264
Closure Date: 10/11/2006

FORMER HUNGER MOUNTA | 403 BARRE ST | SE 1/2 - 1 (0.899 mi.) | 207 | 660
Contamination: Gasoline
Project Status: ISI of petroleum UST contamination completed. Residual GW contamination in former tank grave. SMAC'd w/land record notice.
Facility Id: 951805
Closure Date: 07/29/2003

ROBINS-HINDS RESIDEN | 5 GEORGE ST | SSE 1/2 - 1 (0.912 mi.) | 208 | 660

Contamination: Heating Oil
Project Status: Contamination discovered during the closure of a heating oil UST. Over 23 tons of soil excavated and shipped to ESMI. No significant soil contamination recorded using a PID at the bottom of the excavation. Some groundwater noted in the excavation at a depth of 5 feet below grade. Screening of the indoor air of the residence showed no elevated PID readings. This property and adjacent properties are served by the municipal drinking water system.
Facility Id: 20094013
Closure Date: 08/09/2011

HUSSEY RESIDENCE | 70 MURRAY HILL DRIVE | ENE 1/2 - 1 (0.969 mi.) | 209 | 661
Contamination: Heating Oil
Project Status: Release detected during the removal of a heating oil UST system. No evidence of a shallow groundwater impact was noted in source area during tank removal or initial investigation. ECS oversaw the excavation of approximately 6 cubic yards of contaminated soil. Soils properly disposed of a ESMI in Louden, NH. Some residual contamination left in place at the bedrock interface (~8 ft below grade). TPH levels in this area exceeded the residential guideline, though VOCs were all well below the EPA Region IX Standards. Two rounds of samples collected from nearby public drinking water supply wells showed no detection of any volatile compounds. Note that the address of this property was formerly 2 Murray Hill Drive.
Facility Id: 20063580
Closure Date: 08/06/2007

GREAT AMERICAN SALVA	***3 MAIN ST***	***WSW 0 - 1/8 (0.034 mi.)***	***A18***	***31***

Contamination: Gasoline, MTBE
Project Status: Free phase gasoline product found 12/00, Additional investigation completed. Next monitoring due spring 2017. RP not interested in limited cleanup or notice to land record for reaching closure. Winooski River ~30 feet from UST grave, but not threatened.
Facility Id: 931411
Closure Date: 01/02/2019

MONTPELIER CHAMPLAIN | RT 2, MEMORIAL DRIVE | WNW 0 - 1/8 (0.117 mi.) | H65 | 215
Project Status: Site Invest And Monitoring Completed
Facility Id: 931528
Closure Date: 01/01/1995

FORMER CHITTENDEN BA | 13 STATE ST | NNE 0 - 1/8 (0.124 mi.) | F70 | 218
Project Status: UST removed. Contamination found. Investigation completed. Minor impact to GW. SMAC
Facility Id: 20002835
Closure Date: 06/28/2001

VERMONT STATE EMPLOY | ***146 STATE ST*** | ***WNW 1/4 - 1/2 (0.463 mi.)*** | ***182*** | ***612***
Contamination: Heating Oil
Project Status: Contamination discovered during the removal of a heating oil UST. Excavation proceeded to a depth of approx. 11 feet below grade, at which point the PID readings had declined to 13 ppm. 12 cubic yards of contaminated soils were stockpiled and later transported for disposal at the Moretown Landfill. All properties in this area served by the municipal drinking water system. PID readings taken from the adjacent structures were all non-detect.
Facility Id: 20083844
Closure Date: 10/31/2008

PERRYS SERVICE STATI | ***152 STATE ST*** | ***WNW 1/2 - 1 (0.526 mi.)*** | ***187*** | ***615***
Contamination: Gasoline
Project Status: 10/96 UST removal. Soil contam found. 9/00 ISI confirmed GW contam. 6/5, 9/26,12/6/01, 4/30/02 4 of 7 MWs, 4/3 9/17/03 7 of 10 MWs above VGES biennial monitoring. 10/05 - sent letter that we're awaiting more work - abandoned UST investigation and more WQ sampling. Received wp/ce to investigate abandoned tank and install nutrient recharge gallery in July 2006. UST removed fall '06; nutrient gallery installed fall 06'. WQ monitoring and recharge gallery evaluation currently occuring (1/07).11/10 - elevated VOCs above VTGES in most wells on site - Winooski River sampling shows no impact. Nutrient injections did not show significant improvements. Continue with wq monitoring as well as conduct a CAFI for possible corrective action.2018 - significant petroleum contamination persists under the site. GW event to occur and a Conceptual Site Model will be developed to comply with iRule. Site my warrant Corrective Action.

Facility Id: 962085

State and tribal registered storage tank lists

VT UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's State of Vermont Underground Storage Tank Database.

A review of the VT UST list, as provided by EDR, and dated 11/02/2020 has revealed that there are 40 VT UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there are 22 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MONTPELIER GAS WORKS	MEMORIAL DRIVE	WNW 1/8 - 1/4 (0.153 mi.)	H96	298

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical

Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 2 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

GREAT AMERICAN SALVAGE (Continued) **1000158402**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Last Modified: 4/27/2007

Chem Inventory:
Facility ID: FATR200752UQN100TG6Y
Chem Inv Record ID: CVTR200752USP603YFZE
Chemical Name: R507(refrigerant)
CAS NUMBER: Not reported
EHS Chemical: Not reported
Reported Year: 2007
Last Modified: 2/7/2008
Avg Amount: 375
Days On Site: 365
Max Amount: 375
Max Amt Container: 375
Chem Same As Last Yr: True
Chronic: Not reported
Acute: Not reported
Fire: Not reported
Gas: True
Liquid: Not reported
Mixture: True
Pressure: True
Pure: Not reported
Reactive: Not reported
Solid: Not reported
State Label Code: VT2007
Trade Secret: Not reported

Chemical Location:
Facility ID: FATR200752UQN100TG6Y
Chemical ID: CVTR200752USP603YFZE
Reported Year: 2007
Location: In piping throughout store
Amount: 375
Amount Unit: pounds
Type: Other

SHAW'S #7521 (Continued) **S108489306**

Pressure:	Greater than ambient pressure
Temperature:	Less than ambient temperature but not cryogenic
Last Modified:	2/7/2008

Chemical Mixture:

Reported Year:	2007
Chemical Mix:	1,1,1-TRIFLUOROETHANE
Percentage:	50
MiX CAS:	420-46-2
MiX EHS:	Not reported
Weight Volume:	Wt
MiX Last Modified:	2/7/2008

Reported Year:	2007

LUST:
Name: MONTPELIER CITY HALL
Address: 39 MAIN ST.
City,State,Zip: MONTPELIER, VT
Facility ID: 20073688
Source: UST-Heating Oil
Closure Date: 09/26/2008
Priority: SMAC - Site Management Activities Completed
Staff: Ashley Desmond
Source: UST-Heating Oil
Site Use: Government
Site Status: Voluntary Action
Contamination: Heating Oil
Institutional Control: Not reported
Record Last Update: 10/21/2015
Project Status: Contamination discovered during the removal of two heating oil USTs. Five soil borings/monitoring wells installed around to the tank during initial site investigation. No contamination was above the VGES during two groundwater monitoring events. Screening of indoor air spaces next to the former tanks showed no elevated readings. All properties in this area are served by the municipal drinking water system. Any residual contamination appears to be confined to the immediate vicinity of the former tanks. Contaminated soils removed during UST closure will be managed under another site owned by Montpelier (Public Works Garage, 20063552).

