

1) I'm writing in regards to the RFP for the Orange, VT scoping study. Is there a project extent or limit? The RFP doesn't specify more than Village Area.

*Yes, the project extent is for pedestrian access within the village boundaries. For sight lines it is possible to look outside of these along route 302. But for the infrastructure that the town is wanting to scope it would all be within the designated village area.*

2) I've reviewed the RFP for the Orange scoping study and wondered if there was a goal completion date for the study?

*The goal completion date for the Orange scoping study is 9/30/2026.*
