14

Act 250 Case Review

Staff gave overview of new projects. Several were single-family housing and 2 were post-flood related projects.

18

The Committee discussed the Warren Town Garage and Salt Shed project, which includes a new salt shed, town garage, with access from Vaughn Brown Road. The project remains listed as "pending" because the District Commission has not yet reviewed the application they received. The committee speculated need for an Act 250 permit application might be due to stormwater runoff issues.

Section 248

- There was a spike in solar installations in October, likely due to expiring federal tax credits. The Montpelier wattage, while looking high, is actually a down-sizing of 2 previously proposed projects.
- The PUC recommended a CPU for the I Love Cows installation. Sam will keep the committee informed around interest in possible fire safety training.

• L. Cattaneo asked how projects are certified to be in compliance with their conditions once built. S. Lash will investigate.

Section 248a

- The committee previously wrote a letter appreciating the co-location of a town in Middlesex. That project has received a CPG.
- The Marshfield tower will be going to a hearing after 5 residents requested one. Their discovery request thoroughly investigated all aspects of the Verizon application: software, file format, etc. The deadline for Verizon response to comments is 12/15/2025. An evidentiary hearing is likely in April, 2026.
- The Washington tower project closed on 10/14/2025 without a petition being filed. To reopen, they would need to restart the process with a new advanced warning.