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:
Registry ID: 110005262063

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Name:	TISDALE PROPERTY
Address:	69 BARRE ST
City,State,Zip:	MONTPELIER, VT
Facility ID:	20022960
Source:	UST-Heating Oil
Closure Date:	Not reported
Priority:	LOW - Site with contamination to soils or groundwater, but no effect on sensitive receptors
Staff:	Tami Wuestenberg
Source:	UST-Heating Oil
Site Use:	Residential
Site Status:	Voluntary Action
Contamination:	Heating Oil
Institutional Control:	Not reported
Record Last Update:	12/10/2019
Project Status:	Underground storage tank removed. Contamination found. Investigation conducted. Semi annual gw monitoring ongoing. FP discovered in one well August 2005. Quarterly FP monitoring (Aug/Nov/Feb/May), Semiannual GW monitoring (Nov/May). FP not observed at site since August 2006. VOCs declining, elevated napthalene in 3 wells as of fall 2007 round. Semiannual sampling to continue. Decrease to annual sampling starting spring 2009.7/2009 - Napthalene exceedence in two wells. No offsite impact. Annual monitoring to continue in spring 2010. Eligible for SMAC with a Notice, if PRP is interested.11/2010 - elevated napthalene remains in MW-1 and MW-2; decreased sampling to biennial with next event to occur spring 2012.6/2012 - levels continue to decrease, however still above VTGES for napthalene in two wells; next sampling event to occur in spring 2014.6/2014 - levels continue to decrease, however still above VTGES for napthalene in one well; next sampling event to occur in spring 2016. May require RP to SMAC with notice after next event.6/2017- napthalene continues to exceed VGES; Requested consultant to speak to RP about NLR otherwise we'll continue with biennial monitoring to occur in 2018.2018 - ATC to collect one additional round of WQ sampling summer 2018.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

SHWS:
Name: STATE OF VERMONT LAND ON TAYLOR STREET
Address: Not reported
City,State,Zip: MONTPELIER, VT
Facility ID: 20093905
Source Type: Other
Priority: NFAP - No Further Action Planned
Staff: Matthew Becker
Closure Date: 02/06/2009
Site Use: Industrial
site Status: Brownfields
Contamination: Arsenic, PAH
Institutional Control: Other
Record Last Update: 02/06/2009
Project Status: Arsenic and PAHs in surficial soils greater than residential and industrial criteria-resultant from railroad use. Concentrations do not pose risk for current siteuse, railroad. Redevelopment of property for other use/zoning would require management of soils. Investigations were conducted in anticipation of consolidation and redevelopment of this property with the adjacent Carr Lot property.

Past Use: Multistory	Not reported
Property Description:	The site has been operated as a railroad ROW since at least 1884. Historical records indicate several railroads interesected on the property but today there is only one track. Surrounding off site property uses include a livery, agricultural store, auto repair shop, junk and scrap yard. Since 1991 the City of Montpelier has leased a portion of the property for parking.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

STONE ENVIRONMENTAL INC (Continued) **1011924275**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Lat/Long:	Not reported
Comments:	Appears that a vehicle may have backed into used veg oil drum at Pho Capital restaurant. Vehicles drove threw and spread it around.
Action:	FD responded but found no product. Restaurant hosed down lot but no significant evidence in drains. BGS spread sand over area and checked for evidence of impacts to river (none found). Will leave sand for now and sweep up in a couple days.

City,State,Zip:	MONTPELIER, VT
Facility ID:	20073677
Source Type:	Unknown
Priority:	SMAC - Site Management Activities Completed
Staff:	Ashley Desmond
Closure Date:	07/31/2008
Site Use:	Undeveloped
site Status:	Not reported
Contamination:	Not reported
Institutional Control:	Not reported
Record Last Update:	08/28/2007
Project Status:	Contamination discovered during the removal of an abandoned UST. Lab samples indicate this was most likely a gas tank (MTBE present). REA conducted an investigation. No significant groundwater contamination was recorded in the area. All properties in this area are served by the municipal drinking water system. There is limited risk to receptors from any residual contamination.

Name:	STATE STREET GULF
Address:	STATE ST.
City,State,Zip:	MONTPELIER, VT
Facility ID:	20083880
Source:	UST-Gasoline
Closure Date:	Not reported
Priority:	LOW - Site with contamination to soils or groundwater, but no effect on sensitive receptors
Staff:	Kristi Herzer
Source:	UST-Gasoline
Site Use:	Commercial - Retail
Site Status:	Brownfields - BRELLA
Contamination:	Gasoline
Institutional Control:	Not reported
Record Last Update:	02/14/2020
Project Status:	Leak identified in dispenser during an inspection by the UST Program during Summer, 2007. Gasoline was leaking from the suction dispenser directly into the subsurface. NOAV issued requiring subsurface investigation be completed. NOAV closed upon receipt of workplan from Aquaterra. Project transferred to SMS at that time (August 2007). Initial site investigation completed in Spring, 2009. Groundwater contamination identified. All wells are currently below VGES. Applied to BRELLA program but waiting on project schedule; application administratively incomplete.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Property Description:	The original school building burned in 1822 and another school building was constructed. The second school was then replaced with the current building in 1940. The limited play equipment is aging and there are limited engaging and interactive site features for imaginative play and outdoor learning experiences. The site is nestled into the bank of a steep hill it has been plagued by a small landslide and slope slumping. Stormwater runoff has resulted in frequent muddy rivulets and ponding surface water. In 2013 a volunteer group worked to secure grant funds to build a new playground, and in 2015 hired a landscape architect to develop a plan which would provide a varied nature-based playscape. Due to the sites urban location an environmental site assessment was undertaken to ensure any earthwork would be handled appropriately. The charred remains of a previous school building that reportedly burned down, may have contributed to the elevated PAH concentrations detected in the soils at the site, and along with other soil contaminates which are typically found in urban areas, including arsenic (which is a naturally occurring element that is often found in Vermont soils).

Property Description:	The original school building burned in 1822 and another school building was constructed. The second school was then replaced with the current building in 1940. The limited play equipment is aging and there are limited engaging and interactive site features for imaginative play and outdoor learning experiences. The site is nestled into the bank of a steep hill it has been plagued by a small landslide and slope slumping. Stormwater runoff has resulted in frequent muddy rivulets and ponding surface water. In 2013 a volunteer group worked to secure grant funds to build a new playground, and in 2015 hired a landscape architect to develop a plan which would provide a varied nature-based playscape. Due to the sites urban location an environmental site assessment was undertaken to ensure any earthwork would be handled appropriately. The charred remains of a previous school building that reportedly burned down, may have contributed to the elevated PAH concentrations detected in the soils at the site, and along with other soil contaminates which are typically found in urban areas, including arsenic (which is a naturally occurring element that is often found in Vermont soils).

The limited play equipment is aging and there are limited engaging and interactive site features for imaginative play and outdoor learning experiences. The site is nestled into the bank of a steep hill it has been plagued by a small landslide and slope slumping. Stormwater runoff has resulted in frequent muddy rivulets and ponding surface water. In 2013 a volunteer group worked to secure grant funds to build a new playground, and in 2015 hired a landscape architect to develop a plan which would provide a varied nature-based playscape. Due to the sites urban location an environmental site assessment was undertaken to ensure any earthwork would be handled appropriately. The charred remains of a previous school building that reportedly burned down, may have contributed to the elevated PAH concentrations detected in the soils at the site, and along with other soil contaminates which are typically found in urban areas, including arsenic (which is a naturally occurring element that is often found in Vermont soils).

Institutional Control:	Not reported
Record Last Update:	11/24/2008
Project Status:	Contamination discovered during the removal of a heating oil UST. Excavation proceeded to a depth of approx. 11 feet below grade, at which point the PID readings had declined to 13 ppm. 12 cubic yards of contaminated soils were stockpiled and later transported for disposal at the Moretown Landfill. All properties in this area served by the municipal drinking water system. PID readings taken from the adjacent structures were all non-detect.

PERRYS SERVICE STATION (Continued) **S106133705**

6/5, 9/26,12/6/01, 4/30/02 4 of 7 MWs, 4/3 9/17/03 7 of 10 MWs above VGES biennial monitoring. 10/05 - sent letter that we're awaiting more work - abandoned UST investigation and more WQ sampling. Received wp/ce to investigate abandoned tank and install nutrient recharge gallery in July 2006. UST removed fall '06; nutrient gallery installed fall 06'. WQ monitoring and recharge gallery evaluation currently occuring (1/07).11/10 - elevated VOCs above VTGES in most wells on site - Winooski River sampling shows no impact. Nutrient injections did not show significant improvements. Continue with wq monitoring as well as conduct a CAFI for possible corrective action.2018 - significant petroleum contamination persists under the site. GW event to occur and a Conceptual Site Model will be developed to comply with iRule. Site my warrant Corrective Action.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ROBINS-HINDS RESIDENCE (Continued) **S110147587**

Over 23 tons of soil excavated and shipped to ESMI. No significant soil contamination recorded using a PID at the bottom of the excavation. Some groundwater noted in the excavation at a depth of 5 feet below grade. Screening of the indoor air of the residence showed no elevated PID readings. This property and adjacent properties are served by the municipal drinking water system.

