## Emergency Watershed Program Request for Proposals – Engineering Services

### Responses to questions regarding Request for Proposals

- 1. Question:** Is there an estimated date for when the construction phase will go out to bid?

**Answer:** Ideally, we would like to complete construction this summer (2026), however; we understand that there are many factors involved including completion of the final design, permitting including tree cutting restrictions, whether landowners wish to proceed based on the engineer's estimates, availability of contractors, etc. We hope that work would proceed as quickly as practical.

- 2. Question:** Is it possible to obtain copies of the survey that was completed along with the other documentation included in the Natural Resources Conservation Service Damage Survey Report?

**Answer:** Yes, all Damage Survey Reports (DSR) and additional project information provided by the NRCS are available at [Requests for Qualifications, Bids, and Proposals - Central Vermont Regional Planning Commission](#). Surveys or partial surveys were completed at the following sites:

- 5042-017-125 – 1495 Coburn Road
- 5042-017-126 – 203 Martin Meadow Road
- 5042-017-130 – 99 Brook Road

A survey was not completed at:

- 5042-017-140 - 125 Barre Hill Road

**Full proposals due by 4:00 PM, 25 February 2025.**