Staff:	Ashley Desmond
Source:	UST-Heating Oil
Site Use:	Residential
Site Status:	Not reported
Contamination:	Heating Oil
Institutional Control:	Not reported
Record Last Update:	10/17/2006
Project Status:	Release detected during the removal of a heating oil UST system. No evidence of a shallow groundwater impact was noted in source area during tank removal or initial investigation. ECS oversaw the excavation of approximately 6 cubic yards of contaminated soil. Soils properly disposed of a ESMI in Louden, NH. Some residual contamination left in place at the bedrock interface (~8 ft below grade). TPH levels in this area exceeded the residential guideline, though VOCs were all well below the EPA Region IX Standards. Two rounds of samples collected from nearby public drinking water supply wells showed no detection of any volatile compounds. Note that the address of this property was formerly 2 Murray Hill Drive.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/30/2020

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/30/2020

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Next Scheduled EDR Contact: 04/05/2021
Data Release Frequency: Quarterly

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020
Date Data Arrived at EDR: 12/17/2020

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

PFAS: Sites With Known PFAS Contamination

PFAS have been widely used in numerous industrial and residential applications since the 1950a??s. Their stability and unique chemical properties produce waterproof, stain resistant, and nonstick qualities in products. They are found in some firefighting foams and a wide range of consumer products such as carpet treatments, non-stick cookware, water-resistant fabrics, food packaging materials, and personal care products.

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

FORMER CAPITOL CLEANERS
9 MAIN STREET
MONTPELIER, VT 05602

TARGET PROPERTY COORDINATES

Latitude (North):	44.258343 - 44° 15' 30.03''
Longitude (West):	72.576548 - 72° 34' 35.57''
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	693460.2
UTM Y (Meters):	4903207.0
Elevation:	522 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5645493 MONTPELIER, VT
Version Date:	2012
South Map:	5645481 BARRE WEST, VT
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

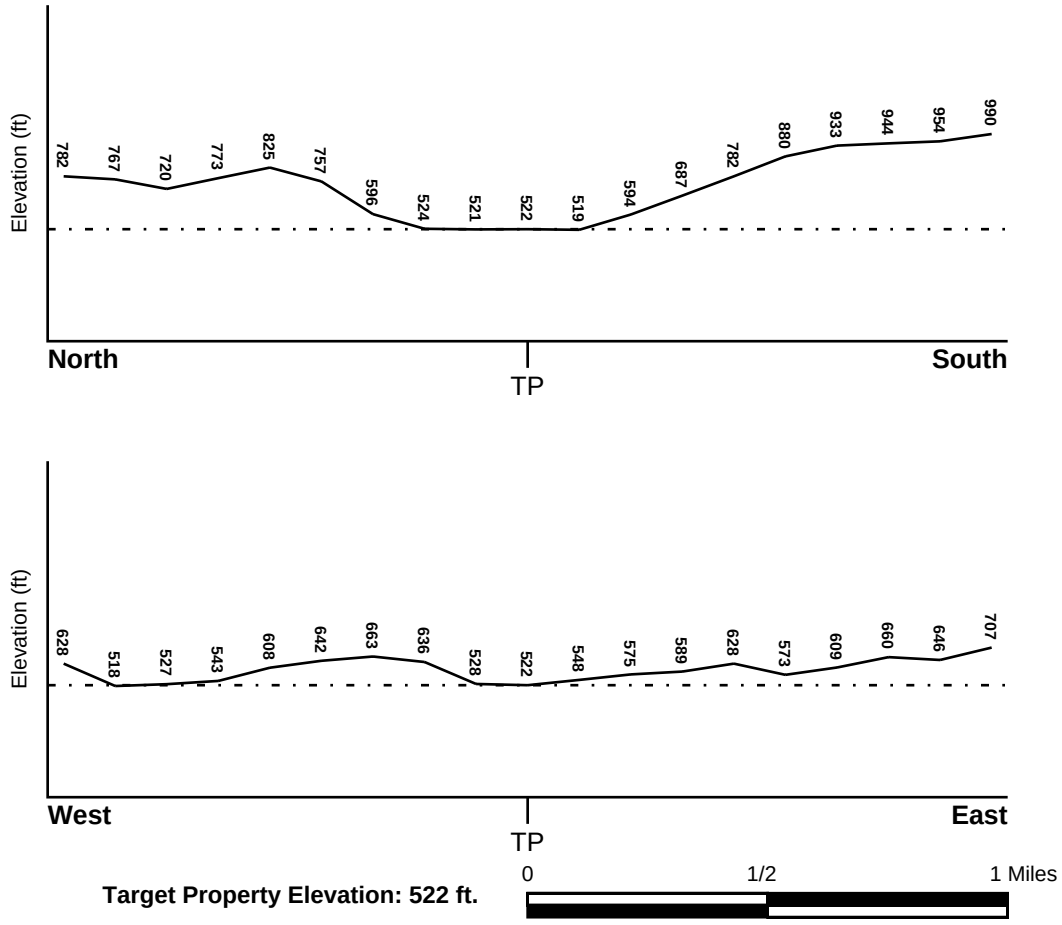

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 522 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
50023C0264E	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
50023C0263E	FEMA FIRM Flood data
50023C0268E	FEMA FIRM Flood data
50023C0427E	FEMA FIRM Flood data
50023C0431E	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
MONTPELIER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

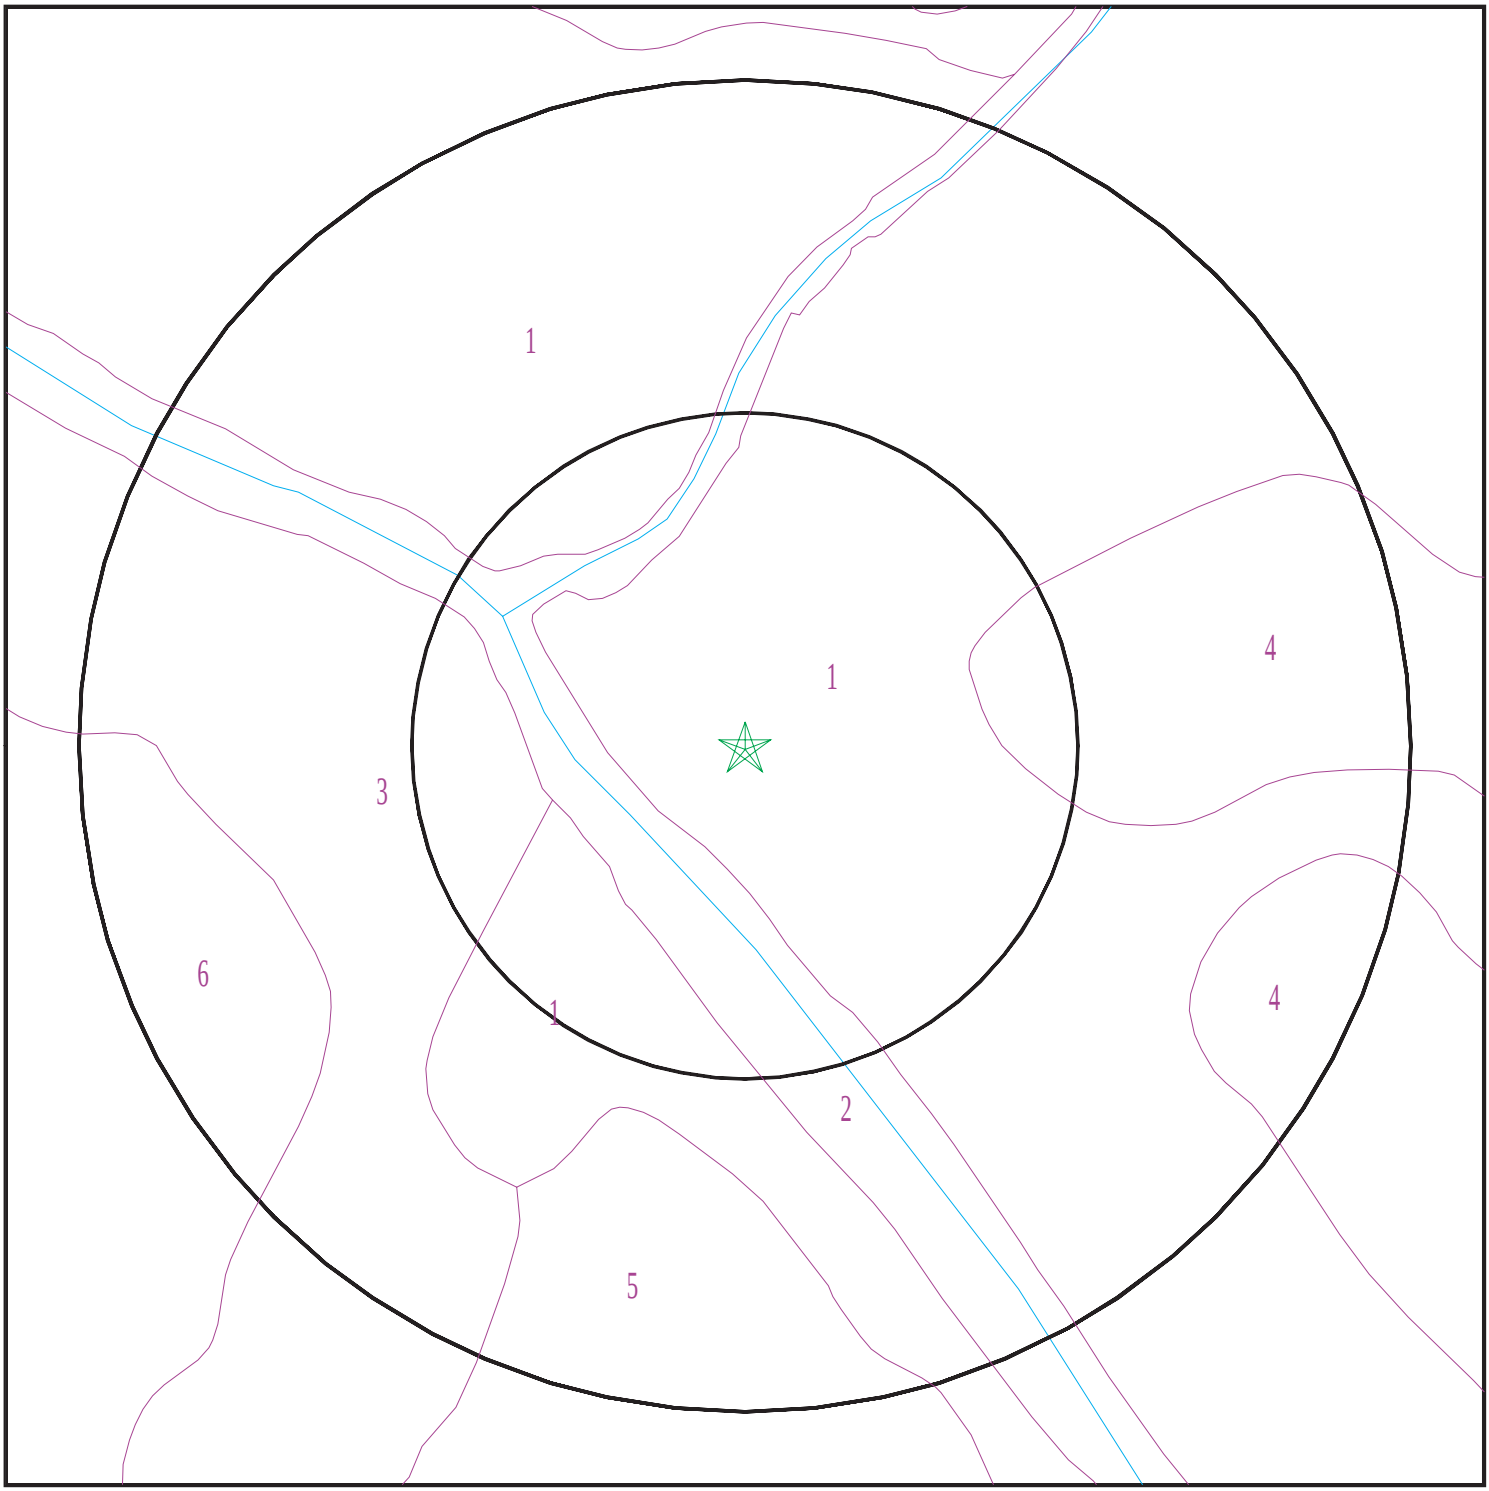

Era:	Paleozoic
System:	Devonian
Series:	Devonian
Code:	De *(decoded above as Era, System & Series)*

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Udipsamments

Soil Surface Texture: sand

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	64 inches	sand	Granular materials (35 pct. or less passing No. 200), Fine Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 705 Min: 141.14	Max: 7.8 Min: 5.6

Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture: sand

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Tunbridge

Soil Surface Texture: slightly decomposed plant material

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 39 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	slightly decomposed plant material	A-8	Not reported	Max: 141.1111 Min: 0.0706	Max: Min:
2	3 inches	4 inches	very fine sandy loam	A-8	Not reported	Max: 141.1111 Min: 0.0706	Max: Min:
3	4 inches	17 inches	very fine sandy loam	A-8	Not reported	Max: 141.1111 Min: 0.0706	Max: Min:
4	17 inches	25 inches	channery fine sandy loam	A-8	Not reported	Max: 141.1111 Min: 0.0706	Max: Min:
5	25 inches	29 inches	unweathered bedrock	A-8	Not reported	Max: 141.1111 Min: 0.0706	Max: Min:

Soil Map ID: 4

Soil Component Name: Dummerston

Soil Surface Texture: slightly decomposed plant material

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	2 inches	slightly decomposed plant material	A-8	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 4.5
2	2 inches	4 inches	fine sandy loam	A-8	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 4.5
3	4 inches	24 inches	fine sandy loam	A-8	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 4.5
4	24 inches	60 inches	fine sandy loam	A-8	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14.1111 Min: 4.2333	Max: 6 Min: 4.5

Soil Map ID: 5

Soil Component Name: Vershire

Soil Surface Texture: very fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 91 inches

Depth to Watertable Min: > 0 inches

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: VT Center for Geographic Information
Telephone: 802-882-3001

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Vermont Public Drinking Water Sources
Source: ANR, Water Supply Division
Telephone: 802-241-3406

Well Driller Report Database
Source: Dept of Environmental Conservation, Water Resource
Telephone: 802-585-4907
Private wells in this layer come from the Department of Environmental Conservation's Water Supply Data Composite. Managed by the Water Supply Division's Well Driller and Well Location Program, the database contains private well information submitted by Vermont licensed well drillers.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by VHB were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

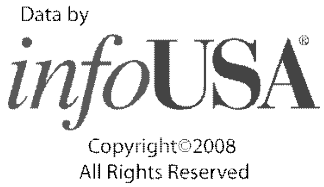

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Historical Topo Map Report

03/18/21

Site Name:	Client Name:
Former Capitol Cleaners	VHB
9 Main Street	40 IDX Drive
Montpelier, VT 05602	South Burlington, VT 05403
EDR Inquiry # 6410502.4	Contact: Greg Mcdonald

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by VHB were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*	
P.O.#	58580.00	**Latitude:**	44.258343 44° 15' 30" North
Project:	Former Capitol Cleaners	**Longitude:**	-72.576548 -72° 34' 36" West
		UTM Zone:	Zone 18 North
		UTM X Meters:	693454.63
		UTM Y Meters:	4903423.24
		Elevation:	522.00' above sea level

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Appendix H
User-provided Information

ASTM Phase I Environmental Site Assessment (ESA)
E1527-13 User Questionnaire[1]

Date: 3-22-21
Project Name: 9 MAIN ST RENO
Property Address: 9 MAIN ST. MONTPELIER, 05602
Questionnaire Completed By (Print Name): SEIJI E. OHASHI
Signature: [signature]
Relationship to the Property: PROSPECTIVE BUYER
Reason Phase I ESA is Being Performed: CURRENT/PAST USE, FINANCING

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law? Yes ☐ No ☒ If yes, explain: _____

2. Are you aware of any activity and use limitations (AULs) such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state, or local law? Yes ☐ No ☒ If yes, explain: _____

3. As the User of this Phase I Environmental Site Assessment (ESA) Report, do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? Yes ☐ No ☒ If yes, explain: _____

4. Does the purchase price being paid for this property reflect fair market value of the property? Yes ☒ No ☐
If you conclude that there is a difference, have you considered whether the lower price is because contamination is known or believed to be present at the property? Yes ☐ No ☐
If you answered yes to any of the above questions, explain: _____

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as a User:
   a) Do you know of any past uses of the property? Yes ☒ No ☐
   b) Do you know of specific chemicals that are present or once were present at the property? Yes ☐ No ☒
   c) Do you know of any spills or other chemical releases that have taken place at the property? Yes ☐ No ☒
   d) Do you know of any environmental cleanups that have taken place at the property? Yes ☐ No ☒

   If you answered yes to any of the above questions, explain: MANY YEARS AGO IT WAS A GAS STATION

6. As the User of this Phase I Environmental Site Assessment, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property? Yes ☐ No ☒
If yes, explain: _____

7. Do you have access to a title search or previous environmental reports or correspondence pertaining to the property? Yes ☒ No ☐ If yes, please provide. I WAS SENT A PHASE 1 ESA FROM 2003

8. Do you know of any specific requirements from your bank or other financing agency regarding the Phase I ESA (scope, reliance letter, etc.)? Yes ☐ No ☐ Unknown ☒ If yes, please provide. FINANCING IS STILL IN EARLY PHASE. I WOULD BE SURPRISED IF NSBVT DID NOT REQUIRE

[1] In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments") the User must provide the above-listed information (if available) to the environmental professional. Failure to provide this information could result in a determination that "all appropriate inquiry" is not complete.

Vapor Encroachment Questionnaire

PROPERTY INFORMATION SECTION:

Property type — ☒ Commercial ☐ Industrial ☐ Multi-Tenant ☐ Vacant Land

Are there any buildings/structures on the property? — Yes ☒ No ☐ Unknown ☐
If yes, type construction BRICK, CINDER BLOCK, MEMBRANE ROOF

Will buildings/structures be constructed on the property in the future? — Yes ☐ No ☒ Unknown ☐
If yes, type construction _____

If buildings exist or are proposed, do/will they have elevators? — Yes ☐ No ☒ Unknown ☐

Know all Men by these Presents

That Montpelier and Barre Railroad Company, a corporation duly chartered, organized and existing under and by virtue of the laws of the State of Delaware, with an office and place of business at City of Montpelier,

of in the County of Washington and State of Vermont Grantor, in the consideration of

--------- One Dollar and other valuable consideration ----------

paid to its full satisfaction by Filling Station Supply Co., Inc., a corporation duly chartered, organized and existing under and by virtue of the laws of the State of Vermont, with its principal office and place of business at City of Barre,

in the County of Washington and State of Vermont Grantee, by these presents, do freely **Give, Grant, Sell, Convey and Confirm** unto the said Grantee, Filling Station Supply Co., Inc., and its successors and assigns forever, a

certain piece of land in City of Montpelier in the County of Washington and State of Vermont, described as follows, viz:

FIRST PARCEL:

Being a portion of all and the same land and premises conveyed to the grantor by the Central Vermont Railway, Inc., by its deed dated the 15th day of May, 1958, and recorded in Book 87, pages 171 - 174, of the Land Records of the City of Montpelier, and being more particularly described as follows:--

Commencing at the intersection of the general westerly edge of Barre Street, so-called, with the general southerly edge of Main Street, so-called, which point is presently marked by the most northeasterly corner of the concrete base of the base of a sign post; thence running south 28° 00' East on the general westerly side of said Barre Street a distance of 126.9 feet to an iron pipe driven in the ground; thence turning an angle to the right of 90° and running in a southwesterly direction a distance of 68.55 feet to an iron pipe driven in the ground; thence turning an angle to the right with an internal angle of 75° 22' and running northerly a distance of 127.9 feet to a 1" square nut bolt driven in the ground at the northerly side of the most northerly rail of the main line track of the Central Vermont Railway, Inc.; thence turning an angle to the right with an internal angle of 109° 30' and running easterly along the southerly edge of said Main Street a distance of 36.3 feet to the point of beginning.

SECOND PARCEL:

Also hereby conveying a parcel of land 16 feet in width adjoining the land and premises hereinbefore described on the general southerly boundary line thereof and extending therefrom to the general northerly boundary line of property now or formerly owned by one Bartlett and being more particularly described as follows: Commencing at an iron pin set in the ground on the general westerly edge of Barre Street, so-called, which said iron pin marks the general southeasterly corner of land and premises hereinbefore described; thence running in a general southwesterly direction a distance of 68.55 feet to an iron pipe driven in the ground; thence turning an angle to the left and running in a general southerly direction a distance of approximately 18 feet to the northwesterly corner of land and premises now or formerly owned by said Bartlett; thence turning an angle to the left and running along the boundary line between said parcel and land and premises of said Bartlett in a general easterly direction to the westerly edge of said Barre

Street; thence turning an angle to the left and running along the westerly edge of Barre Street a distance of 16 feet to the point of beginning.

Excepting and reserving unto the said grantor, its successors and assigns, the right to use said parcel as a means of ingress and egress by motor vehicles and otherwise to its property adjoining the same.

The above-described parcels of land are further set forth on a plan entitled "Plan of a Parcel of Land, Corner of Main and Barre Street, Montpelier, Vt., Leased to Corker Coal Co. by Central Vermont Railway, Inc., Scale 1 in. = 10 ft., Surveyed July 12, 1956 and corrected and brought up to date June 6, 1958, by George H. Cook, Licensed Eng'r., Montpelier, Vt.", which said plan is about to be placed on file in the Land Records of the City of Montpelier.

Reference is hereby made to the aforementioned deed and the record thereof and to the deeds and records therein referred to and also to the aforementioned plan for a further and more particular description of the land and premises hereby conveyed.

RIGHT OF WAY

Also hereby conveying unto said grantee, its successors and assigns, the right to use in common with said grantor, its successors and assigns, a small triangular-shaped parcel of land which adjoins the land and premises herein conveyed on the general westerly boundary thereof for the purpose of ingress and egress by motor vehicles and pedestrians to the land and premises herein conveyed unto said grantee, which said parcel is further described as follows: Commencing at the northwesterly corner of land and premises herein conveyed on the southerly edge of Main Street, so-called; thence running in a general southerly direction along the general westerly boundary line of land and premises herein conveyed a distance of 24 feet to a point; thence turning an angle to the right and running in a general westerly direction a distance of 32 feet, more or less, to a point on the general southerly edge of said Main Street, which said point is 30 feet westerly of the point of beginning; thence turning an angle to the right and running along the general southerly edge of said Main Street a distance of 30 feet to the point of beginning. The said grantee, its successors and assigns, shall maintain crossing planks on either side of the railroad track located on said parcel for a distance of 24 feet and shall also maintain blacktop between and outside of said planks and shall also keep said area free and clear of snow, ice and debris of any kind, all at its own expense, and in the event said grantee, or its successors and assigns, shall fail to fully perform said obligations, the right herein conveyed shall terminate upon thirty days' notice, in writing, from said grantor, its successors and assigns, to said grantee and its successors and assigns.

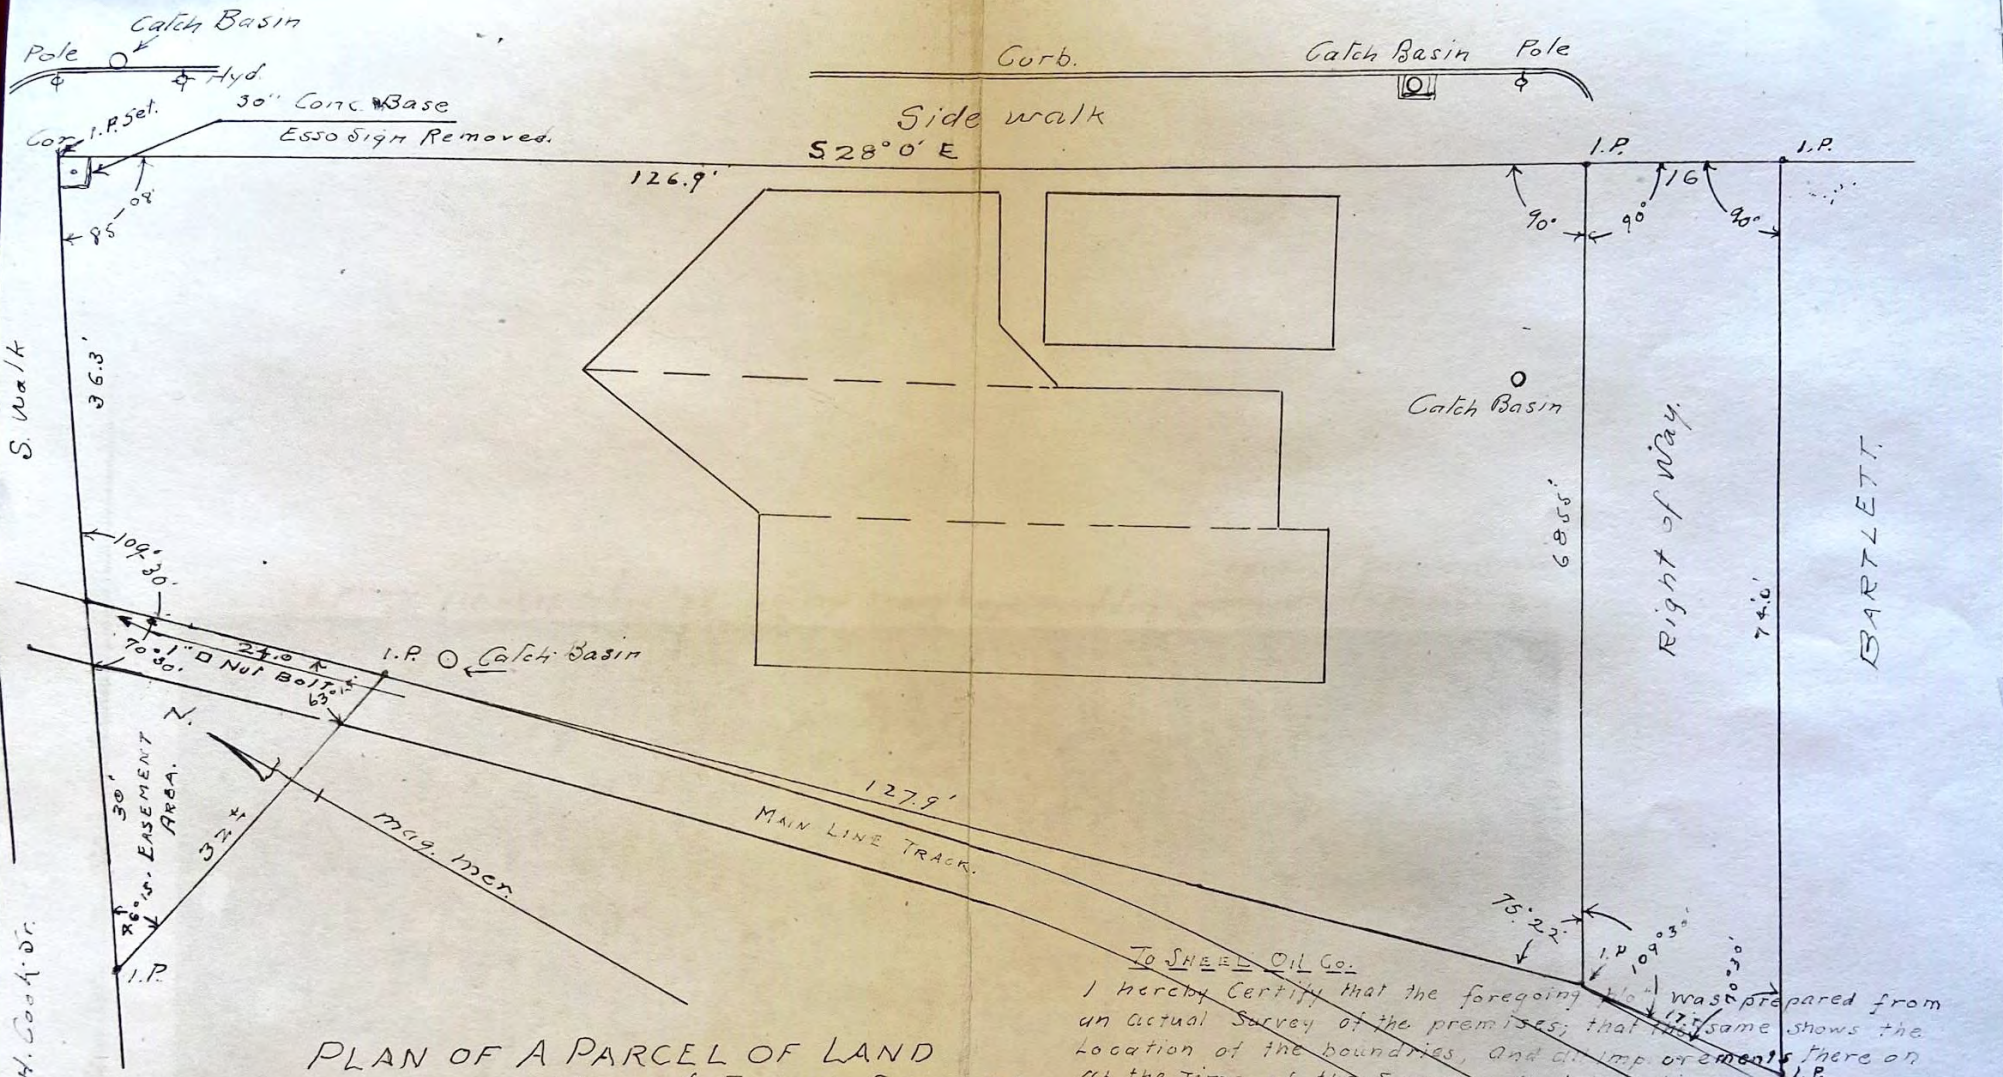

To have and to hold *said granted premises, with all the privileges and appurtenances thereof, to the said Grantee*, Filling Station Supply Co., Inc., its successors and assigns, to its own use and behoof forever;

~~And it the said Grantor, Montpelier and Barre Railroad Company, for itself and its successors and assigns,~~

~~for~~ ~~and~~ ~~for~~

~~executors and administrators~~ *do* es *covenant with the said Grantee*, Filling Station Supply Co., Inc., its successors and assigns,

~~heirs and assigns,~~ *that until the ensealing of these presents* it is *the sole owner of the premises, and have good right and title to convey the same in manner aforesaid, that they are* **Free from every encumbrance;** except as aforesaid,, AND except also that said grantor makes absolutely no warranties as to the SECOND PARCEL of land hereinbefore described and as to said SECOND PARCEL said grantor conveys unto said grantee whatever right, title and interest it now has in and to said parcel and does not engage to warrant and defend the same against any adverse claims whether the same be of record or otherwise,

PLAN OF A PARCEL OF LAND CORNER OF MAIN & BARRE STREETS. MONTPELIER, VT. LEASED TO CORKER COAL CO BY CENTRAL VERMONT RAILWAY, INC.

Scale 1in = 10 ft. Surveyed. July 12 1954

28 1958 Geo. H. Cook Dr.

To Sheel Oil Co.

I hereby Certify that the foregoing plot was prepared from an actual Survey of the premises; that the same shows the Location of the boundries, and improvements there on at the Time of the Survey; that the dimensions of the improvements and the Location thereof with respect to the boundries are as Shown; that there are no encroachments by improvements appurtenant to Adjoining premises upon Subject premises, nor from Subject premises Unless Shown on the plot; And that any easements apparent from a Visual inspection are delineated there on.

LEASE

THIS LEASE, dated SEPTEMBER 15TH, 19 58, between FILLING STATION SUPPLY, INC., A VERMONT CORPORATION WITH OFFICES AT 11 MILL STREET in BARRE, VERMONT, (herein called "Lessor", whether one or more), and SHELL OIL COMPANY, a Delaware corporation with offices at 1066 MADISON AVENUE in ALBANY, NEW YORK (hercin called "Shell"),

WITNESSETH:

1. Lessor hereby leases to Shell, and Shell hereby leases from Lessor, the following described land, situated at THE SOUTHWEST CORNER OF MAIN AND BARRE STREETS in MONTPELIER, County of WASHINGTON, State of VERMONT:

ALL thos certain lots, pieces or parcels of land situate, lying and being in the City of Montpelier, County of Washington and State of Vermont, bounded and described as follows:

FIRST PARCEL

COMMENCING at the intersection of the general Westerly edge of Barre Street, so-called, with the general southerly edge of Main Street, so-called, which point is marked by the northeasterly corner of the concrete base of a sign post; thence running south 28° 00' east on the general westerly side of said Barre Street a distance of 126.9 feet to an iron pipe driven in the ground; thence turning an angle to the right of 90° and running in a southwesterly direction a distance of 68.55 feet to an iron pipe driven in the ground; thence turning at an angle to the right with an internal angle of 75° 22' and running northerly a distance of 127.9 feet to a one inch square nut bolt driven in the ground at the northerly side of the most northerly rail of the main line track of the Central Vermont Railway, Inc.; thence turning an angle to the right with an internal angle of 109° 30' and running easterly along the southerly edge of said Main Street a distance of 36.3 feet to the point of beginning,

SECOND PARCEL

COMMENCING at an iron pin set in the ground on the general westerly edge of Barre Street, so-called, which said iron pin marks the general southeasterly corner of the parcel of land first above described; thence running in a general southeasterly direction along the general westerly edge of Barre Street, so-called, a distance of 16 feet to an iron pin set in the ground, which said iron pin marks the general northeasterly corner of land now or formerly owned by one Bartlett; thence turning an angle to the right of 90° and running in a general southwesterly direction along the land of said Bartlett a distance of 74 feet to an iron pin set in the ground, which said iron pin marks the general northwesterly corner of the land of said Bartlett; thence turning an angle to the right with an internal angle of 70° 30' and running in a general northerly direction a distance of 17 feet, more or less, to an iron pipe driven in the ground, which said iron pipe marks the general southwesterly corner of the parcel of land first above described; and thence turning an angle to the right with an internal angle of 109° 30' and running in a general northeasterly direction along the general southeasterly boundary line of the parcel of land first above described a distance of 68.55 feet to the point of BEGINNING.

TOGETHER with the right to use, in common with Montpelier and Barre Railroad Company, its successors and assigns, for the purpose of ingress and egress by motor vehicles and pedestrians to and from the land and premises hereinabove described, a small triangular-shaped parcel of land which adjoins the land and premises hereinabove described on the general westerly boundary thereof, and which is more particularly bounded and described as follows:

COMMENCING at the northwesterly corner of the parcel of land first above described, on the southerly edge of Main Street, so-called; thence running in a general southerly direction along the general westerly boundary line of the parcel of land first above described a distance of 24 feet to a point; thence turning an angle to the right and running in a general westerly direction a distance of 32 feet more or less, to a point on the general southerly edge of said Main Street, which said point is 30 feet westerly of the point of beginning; thence turning and angle to the right and running along the general southerly edge of said Main Street a distance of 30 feet to the point of beginning.

Subject to all reservations, easements and conditions as are more fully described in a warranty deed from Montpelier & Barre Railroad Company to Filling Station Supply Co., Inc., dated October 1, 1956 and recorded in Vol. 91, Pages 449-450 of the Land Records of the City of Montpelier.

together with all of Lessor's buildings, improvements, equipment and other property now or hereafter located thereon, including those referred to in article 4 (and which, together with said land, are herein collectively called "the premises").

2. The term of this lease shall begin on the date of completion of Lessor's construction of an automobile service station on the premises, as provided in article 4, and shall end on the last day of the ONE HUNDRED TWENTIETH (120TH) full calendar month after such beginning date. Shell shall have options to extend the term of this lease for THREE TWO (2) additional period(s) of FIVE (5) year(s) each, on the same covenants and conditions as herein provided, each of which options Shell may exercise by giving Lessor notice at least forty-five (45) days prior to the expiration of the original term or the then-current extension period, as the case may be. If Shell does not exercise its then-current option to extend, the term shall be automatically extended from year to year, on the same covenants and conditions as herein provided, unless and until either Lessor or Shell terminates this lease at the end of the original term or the then-current extension period or any subsequent year, by giving the other at least thirty (30) days' notice.

3. Shell shall pay, as rent for each calendar month during the term of this lease, the sum of THREE HUNDRED THIRTY AND NO/100 Dollars ($ 330.00), by check to the order of FILLING STATION SUPPLY, INC., , in advance on or before the first day of each such month. Rent for any period less than a calendar month shall be prorated.

4. Lessor shall, at Lessor's expense: (a) obtain from the proper public authorities all licenses and permits necessary to authorize the construction and operation on the premises of an automobile service station (including the removal of existing structures, if required), as hereinafter provided; and (b) construct on the premises an automobile service station, including the buildings, improvements and equipment described in Exhibit A hereof, in accordance with plans and specifications approved by Shell, at a cost of not less than TWENTY THOUSAND Dollars ($20,000.00), in a good and workmanlike manner satisfactory to Shell and to all public authorities whose approval is required. If Lessor fails (1) diligently to endeavor to obtain such licenses and permits or (2) so to obtain the same as promptly as possible after the date of this lease or (3) diligently to prosecute such construction or (4) so to complete the same as promptly as possible after the licenses and permits have been obtained; Shell may obtain the licenses and permits and/or undertake and/or complete the construction, and charge the cost thereof to Lessor.

5. Shell shall have the rights, at Shell's expense: to use the premises for any lawful purpose; to paint all or any part of the premises in colors of Shell's selection; to make any alterations that Shell may desire in the premises; and to construct and install on the premises, and alter, any additional buildings, improvements and equipment (including advertising signs and billboards) that Shell may desire. Lessor shall remove from the premises any of Lessor's equipment that Shell elects to replace with its own equipment.

6. Lessor shall pay all taxes, assessments and other charges on the premises, excepting taxes on Shell's property on the premises, and license, utilities and other such charges incurred by Shell's use of or operations on the premises. If Lessor defaults, at any time, in any such payment or in the performance of the obligations of any mortgage or other lien affecting the premises, Shell may remedy such default, in whole or in part, charge to Lessor all costs incurred thereby, and be subrogated to the rights of the holder of such mortgage or other lien.

7. Lessor shall maintain the premises in good condition and repair, and shall repair or replace any of the leased buildings, improvements and equipment damaged or destroyed by any cause other than Shell's negligence, or by fire or explosion whether or not caused by Shell's negligence. If Lessor fails to commence making repairs or replacements within five (5) days after Shell gives notice requesting Lessor so to do, or fails to complete the same promptly, Shell may make such repairs or replacements and charge to Lessor the cost thereof. If the premises are rendered wholly or partially unfit for occupancy by any such damage or destruction, or if, for any reason other than Shell's negligence, the possession or beneficial use of the premises is interfered with, the rent hereunder shall abate until the premises are fully restored to fitness for occupancy or such interference has ceased.

8. All sums charged to Lessor by Shell hereunder shall be indebtedness of Lessor to Shell payable on demand. If any such indebtedness or any other indebtedness of Lessor to Shell is due at any time, Shell may, in addition to other remedies, withhold all rent accruing hereunder and apply the same to the payment of such indebtedness. If all such indebtedness is not fully paid at the expiration of the original term of this lease or any extension thereof, Shell may, at its option, extend this lease on the same covenants and conditions as herein provided, until such indebtedness is fully paid by application of all rents thereto.

9. At any time during the original term of this lease ~~or any extension thereof or any tenancy thereafter~~, Shell shall have the option to purchase the premises for the sum of SIXTY THOUSAND & NO/100 Dollars ($ 60,000.00), on the terms provided in article 11, which option Shell may exercise by notice to Lessor.

10. If at any time during the original term of this lease (or any extension thereof ~~or any tenancy thereafter~~) Lessor receives from a ready, willing and able purchaser, an acceptable bona fide offer to purchase, or makes a bona fide offer to sell to such a purchaser, the premises or any part thereof or any property which includes all or part of the premises, Lessor shall give Shell notice, setting forth the name and address of the purchaser and the price and terms of the offer, and accompanied by Lessor's affidavit that the proposed sale is in good faith. Shell shall thereupon have, in addition and without prejudice to its rights under article 9, the prior option to purchase the premises or the part thereof or the entire property covered by such offer, at the price and on the terms of the offer but subject to the terms provided in article 11, which option Shell may exercise by giving Lessor notice within twenty (20) days after Shell's receipt of Lessor's notice of the offer. Shell's failure, at any time, to exercise its option under this article 10 shall not affect this lease or the continuance of Shell's rights and options under article 2, 9 or 10 or any article hereof.

11. Within twenty (20) days after notice of Shell's exercise of any purchase option herein, Lessor shall obtain, at Lessor's expense, and submit to Shell evidence of Lessor's title to the property covered by the exercised option, for examination by Shell's attorneys, (in default whereof Shell may obtain the same and charge to Lessor the cost thereof), and all title opinions, certificates and policies, licenses, permits and surveys relating thereto that Lessor may possess, all of which shall become Shell's property if the sale is consummated. All liens, encumbrances, restrictions and other defects in title shall be cleared by Lessor promptly on notice from Shell. If title is approved by Shell's attorneys and all necessary legal permission for the operation on the premises of an automobile service station, and the use of the premises therefor, is in effect, the sale shall be consummated without unreasonable delay; and Lessor shall convey to Shell the property covered by the exercised option, by recordable deed with general covenants of warranty and, as to any personal property, by a good and sufficient bill of sale. Taxes for the current year and rent shall be prorated as of the date of delivery of such deed. If title is not approved by Shell's attorneys or all such legal permission is not in effect, the sale shall be consummated or rejected at Shell's option; and Shell may waive any liens and other encumbrances on the premises and reduce the purchase price by the amount thereof. Evidence of Lessor's title means, at Shell's option: any evidence of title that Lessor may possess, a complete abstract of title, a current certificate of title, an attorney's opinion as to title, or a report of a title insurance company and subsequently a title policy fully insuring the interest Shell is to acquire, such abstracter, attorney or title company to be selected by Shell.

12. Shell may at any time assign this lease or sublease all or any part of the premises.

13. If, without Shell's fault, the operation on the premises of an automobile service station, or the use of the premises therefor, is prevented, limited or impaired by any act or omission of any governmental authority, or becomes illegal, and such condition continues for thirty (30) days; or if such operation or use is at any time impaired or affected by the closing, relocation, alteration or improvement of any street adjoining the premises or if any federal or state highway is re-routed from any such street;

to a , vhi

; the) ight

or if all or any part of the premises is condemned for public or quasi-public use; Shell may terminate this lease by giving Lessor at least thirty (30) days' notice. ~~Shell may terminate this lease at any time by giving Lessor at least ninety (90) days' notice and by paying Lessor, as consideration therefor, the sum of Ten Dollars ($ 10.00).~~

except to the building described in exhibit "A",

14. All buildings, improvements, equipment and other property constructed, installed or placed on the premises by Shell or acquired by Shell, at any time during the term of this or any previous lease or any extension thereof or any tenancy thereafter, shall be and remain Shell's property, and Shell shall have the right to remove any or all of the same from the premises, at any time during, and within thirty (30) days after any termination of, this lease or any tenancy thereafter. At the termination of this lease or any tenancy thereafter, Shell shall surrender the premises to Lessor, subject to ordinary wear and tear, to any damage or destruction which Lessor is obligated to repair or replace under article 7, and to Shell's rights under articles 5 and 14. Any holdover by Shell after any termination of this lease shall create no more than a month-to-month tenancy at the rent and on all other applicable conditions herein provided. If forfeiture of this lease be permitted by law for Shell's default, Lessor shall not be entitled to declare any such forfeiture unless Lessor shall have given Shell notice of such default and Shell shall have failed to remedy same within twenty (20) days after receipt of such notice.

15. Lessor covenants that Lessor is well seized of and has good right to lease the premises, will warrant and defend the title thereto, and will indemnify Shell against any damage and expense which Shell may suffer by reason of any lien, encumbrance, restriction or defect in the title to or description herein of the premises. If, at any time, Lessor's title or right to receive rent hereunder is disputed, or there is a change of ownership of Lessor's estate by act of the parties or operation of law, Shell may withhold rent thereafter accruing until Shell is furnished proof satisfactory to it as to the party entitled thereto.

16. Notices hereunder shall be given only by registered letter or telegram and shall be deemed given when the letter is deposited in the mail or the telegram filed with the telegraph company, postage or charges prepaid, and addressed to the party for whom intended at such party's address first herein specified, or to such other address as may be substituted therefor by proper notice hereunder.

17. This lease merges and supersedes all prior negotiations, representations and agreements, and constitutes the entire contract, between Lessor and Shell concerning the leasing of the premises and the consideration therefor. Neither this lease nor any amendment or supplement thereto shall be binding on Shell unless and until it is signed in Shell's behalf by a representative duly authorized by its Board of Directors, and a copy thereof so signed is delivered to Lessor. This lease shall be binding on and inure to the benefit of the heirs, administrators, executors, successors and assigns of Lessor, and the successors and assigns of Shell.

IN WITNESS WHEREOF, this lease is executed as of the date first herein written.

Owner/Key Site Manager Provided Information

ASTM Phase I Environmental Site Assessment (ESA)

ENVIRONMENTAL QUESTIONNAIRE

INSTRUCTIONS: Please complete the following questionnaire. If you have any questions about how to answer the question, answer to the best of your ability, and indicate your question. If additional pages are necessary to fully respond to the question, please mark each page and attach them to this questionnaire. Also, please attach copies of any requested applicable documents.

Date: _____

Property Address: _____

Questionnaire Completed By (Print Name): _____

Signature: _____

Relationship to the Property: _____

Reason Phase I ESA is Being Performed: _____

I. GENERAL BACKGROUND INFORMATION:

1. To the best of your knowledge, provide a history of ownership, operations, and uses at the property.

2. Describe general characteristics of the property and the surrounding area (including any applicable terrain, location of wetlands, coastlines, rivers, streams, lakes, springs, drinking water wells, roads, railways, water intake and discharge structures, landmarks, flood plains, etc.):

3. Describe general characteristics of any structures/buildings on the property (location, construction type, date of/approximate date of construction, primary uses, etc.):

4. Describe all past/present building heating system(s), fuel types, and fuel storage locations (if applicable).

5. Have there been any spills, releases, or environmental problems at or near the property (including neighboring properties)? If so, describe; and attach any applicable incident reports and the results of any investigations:

6. Are there any drinking water wells, or other wells, on the property? If so, give location.

7. Are there any air emission sources that emit contaminants at the property?

8. Have there been any changes in structures, pavement, or filling at the property?

II. SPILLS AND STORAGE TANKS:

9. List and locate ALL past/present above ground and underground storage tanks associated with the property and describe the contents and capacity of each tank.

10. Have there been any leaks, spills, releases or other discharges (including loss of inventory) associated with any of these tanks? If so, give full details, including the response(s) taken, all analytical results or reports developed through investigation (whether internal or external), and the agencies which may have become involved.

11. Have any underground storage tanks ever been removed from the property? If so, please give dates and copies of State reports, if available.

12. Are you aware of any other former or current oil and or hazardous material use or storage at the property?

13. Is there a septic system, leach field, or dry well, etc., on the property; or to the best of your knowledge, has there ever been such a system on the property? If yes, please locate.

14. Are there any floor drains or sumps in any facilities on the property? If yes, please locate.

    Where do the floor drains go (choose one)?

    A. Are they connected to municipal sewer system?
    B. Do they drain into a septic system, leach field or dry well?
    C. Do they drain into a stream?
    D. Do they drain onto the ground surface?
    E. Other? Please explain

15. Has the groundwater at or around the property been tested? If so, attach all analytical results.

III. POLYCHLORINATED BIPHENYLS ("PCB'S") AND ASBESTOS:

16. Are you aware of the presence of any PCBs or PCB containing equipment, whether used or stored at the property? (PCBs are generally associated with transformers or capacitors, circuit breakers, voltage regulators, switches or cables.) If so, please include them:

17. Have there been any PCB spills, discharges or other accidents? If so, please describe:

18. Does the property have any asbestos containing materials, including materials used to construct the building(s)? If so, please list locations:

19. Does the property have any UREA formaldehyde foam containing materials, including materials used to insulate the building(s)? If so, list locations:

IV. SOLID AND HAZARDOUS WASTES:

20. Does any facility on the property generate any solid or hazardous wastes? If so, provide the facility's EPA (or State) identification number and identify any wastes generated.

21. Does any facility on the property have any RCRA Hazardous Waste Permits? If so, please attach to this questionnaire.

22. Does any facility on the property treat or dispose of any wastes on site (including without limitation incineration, reclamation, neutralization or recovery)? If so, describe in full, and attach any applicable permits.

23. Does any facility on the property accumulate and store any hazardous wastes on site for disposal for longer than 90 days? If so, identify the substance, the quantity and describe how it is stored:

Environmental Questionnaire
Nicholas DeNoia – Current Owner

1: To the best of your knowledge, provide a history of ownership, operations and uses at the property.

We purchased in 2003 from David Benvenutti
It was used as dry-cleaning drop store before we bought it
Before that it was converted from a gas station.
I believe it was built in the 60s.

2: Describe general characteristics of the property and the surrounding are (including any applicable terrain, location of wetlands, coastlines, rivers, streams, lakes, springs, drinking water wells, roads, railways, water intake and discharge structures, landmarks, flood plains, etc.)

the property is near the Winooski River and borders the railroad tracks

3: Describe general characteristics of any structures/buildings on the property (locations, construction type, date of/approximate date of construction, primary uses, etc.):

The building is a mix of brick, concrete block, and wood frame.

4: Describe all past/present building heating system(s), fuel types, and fuel storage locations (if applicable).

The heating system was installed approximately 12 years ago. It is a oil hot air system. It replaced a system of like kind. There is also a heat pump system installed that cools and heats with electric. There are 2 storage tanks. One is in the ground directly behind the building and the other is in the storage closet.

5: Have there been any spills, releases, or environmental problems at or near the property (including neighboring properties)? If so, describe; and attach any applicable incident reports and the results of any investigations.

Not to my knowledge

6: Are there any drinking water wells, or other wells, on the property? If so, give location.

No

7: Are there any air emission sources that emit contaminants at the property?

Other than the furnace, no.

8: Have there ever been any changes in structures, pavement, or filling at the property?

Not while I have owned it

9: List and locate all past/present above ground and underground storage tanks associated with the property and describe he contents and capacity of each tank.

2 fuel oil tanks. As described above

10: Have there ever been any leaks, spills, releases or other discharges (including loss of inventory) associated with any of these tanks? If so, give full details, including the response(s) tajeb, all analytical results or reports developed through investigation (whether internal or external, and the agencies which may have become involved.

No

11: Have any underground storage tanks ever been removed from the property? If so, please give dates and copies of State reports, if available.

Not while I owned

12: Are you aware of any other former or current oil and or hazardous material use or storage at the property?

It was previously a gas station

13-23:
no
